dandibhotlaparvathi@gmail.com | +13173316013 | <https://www.linkedin.com/in/parvathi-dandibhotla-74b4a61a6/>

EDUCATION

Indiana University, Luddy School of Informatics, Computing, and Engineering, Indianapolis, IN May 2025

Master of Science in Health Informatics

Chalapathi Institute of Pharmaceutical Sciences, Guntur, India April 2022

Doctor of Pharmacy (Post Baccalaureate)

Shri Vishnu College of Pharmacy, Bhimavaram, India April 2019

Bachelor of Pharmacy

TECHNICAL SKILLS

Languages: R, Python,

Databases: SQL

Visualization: Power BI and Tableau

Tools: MS Excel, PowerPoint, Pandas

Clinical Standards: ICD-10, SNOMED CT, LOINC, Rx NORM, FHIR, HL7

Other: GCP, HIPAA, ICH

WORK EXPERIENCE

Luddy School of Informatics, Computing, and Engineering, Indianapolis, IN Jan 2024 – May 2025

Research Data Analyst

- Performed comprehensive literature reviews, synthesize findings, and assisting with study design development.
- Conducted data wrangling and preprocessing using Excel, Python, R, and SQL to prepare healthcare datasets for statistical analysis.
- Applied statistical techniques and data visualization to uncover insights and trends related to public health outcomes.
- Created reproducible analysis workflows and research visualizations for manuscripts and presentations.
- Contributed research projects through effective data handling practices and the generation of analytical insights.

Truveta, Seattle, WA

May 2024 - Aug 2024

Graduate Engineering Intern

- Annotated electronic health records (EHR) and de-identified protected health information (PHI) in compliance with HIPAA.
- Mapped clinical concepts to standard terminologies such as ICD-10, SNOMED CT, and LOINC to enhance semantic interoperability.
- Contributed to improving data normalization and retrieval processes for large-scale clinical datasets.
- Worked with structured and unstructured healthcare data to support real-world data analytics projects.

Government General Hospital, Guntur, India

Apr 2021 – Apr 2022

Clinical Pharmacist Intern

- Took part in ward rounds, collected Adverse Drug Reactions (ADRs), and reported them.
- Counseled patients on lifestyle modifications and medication usage and conducted prescription and patient case sheet audits.

PROJECTS

Cognitive ability and visual-motor behavior across task complexity in young adults – a pilot study using virtual reality

Jan 2025- May 2025

- Finding possible correlation trends in the collected data.
- Applied statistical analysis (Kruskal–Wallis, ANOVA, Spearman correlation) using Python and R to interpret gaze and motor behavior data from immersive VR-based cognitive tasks.

Demographics and Lifestyle Factors in Relation to Cardiovascular Risk

Aug 2024- Dec 2024

- Study included skills like Python, SQL, data visualization techniques, and Machine learning models for data analysis and representation.

Assessing the significant morphological factors associated with development of breast cancer

Jan 2024-May 2024

- Worked on Python, data visualization techniques (Tableau), and statistical methods.
- The study confirmed the influence of morphological factors on breast cancer and suggested early screenings for prevention.

Simulated Project Management of a Remote Insulin Monitoring Study

Aug 2023 – Dec 2023

- Managed a simulated real-world research project, creating a Work Breakdown Structure, budget plan, and timeline for device testing and mock participant recruitment.
- Developed a comprehensive Work Plan, Communication Plan, and Risk Analysis identifying 14+ potential risks, simulating stakeholder coordination and reporting workflows.

A Research Study on role of high dose calcium in preventing pre-eclampsia

June 2021- April 2022

- A prospective cohort study with the results showing that high-dose calcium effectively prevents pre-eclampsia in high-risk patients.
