

Patrick Linder

Dallas, Georgia 30157 | 770 568 0792 | linderpatrick@gmail.com

Analytical and detail-oriented professional with 15+ years of experience in excelling within challenging roles and fast-paced technical environments by leveraging exceptional critical thinking, problem-solving, multitasking, and communication skills. Capable of aligning a company's information technology capabilities, resources, and infrastructure in accordance with set organizational objectives/targets. Ability to spearhead projects throughout full life cycles along with developing benchmarks, implementing best practices, as well as coaching and leading team members to achieve timely and cost-effective outcomes; well-poised to transition into IT roles.

Professional Experience

Freelancer on Upwork, Georgia

Software Developer | December 2024 to Present

- Creating software solutions in Python, Google Apps script, JavaScript, VBA
- Integrating Excel VBA programs with Online ERP system
- Integrating Google Sheets with Jotform and automated Email system
- Developed a custom Airtable system for a sporting goods store, featuring a spare-parts ordering form, inventory management, dynamic dashboards, and integrations with Google Sheets and automated email workflows.
- Designed and implemented an Airtable solution for a medical referral business, enabling seamless connections between doctors, practices, facilities, and patients—streamlining the referral process and ensuring specialists have access to all necessary patient data.
- Built a Jotform solution to efficiently collect and organize customer data for streamlined intake and processing.
- Developed custom Softr landing pages with user authentication and login functionality to support secure, user-specific access.
- Engineered an n8n integration connecting a chatbot to a MySQL database, enabling the AI to dynamically generate SQL queries based solely on the database schema and user prompts—delivering fast, cost-effective data insights without exposing sensitive data.

Andrades Cleanup | Woodstock, Georgia

Airtable R&D | January 2024 to December 2024

- Implementing Airtable Enterprise, creating Bases, Tables, Forms, Interfaces, 2way sync and Airtable automations
- Implementing ERP and CRM functionality into Airtable using Automations and JavaScript
- Integrating Softr Dashboards, Jotform, Fillout
- Creating Python programs to interchange data between Airtable and Go Motive API and Chat GPT API
- Mobile device management for Android, Apple iOS, MacOS, Windows
- Creating Python programs for custom PDF generation, vehicle tracking with Geofences to make sure that customer sites were serviced
- Implementing a private fuel station tracking and multiple parts storage location with transfer and tracking
- Integrating own employee punch system into Airtable with missed punch notifications
- Integrating automated recipe reading form image using ChatGPT

Knapp Inc. | Kennesaw, Georgia

Spare Parts Analyst, QA Manager | April 2018 to January 2024

- Conduct system evaluations and performance assessments to identify areas of concern and recommend improvements to optimize system functionality and enhance user experience
- Collaborate with software development teams of up to 10 members to integrate applications into existing systems, thereby ensuring compatibility and functionality of high availability systems
- Create KPI/business reports to share key findings/updates along with devising and executing improvement strategies for Director/VP to maintain optimized workflow
- Improved customer satisfaction rating from 1 to 4 stars in 2 years through excellent service and positive experiences
- Analyzing and reporting Quality issues from products received in our warehouse and at customer sites
- Built dynamic Airtable Interfaces and dashboards using advanced filters, linked records, and rollups to centralize install base data, enhancing team efficiency and executive reporting capabilities.
- Supported major customers like Walmart, Adidas and Digi-Key

Knapp Inc. | Kennesaw, Georgia

CS Helpdesk Software 2nd level | June 2015 to April 2018

- Resolved technical issues escalated from Tier 2 support by providing timely and efficient solutions to minimize downtime, ensure operational readiness, and optimized functionality
- Implemented network infrastructure solutions, including LAN/WLAN configurations to facilitate operational efficiency
- Appreciated by senior management on displaying outstanding performance and strong work ethics

- Correcting errors in Python and JavaScript programs.

Knapp AG | Graz, Austria

Software Field Engineer / Team Lead | August 2006 to June 2015

- Collaborated with cross-functional teams of up to 25 members to gather requirements as well as design and test warehouse control software to meet technological requirements
- Conducted thorough system testing, troubleshooting, and performance analysis along with identifying and resolving issues to mitigate downtime and enhance overall system efficiency
- Updated and maintained system documentation, including functional diagrams and technical bulletins to ensure comprehensive records for future use and reference
- Led a team of 20 Software field engineers globally and delivered remote support to manage installation and testing within the timeline along with facilitating compliance with set standards to exceed expectations
- Mentored 20 junior engineers by providing training/guidance and encouraging knowledge sharing to enhance team capabilities with remote support
