

PAVAN ANIRUDH PANDITI

Data Analyst

Location: New York, USA
Phone: 8389001904
E-mail:
pavananirudh965@gmail.com

SKILLS

Programming Languages:

Python, SQL

Data Analysis & Modeling:

Scikit-Learn, TensorFlow, Excel, Matplotlib, Seaborn

Data Visualization: Tableau, Power BI

ETL & Data Pipelines: SSIS, Alteryx, Apache Spark, Python.

Cloud Technologies: Azure Synapse Analytics, AWS S3, AWS RDS

Database Management:

MySQL, Oracle

Big Data Processing: Apache Spark

Data Warehousing: Azure Synapse Analytics, AWS RDS

Data Integration: SSIS, Alteryx

API Development: RESTful APIs

Data Storage: AWS S3, Azure Synapse Analytics

Version Control: Git, GitHub

Project Management: JIRA

Compliance & Standards: HIPAA, HITRUST, Basel III, IFRS

Reporting & Dashboards:

Power BI, Tableau, Excel
Ad-hoc Analysis, Python, SQL, Excel

Soft Skills:

Time Management, Leadership and Management, Problem-solving, Negotiation, Decision-making, Monitoring, Documentation & Presentation, Verbal Communication, Interpersonal Skills.

Operating System: Linux, Windows, iOS

EDUCATION

MASTER OF DATA SCIENCE
UNIVERSITY AT ALBANY, NY, USA

BACHELOR OF ELECTRONICS AND COMMUNICATION ENGINEERING

SRM UNIVERSITY, CHENNAI, INDIA

SUMMARY

Data Analyst with 4+ years of experience and a proven track record of leveraging data to drive actionable insights and optimize business outcomes. Skilled in data extraction, transformation, and loading (ETL), data analysis, and visualization using tools like Python, SQL, Tableau, Power BI, and Apache Spark. Proficient in building predictive models, automating processes, and ensuring data quality and compliance. Strong experience in financial and healthcare domains, with a focus on optimizing operations, reducing costs, and improving decision-making.

EXPERIENCE

JOHNSON & JOHNSON – NY| AUG 2022 – CURRENT | DATA ANALYST

- Developed a predictive model using Python (Scikit-Learn) and TensorFlow, achieving 77% accuracy in identifying high-risk patients.
- Implementing an ETL pipeline using SSIS and Alteryx to integrate data from Epic EHR and claims systems, processing over 200,000 patient records.
- Creating interactive Tableau dashboards to visualize readmission trends, reducing report generation time by 55%.
- Utilizing Apache Spark for big data processing, analyzing 2 years of historical patient data to identify key readmission factors.
- Automated data quality checks using SQL stored procedures, reducing manual review time by 40%.
- Utilized Azure Synapse Analytics to build a scalable data warehouse, optimizing query performance by 50% for large-scale analytics.
- Developing RESTful APIs for secure data exchange between internal systems and external partners, handling 5,000+ daily transactions.
- Implemented version control using Git and GitHub, improving team collaboration and reducing code conflicts by 30%.
- Ensuring compliance with HIPAA and HITRUST standards in all data handling and analysis processes.
- Performed ad-hoc analysis to address specific questions from clinical and administrative leadership.

COGNIZANT – INDIA| JUN 2019 – JUL 2021 | DATA ANALYST

- Implemented ETL pipelines using SSIS to automate financial data extraction, transformation & loading processes, leading to a 40% reduction in manual data handling.
- Created interactive Power BI dashboards for real-time business intelligence, enabling the management to track KPIs such as loan performance, profit margins and customer churn.
- Utilized Apache Spark for distributed processing of large financial datasets, cutting down processing time by 35% for risk assessments.
- Automated reporting processes in Python and Excel, reducing report generation time by 50% and freeing up resources for strategic analysis.
- Analyzed and optimized SQL queries on MySQL and Oracle databases, improving query performance by 35%.
- Implemented compliance reporting mechanisms, ensuring adherence to regulatory standards such as Basel III and IFRS, and reduced compliance issues by 10%.
- Applied data visualization techniques using Matplotlib and Seaborn, generating clear financial trend reports for stakeholders.
- Coordinated with cross-functional teams using JIRA for project management and progress tracking, ensuring timely completion of deliverables.
- Utilized AWS S3 and RDS for cloud-based storage and retrieval of financial datasets, improving data accessibility and security.
- Created root cause analysis reports to identify and address issues in financial operations, enhancing overall process efficiency by 15%.
