

Pavan Kumar

Java Full Stack Developer

Texas (Open to Relocate) | Mobile: (551) 888-0097 | Email: pavankumar.p9896@gmail.com | [LinkedIn](#)

SUMMARY

- **Java Full Stack Developer with 4+ years of experience** in **designing, developing, and maintaining Java/J2EE applications** through all phases of the **Software Development Life Cycle (SDLC)**.
- Proficient in utilizing a wide range of technologies and frameworks, including **Java, Spring Boot, Hibernate, Angular, React.js, Node.js, and more.**
- Expertise in designing **RESTful services**, implementing **Microservices architecture**, and **strategically** segregating tasks to enhance application scalability and eliminate dependencies.
- Experienced in **MVC architecture implementation** using **JSP, Spring, and Hibernate ORM**, with a focus on **Hibernate QL and Spring AOP** for efficient code organization.
- Skilled in managing databases such as **MongoDB, SQL Server, MySQL, and Oracle**, including overseeing installations, configurations, and upgrades.
- Demonstrated ability to leverage cloud services, specifically **AWS, including EC2, S3, RDS, and Elastic Load Balancer**, to ensure high availability and fault tolerance.
- Expertise in documentation, utilizing tools such as **Swagger for API documentation, Maven** for project management, and **Jenkins for continuous integration.**
- **Adept at conducting code reviews**, implementing **unit testing** with tools like **JUnit and Mockito**, and utilizing **version control tools like Git and Bitbucket** for ensuring code quality and adherence to coding standards.

SKILLS

Languages:	Java, Python, C, C++
Methodology:	SDLC, Agile, Waterfall
Frameworks:	Spring Boot, Hibernate, JPA, Angular, React.js, Node.js
J2EE Technologies:	Servlets, JSP, JSTL, JavaBeans, JDBC
IDEs:	NetBeans, IntelliJ IDEA, Visual Studio code, Eclipse
Web Technologies:	HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML
Application Server:	Apache Tomcat, WebLogic, JBoss
Database:	MySQL, MongoDB, Postgres SQL, Oracle
Build /Other tools:	UML, MS Visio, Maven, Gradle, Jenkins, Junit
Cloud Services:	Amazon IAM, EC2, Lambda, ELB, ASG, RDS, VPC, S3, API Gateway, Route53, SQS, SNS
Other Technical Skills:	RESTful APIs, GraphQL, WebSocket, Responsive Design, Package Managers, Webpack, Docker, CI/CD, Unit Testing, Serverless Architecture, Microservices Architecture, ORM (Object- Relational Mapping) frameworks, Software Development
Version Control Tool:	Git, GitHub, SVN, Bitbucket
Operating Systems:	Windows, Linux, Mac iOS
Soft Skills:	Time management, Leadership, Management, Problem-solving, Negotiation, Decision-Making, Documentation, and Presentation, Verbal communication, Sprint Planning

EXPERIENCE

Java Full Stack Developer | Capital One, TX

Nov 2022 – Present

- Involve in all the phases of **Software Development Life Cycle SDLC** including **analysis designing coding testing and deployment of the application.**
- **Developing and maintaining Java 17/J2EE applications** according to project requirements and timelines.
- Designing the overall **architecture of RESTful services**, including **resource modeling, URI design, and defining the hierarchy** of endpoints for **efficient and intuitive API navigation.**
- Participate in an Enterprise Application aimed at the implementation of Microservices, strategically segregating tasks to eliminate dependencies on concurrent processes within the same application.

- Employing **JSP, Spring, and Hibernate ORM** to establish the **MVC architecture, with Spring Framework** facilitating the initiation of managed beans and services.
- Creating various **spring controllers** tailored to application needs, **designed DAO and service layer components** utilizing **Spring/Hibernate API and annotations**, with a strong emphasis on Hibernate QL.
- Configuring **Spring IOC through Application Context files**, skillfully mapping database objects using Hibernate annotations.
- Uses **Spring AOP** to **decouple cross-cutting concerns** from the application code.
- Managing **MongoDB and SQL Server databases**, overseeing **database installations, configurations, and upgrades**.
- Leverages **AWS services** like **EC2, S3, RDS, and Elastic Load Balancer** to ensure high availability and fault tolerance.
- Developing and maintaining **stored procedures, triggers, and functions** to support application requirements.
- Designing and implementing **Spring Security, JWT-based authentication, and authorization** mechanisms for **web applications**. Creating and maintaining responsive **web interfaces using HTML, CSS, and Bootstrap framework**.
- Designing user **Interface using Angular UI** components such as **tabs, grids, dropdowns** and **configured** the routing service using **Angular router**.
- **Utilizes Swagger**, a robust **API documentation tool**, to meticulously document the REST API endpoints within the application. Uses **Maven for project management** and build automation and Continuous Integration is done using **Jenkins**.
- **Uses Postman** for **testing** and developed **JUnit, Mockito, and Power Mock Test** cases to test the service availability.
- Conducting **code reviews using Bitbuckets pull request feature**, ensuring code quality, identifying improvements, and ensuring adherence to coding standards. Uses issue-tracking tool **JIRA** for bug fixing and life cycle traceability.

Java Full Stack Developer | BirlaSoft, India

Jan 2019 – Dec 2021

- Used **core Java concepts** like **Collections, Generics, Exception handling, IO, Multi-threading, and Concurrency** to develop **business logic**.
- Implemented object-oriented programming concepts for validating the columns of the import file.
- **Migrated SOAP web service** resources to **Spring RESTful web services** resources using **Spring REST API with Spring Boot**.
- Implemented **RESTful APIs** and **communication patterns** for seamless interaction between **microservices**, enhancing system flexibility and maintenance.
- Developed user management screens using the **JSF framework**, business components using the **Spring framework**, and **DAO classes using Hibernate framework** for **persistence management** and was involved in integrating the frameworks for the project.
- Implemented **business logic in Middle Tier using pluggable components**, which were specified in the **customized xml documents using Spring framework**.
- Integrated the Application with the **Database using Hibernate**. Communicated between different applications using **JMS**.
- Interacted with the support team for requirements. Developed **MongoDB embedded documents** from **Java code** using **spring data MongoDB**.
- **Wrote SQL Queries** to get the information from **Oracle DB** for adjusting the data in DB. Used joins to get the data from more DB Tables. Views and Unions were also part of our implementation.
- **Implemented JWT** for **secure authentication and authorization**, enhancing user data protection and enabling stateless communication in Java applications.
- Involved in the Enhancement of existing applications utilizing **JSP, Created an HTML navigation menu** that is role-based menu items change dynamically, derived from the Database in the form of XML.
- Handled browser compatibility issues for different browsers related to **CSS, HTML, and JavaScript** for IE, Firefox, and Chrome browsers.
- Implemented **Angular** front-end for **Java-based web applications**, ensuring seamless user experiences and efficient data communication.
- **Developed and Implemented** automation using **Selenium Web Driver** and **Java for UI Testing**. **Used IntelliJ Idea** to **develop & debug the code**.
- Worked with **Docker** to **deploy Micro-services** in modern containers to increase Isolation.
- Conducted **unit testing with Mockito**, IE Tester, and end-to-end testing on the supported browsers and devices.

EDUCATION

Master of Science in Computer Science (Data Science Concentration) - Wichita State University, USA
Bachelor of Engineering in Electrical and Electronics Engineering - Osmania University, India
