

Pavan Theegela | Data Analyst

Houston, TX | +1 (832) 582-1474 | pkumartheegela@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 3+ years of experience in leveraging data to unlock business value and optimize decision-making. Adept in advanced data analysis, statistical modeling, and data visualization, utilizing tools such as SQL, Python, R, and Tableau to derive actionable insights. Demonstrated expertise in transforming complex datasets into strategic recommendations that drive operational efficiency and enhance business outcomes. Strong problem-solving abilities and a keen eye for detail, with a track record of collaborating with cross-functional teams to deliver data-driven solutions that align with organizational goals and improve performance.

SKILLS

Data Analysis & Statistical Tools: Python (Pandas, NumPy, SciPy), R, SQL, Excel (Advanced Functions, Pivot Tables)	Transformation, Automated Data Pipelines, PySpark, Apache Airflow
Data Visualization: Tableau, Microsoft Power BI, Google Data Studio, Matplotlib, Seaborn	Statistical Analysis: Hypothesis Testing, Regression Analysis, ANOVA, Time Series Analysis
Machine Learning: Classification Algorithms, Predictive Modeling, Scikit-learn	Business & Analytical Skills: KPI Development, Performance Metrics, Entity-Relationship Diagrams (ERD), A/B Testing, Time Series Forecasting, Regression Models, Consumer Insights, Market Trends, Competitive Analysis
Data Warehousing: Google BigQuery, NoSQL Databases (MongoDB, Cassandra), AWS(S3, Glue, Redshift), Snowflake, Azure (Databricks, Data Lake, Data Factory)	Project & Collaboration Skills: Problem Solving, Critical Thinking, Root Cause Analysis, Troubleshooting, Data Storytelling, Agile Methodology, Stakeholder Management, Cross-functional Teamwork, Scrum
Business Intelligence: Looker, QlikView, Advance Excel(Macros, VLOOKUP, Power Query)	
ETL (Extract, Transform, Load): Data Integration, Data	

PROFESSIONAL EXPERIENCE

Data Analyst, Humana TX	Dec 2024 – May 2025
- Conducted extensive analysis of healthcare data, identifying key trends and insights that informed the development of patient engagement strategies, improving patient satisfaction by 15% through targeted program adjustments. - Designed and developed automated data pipelines using Python and SQL to extract, clean, and transform large datasets from multiple systems, improving data processing and reducing report generation time, enabling faster decision-making. - Created and maintained real-time dashboards in Tableau and Power BI to track key performance metrics (KPIs), providing executive teams with up-to-date insights on patient care and operational performance. - Led cross-functional collaboration to provide actionable insights for cost reduction initiatives, identifying areas of inefficiency within healthcare processes, which led to a 10% decrease in operational costs. - Applied statistical methods, including hypothesis testing and regression analysis, to evaluate the effectiveness of healthcare programs and predict patient outcomes, contributing to a 20% improvement in program success rates. - Conducted data audits and ensured data integrity across multiple sources by performing thorough data validation, reducing errors in reporting and improving accuracy. - Collaborated with the IT and business teams to develop predictive models aimed at identifying high-risk patients, facilitating timely interventions and improving health outcomes. - Streamlined leadership in formulating data-driven strategies for new product launches by performing competitive analysis and identifying market trends, leading to a 12% increase in market share within 6 months.	
Data analyst, Cybage Software India	Aug 2022 – Jul 2023
- Extracted, processed, and analyzed customer data from web analytics platforms to identify usage patterns and behavior trends, resulting in actionable insights that drove a 25% increase in user engagement through targeted digital marketing. - Led end-to-end data preparation, including data cleaning, transformation, and integration using SQL and Python, ensuring data accuracy and integrity across multiple internal and external sources, with a 98% data accuracy rate. - Designed and developed interactive, user-friendly data visualizations in Power BI and Tableau, providing stakeholders with clear insights into business performance, and enabling data-driven decisions that improved operational workflows. - Conducted A/B testing and applied statistical analysis, such as ANOVA and regression modeling, on marketing campaigns, helping optimize strategies and improve conversion rates by 18%, directly increasing revenue. - Collaborated with cross-functional teams, including marketing, product, and operations, to define business requirements and translate them into actionable data insights, resulting in a 30% reduction in reporting timelines. - Assisted in the automation of reporting processes, reducing manual effort by 40% and ensuring timely delivery of critical business metrics, enhancing reporting efficiency. - Applied data modeling techniques, including clustering and segmentation, to analyze customer segments, driving a targeted approach for email marketing campaigns, which resulted in a 15% increase in customer retention. - Supported senior management with ad-hoc analysis and reports, providing deep insights into business performance, helping them refine strategic initiatives and improve operational efficiency.	
Data Analyst Associate, Hexaware Technologies India	Jan 2021 – Jul 2022
- Analyzed large datasets to uncover patterns and trends in customer behavior, providing strategic recommendations that improved product targeting and led to a 12% increase in customer retention. - Designed and implemented custom data models and automated reports using advanced Excel functions, including pivot tables, VLOOKUP, and macros, which streamlined reporting processes and improved efficiency. - Created and maintained Power BI dashboards to visualize key business metrics, helping department heads track project progress and assess team performance, resulting in a 10% improvement in productivity. - Performed ETL (Extract, Transform, Load) processes using AWS Glue, automating the data extraction, transformation, and loading of large datasets, which reduced data processing time by 25% and enhanced data accessibility. - Collaborated with cross-functional teams to define KPIs and develop reporting systems, enabling more accurate tracking of project milestones and ensuring alignment with business goals, contributing to a 15% increase in team performance. - Conducted regression analysis to assess the impact of customer interactions on overall satisfaction, identifying key drivers of positive customer feedback that resulted in a 7% increase in customer satisfaction scores. - Conducted periodic audits of internal databases to ensure data accuracy and consistency, leading to a reduction in reporting errors by 20% and improving trust in data-driven decisions. - Delivered business intelligence solutions to stakeholders by extracting actionable insights from complex datasets, resulting in more data-driven decision-making across departments. - Supported senior analysts in forecasting and trend analysis, providing insights that informed product development and marketing strategies, which contributed to a 5% increase in product adoption.	

EDUCATION & CERTIFICATE

MS in Business Analytics University of Houston	May 2025
BS in Computer Science Bennett University	May 2023
AWS Certified Solutions Architect - Associate (SAA-C02)
