Experienced Data Analyst with 3 years of experience in the banking domain, leveraging strong analytical and technical skills to transform complex data into actionable business insights. Proficient in SQL, PL/SQL, Python, and DB2, with expertise in data extraction, transformation, and analysis. Experienced in creating interactive dashboards and visualizations using Power BI and Tableau to support strategic decision-making. Skilled in statistical analysis, data cleaning, and automating reporting processes to improve data accuracy and efficiency. Proven ability to collaborate with cross-functional teams in agile environments to deliver impactful, data-driven solutions that optimize business performance.

Professional Experience

Data Analyst

Attrra Infotech Pvt. Ltd., Pune, India

Client: **State Bank of India**

May 2019 – July 2022

- Designed and maintained Excel dashboards to monitor sales and inventory metrics, reducing reporting errors by 50% and improving data reliability, while utilizing Python for data cleaning and automation tasks to ensure consistent and accurate data.
- Developed and optimized SQL queries to support performance analysis and monthly reporting, integrating Python scripts for enhanced data processing and to automate repetitive tasks, enabling more efficient business insights.
- Conducted trend and variance analysis on quarterly datasets using Python (Pandas, NumPy) to uncover patterns and provide actionable insights for proactive decision-making.
- Built interactive dashboards using Power BI and Tableau, integrating Python-based data transformations and visualizations, and collaborated with stakeholders to continuously enhance reporting systems. Managed project workflows through Jira to ensure timely delivery.
- Improved the efficiency of batch and online processes, using Python to automate data validation, testing, and reporting tasks. Documented technical processes to support ongoing maintenance and knowledge sharing across teams.

Projects

YouTube Data Analytics Pipeline (AWS Cloud)

May 2020 – June 2024

- Designed and implemented an automated YouTube data pipeline using AWS services for collecting, processing, and analyzing video metadata and user engagement metrics.
- Automated data ingestion with AWS Lambda and YouTube Data API, performed ETL using AWS Glue, and managed storage in Amazon S3.
- Queried and analyzed data with Amazon Redshift/Athena, visualized KPIs using Amazon QuickSight, and orchestrated workflows with AWS Step Functions while monitoring performance with CloudWatch.

End-to-End Data Pipeline for SQL Server Integration and Processing

January 2024 - February 2024

- Engineered a data pipeline to extract data from SQL Server, stored it in Azure Data Lake Gen2, orchestrated workflows with Azure
- Data Factory, transformed data with PySpark in Azure Databricks, and loaded results into Azure Synapse
- Optimized large-scale data processing by leveraging Azure Data Factory's built-in monitoring and alerting features, reducing pipeline downtime by 40% and improving overall operational efficiency

Olympic History by Numbers (Data Visualization - Tableau)

October 2023 - November 2023

- Created an interactive Tableau dashboard for Olympic history, enhancing data accessibility and user engagement by 25%.
- Developed interactive charts to analyze gender dynamics, global medal distribution, and sport-specific gold counts, lowering data comprehension time by 50% which enable stakeholders to make informed decisions more rapidly

Pet Bingo Game – Software Engineering Project

Jan 2023 - April 2023

- Designed and implemented a CI/CD pipeline using Azure Pipeline for automated game feature deployment, followed Agile methodologies, and managed project workflows with Azure DevOps.
- Developed interactive dashboards using Power BI and Tableau for data visualization, ensured code versioning with GitHub, and created test cases in Azure DevOps for software reliability.

Education

California State University.

M.S in computer science and engineering; GPA: 3.5/4.0

San Bernardino, CA

Aug 2022 – May 2024

Sathyabama Institute of Science and Technology

Bachelor's in computer science and engineering; GPA: 8.5/10.0

Tamil Nadu, India

July 2015 - May 2019

Skills & Interests

C, C++, PL/SQL, SQL, Java, Python, COBOL, CICS, DB2, HTML, CSS.

Tools and technologies: AWS (S3, Glue, Athena, Redshift, Kinesis, QuickSight, IAM, CloudWatch), Azure (Data Factory, Data Lake Gen2, Databricks, Synapse), Tableau, Power BI, Apache Kafka, Apache Spark, Sqoop, TSO/ISPF, Endeavor, Jira, Git .
