PROFESSIONAL SUMMARY

Data professional with 4 years of progressive experience turning data into real business impact across analytics, data science, and leadership roles. Began as a Data Analyst at VI Solutions, where you built dashboards, automated reporting pipelines, and delivered insights that improved operational decision-making. Advanced into senior and lead data science roles at Novartis, developing predictive models, scalable ML pipelines, and analytical solutions that shaped commercial and patient-focused strategies. Currently a Sr. Data Scientist at Garmin, creating machine learning models and data pipelines that power personalized health and fitness experiences. Recognized for blending technical depth with clear business understanding, and for consistently transforming complex data into meaningful, high-value outcomes.

PROFESSIONAL EXPERIENCE

Sr. Data Scientist, Garmin, Kansas, United States | Oct 2024 – Present

- Designed and deployed **machine learning models** that enhance activity tracking, health monitoring, and user personalization across Garmin's wearable ecosystem.
- Built scalable **end-to-end data pipelines** using Python, SQL, and cloud platforms to process large volumes of sensor, GPS, and biometric data with high accuracy and reliability.
- Collaborated with product, engineering, and research teams to translate device-level insights into actionable features that improve user experience, predictive analytics, and device performance.
- Led model experimentation, feature development, and performance optimization efforts, ensuring models meet production standards for speed, efficiency, and real-world variability.

Academic Projects, UCM | Sep 2023 – May 2024

- Engineered a Python/Django application on AWS with VPC architecture, Route53 & Elastic Load Balancer, utilizing Elastic Beanstalk for scalable deployment and RDS MySQL for data storage.
- Created a full-stack E-commerce platform using Flask and React.js with MongoDB integration, featuring JWT authentication and REST API communication for secure data exchanges.

Lead Data Scientist, Novartis, Hyderabad, India | Jun 2022 – Jul 2023

Lead Data Scientist (Feb 2023-Jul 2023)

- Spearheaded high-visibility data science initiatives, transforming fragmented commercial and patient-level data into predictive intelligence that shaped product strategy and market planning.
- Designed and delivered **enterprise-grade ML models** including patient adherence prediction, demand forecasting, and segmentation—driving more accurate, data-backed business decisions.
- Built scalable, reusable ML workflows and automated pipelines, cutting model development and deployment cycles from weeks to days.
- Partnered directly with senior business leaders to define analytics strategy, translate ambiguous challenges into ML-driven solutions, and deliver insights that influenced brand performance and resource allocation.
- Led advanced feature engineering and model validation processes, ensuring fairness, explainability, and scientific rigor in all analytical outputs.

- Collaborated closely with data engineering teams to enhance data pipelines, improve data reliability, and ensure smooth end-to-end integration of ML assets into production environments.

Sr. Data Analyst (Jun 2022-Jan 2023)

- Supported commercial and medical teams by transforming complex healthcare data into clear insights that guided product performance, market strategy, and patient engagement decisions.
- Created intuitive dashboards that provided real-time visibility into sales trends, therapy adoption, and regional performance across Novartis brands.
- Streamlined reporting by automating data workflows, enabling faster, more reliable access to business-critical metrics.
- Analyzed multi-source datasets to uncover behavioral patterns, identify gaps in therapy adoption, and highlight opportunities for commercial growth.
- Worked closely with cross-functional teams to translate business questions into analytical solutions and communicate findings in a clear, impactful way.

VI Solutions, Bengaluru, Karnataka India | Jun 2020 – May 2022

Data Analyst (Jan 2021-May 2022)

- Delivered **data-driven insights** that supported strategic decisions across product, operations, and leadership teams, directly contributing to performance improvements.
- Built **interactive, user-friendly dashboards** (Power BI/Tableau) that streamlined monitoring of KPIs, enabling non-technical teams to access insights instantly.
- Designed automated ETL processes and reporting pipelines, cutting manual reporting time by **40–60%** and improving data accuracy.
- Performed deep-dive analysis to uncover root causes of operational bottlenecks, resulting in measurable efficiency enhancements.
- Partnered with cross-functional teams to translate business needs into analytical solutions and provide actionable recommendations.
- Developed analytical documentation, query logic, and dashboard structures, improving long-term maintainability and team onboarding.

Data Analyst Intern (Jun 2020-Dec 2020)

- Accelerated decision-making by preparing clean, analysis-ready datasets from messy raw sources, improving data quality and reducing manual cleanup time.
- Identified early trends through exploratory analysis, helping senior analysts validate hypotheses for product improvements.
- Developed simple yet effective dashboards that improved visibility of daily KPIs and reduced manual reporting efforts.
- Automated recurring data-cleaning tasks using Python scripts, increasing efficiency and reducing errors in weekly reporting.
- Gained hands-on experience with SQL, Excel, and Python while supporting real business use cases under senior analyst guidance.

CERTIFICATIONS

- AWS Cloud Practitioner, AWS Solution Architect Associate
- Hacker Rank Programming (Python, Java, SQL)

- CLA - Programming Essentials in C, PCAP - Programming Essentials in Python
- Kubernetes, Prometheus, Linux.

ACHIEVEMENTS

- Star of the Quarter & On the Spot Award (2 Times) at Novartis.
- Shout-out & Employee Recognition at VI Solutions.

EDUCATION

- University of Central Missouri - 4/4 | Aug 2023 - May 2024
- Mahatma Gandhi Institute of Technology - 3.66/4 | Aug 2019 – Jul 2023
