Summary

4+ years of experience as a Data Analyst with expertise in designing and developing robust and scalable data pipelines. Proven experience in leveraging technologies such as Python, SQL, Spark, Kafka, AWS, Azure, Kubernetes, Azure Data Platform, Databricks, PySpark, Airflow, Jenkins, Power BI, Tableau, and load data from various sources into data warehouses and data lakes. Expertise in Azure Data Factory, Azure Databricks, Azure EventHub, Azure Functions, and Stream Analytics, implementing real-time & batch data pipelines. Hands-on experience with DevOps (Azure DevOps, Terraform, CI/CD, Jenkins, GitHub Actions) and cloud infrastructure automation.

Professional Experience

Cardinal Health, Dublin, OH

Nov 2023 – Till Date

Data Analyst

- Developed scalable ETL pipelines using PySpark in Azure Databricks to process Data of structured and semi-structured data daily from Azure Data Lake.
- Designed and implemented data ingestion workflows in Scala on Databricks, integrating data from multiple sources like SQL Server, Blob Storage, and REST APIs.
- Optimized Spark transformations and actions in PySpark for performance tuning and cost efficiency on Azure Databricks clusters.
- Created and maintained Delta Lake tables for handling slowly changing dimensions and incremental loads using Spark Structured Streaming.
- Built and deployed CI/CD pipelines using Azure DevOps for automated build, test, and release of Databricks notebooks and jobs.
- Performed advanced SQL-based data transformations and aggregations within Databricks for reporting and downstream analytics.
- Automated data quality checks and validation rules using PySpark and integrated results into Power BI dashboards.
- Designed and scheduled complex ETL pipelines with Azure Data Factory calling Databricks notebooks using REST API triggers.
- Integrated Databricks with Git-based version control and implemented CI/CD gates for code promotion across environments.
- Created modular and reusable PySpark components for consistent ETL logic and seamless integration into DevOps pipelines.
- Collaborated with data architects and SMEs to build real-time event pipelines using Spark Streaming in Azure Databricks.
- Tuned large-scale ETL jobs in Azure Databricks by adjusting partitioning, caching, and join strategies to meet SLA requirements.

Wells Fargo, Hyderabad, India

Jul 2021 – Jul 2023

Data Analyst

- Integrated and processed web analytics data from Adobe Analytics, enabling customer behavior analysis and campaign performance tracking.
- Engineered big data solutions using Apache Spark, enabling parallel processing and high-speed data computations for large datasets.
- Developed automated data pipelines using Azure Data Factory (ADF) to extract, transform, and load (ETL) large-scale datasets across multiple cloud environments.
- Utilized SQL and Excel to collect, organize, and analyze customer and sales data for weekly executive reports.
- Supported migration of legacy reports to Tableau, creating dynamic visual dashboards for business leaders.
- Assisted in developing predictive models for churn analysis using Python (scikit-learn).
- Conducted statistical data analysis using NumPy, extracting key trends and patterns to support business strategies.
- Applied scientific computing techniques with SciPy, performing hypothesis testing and statistical modeling.
- Designed containerized ETL workflows using Terraform, ensuring repeatable and scalable infrastructure deployments.
- Built continuous integration and deployment (CI/CD) pipelines in Azure DevOps, automating the deployment of analytics solutions.
- Utilized Apache Hadoop for distributed storage and batch processing of large-scale datasets.
- Managed NoSQL databases with Cosmos DB, enabling high-performance data storage for real-time applications.
- Created dashboards and reports in Power BI, providing stakeholders with self-service analytics capabilities.

Metamor Software Solutions, India

Jan 2020 – May 2021

Junior Data Analyst

- Extracted, transformed, and analyzed large datasets using SQL (Redshift, PostgreSQL), optimizing query and uncovering actionable business insights through EDA and enterprise data warehouse systems.
- Developed interactive dashboards in Power BI and Tableau to monitor supply chain KPIs, reducing operational inefficiencies and enhancing business intelligence reporting for leadership.
- Automated reporting pipelines with Python (Pandas, NumPy, Matplotlib), cutting manual processing efforts and improving accuracy across recurring workflows.
- Applied statistical techniques, including A/B testing and cohort analysis, to assess client performance data and enhance customer acquisition strategies aligned with business analytics goals.
- Leveraged AWS cloud services (S3, Redshift) for scalable data storage, processing, and integrity across high-volume datasets in production environments.
- Collaborated with cross-functional teams and stakeholders to deliver health care related insights, using Agile methodologies (Scrum, Jira) for iterative development.

Education

Webster University, San Antonio, Texas

Aug 2023 - Dec 2024

Master of Arts in Information Technology Management

GITAM University, Hyderabad, Telangana

June 2018 - Apr 2022

Bachelor of Technology in Computer Science

Technical Skills

- **Programming & Scripting:** Python (Pandas, NumPy, PySpark, Scikit-learn), SQL (T-SQL, PL/SQL), R, Scala

- **Data Engineering:** Apache Spark, Hadoop, Kafka, Flink, Airflow, dbt
- **Databases & Warehousing:** Azure Synapse, Google BigQuery, Amazon Redshift, Oracle, PostgreSQL, MySQL, MongoDB
- **ETL/ELT Tools:** Apache Spark, PySpark, Airflow, dbt, Azure Data Factory (ADF), Talend, SSIS, AWS Glue, Databricks
- **Data Visualization & BI:** Power BI, Tableau, Looker, Excel (Advanced), SSRS
- **Cloud Platforms:** Microsoft Azure (Data Factory, ADF, Synapse, Databricks, Logic Apps, Functions, Event-based Services), AWS (S3, Glue, Lambda, EMR, Redshift)
- **Version Control & DevOps:** Git, GitHub, GitLab, Azure DevOps, CI/CD pipelines, Docker, Kubernetes, Terraform, Jenkins
