

PavanMuddana

Chicago, Illinois | [518-618-7644](tel:518-618-7644) | muddanapavana0207@gmail.com

Education

Western Illinois University, Macomb, IL

December 2023

- Earned master's degree in information science/studies.
- Relevant Course Work:** Finance for Engineers, Project Management, Data Mining and Data Visualization, Advanced Database, Object-Oriented Programming in JAVA, Network Management, Data Science and Big Data, Cybersecurity, Statistics & Quantitative Methods, Information Studies Capstone.

Jawaharlal Nehru Technological University, India

April 2018

- Bachelor of Computer Science and Engineering.

Summary

I am Experienced and results-driven Software Developer with 5+ years of expertise in building scalable and secure enterprise solutions using .NET Core, C#, Angular, MySQL, and Azure Cloud. Proven success in supporting and developing core applications for global product-based clients such as Saipem, CTCI Advanced Systems, Air Products and Chemicals, Methanex Corporation, Airport Texas, Shell, and so on. Adept at end-to-end application development, cloud integration, and performance tuning in fast-paced, mission-critical environments.

Strong background in delivering cross-platform solutions, maintaining modular architecture, and enabling real-time collaboration across teams. Skilled in Agile methodologies, CI/CD, and DevOps culture, with a commitment to code quality, innovation, and continuous improvement. Passionate about solving complex business problems through clean, maintainable code and modern software practices.

Technical Skills

Languages	: C, C++, C#.Net, Python, VB 6.0, ASP
Technologies	: .NET Framework 1.1, 2.0, 3.5 and 4.0, ASP.NET, ADO.NET, ASP.NET MVC, WPF, WCF, WEB API, Window forms
Cloud Technologies	: API Gateway, Cloud Formation, Microsoft Azure
Web Technologies	: HTML, HTML5, CSS, XML, JavaScript, Bootstrap, jQuery, AJAX, SOAP, RESTful APIs service
Databases	: SQL Server, T-SQL, LINQ, LINQ to SQL, Entity Framework, PostgreSQL, MongoDB
Frameworks	: .NET MVC, NodeJS, Django, Angular
Tools	: Visual Studio Code, GitHub, Kubernetes, Jenkins, Docker
IDE	: Visual Studio enterprise 2008/2010/2022
Methodologies	: SDLC, Object Oriented Analysis and Design, Agile
Version Control Tools	: Git, JIRA, Azure
Operating Systems	: Linux, Ubuntu, Windows
Reporting Tools	: SSRS, SSIS, SSAS

Professional Experience

Software Developer | Hexagon asset lifecycle intelligence

Sep 2023 – Present

Roles and Responsibilities:

- Collaborated closely with **Business Analysts to understand business requirements and analyze** use cases.
- Actively participated in all phases of the **SDLC, including development and testing**. Monitored daily project activities to ensure deadlines were met as per client expectations.
- Responsible for front-end UI development using **HTML5, CSS, Typescript, PrimeNG, Angular 12 and RxJs**.
- Developed a web application using **Angular 19 a front-end and using web API to receive and as data to back end**.
- Developed the application using model driven approach by creating different module, components and by using the reusable code.
- Created **Angular 19 component, implemented interpolation, input variable, Bootstrapping, NgFor, Ngif, Router Outlet**, event binding and decorator.
- Created reusable **Custom pipe and Directives for filter and sorting for table columns for Custom table component which is used for CRUD Operation**.
- Implemented **Angular Router to enables** navigation from one view to the next
- Extensively used **Debugging Typescript using Chrome Developer Toolbar**.
- Developed custom controls and server-side components using **VB.NET** and collaborated with the client team to design and implement advanced technologies such as **WCF, SOA, and ASP.NET, with application logic in C#**.
- Involved in front-end development using **ASP.NET, AJAX, and C#**, and back-end development using **SQL Server 2019**.

- Designed and implemented **Micro Frontend (MFE) architectures**, enabling **scalable, modular**, and independently deployable frontend applications using frameworks like **Angular and Vue.js**. **Integrated solutions via Module Federation and Single-SPA**, which improved performance and maintainability.
- Developed complex web applications using **ASP.NET Web Forms, with AJAX, Master Pages, Themes, Web Parts, and MVC (Model-View-Controller) patterns**.
- Applied Object-Oriented Programming (**OOP**) concepts including **Polymorphism, Inheritance, and Abstraction in C#**.
- Used **C# Generics for creating reusable** collections and **developed reusable** assemblies.
- Designed and developed both static and dynamic web pages with robust **client-side and server-side** validation.
- Built responsive and rich user interfaces using **Kendo UI (Telerik) and Bootstrap** controls.
- Created dynamic ASPX pages using **ASP.NET, C#, XML, HTML5, JavaScript, AJAX, and jQuery**.
- Developed and deployed custom workflow forms using InfoPath and **custom workflows using the SharePoint Object Model and Microsoft Office integration**.
- Created SharePoint custom web parts using **Visual Studio 2022, ASP.NET, and C#,VB.NET** leveraging the **Webpart Pages object model**.
- Contributed to the migration of Windows applications to web-based applications. **Created proof-of-concepts (POCs) using HTML5 and ASP.NET 5 MVC**.
- Implemented MVC 4.0 architecture patterns for **ASP.NET applications to promote separation of concerns and testability**.
- Developed SOAP-based Web Services for communication between application layers using **HTTP/XML, WSDL, and .NET**.
- Developed data-driven ASP.NET Web Forms integrated with SQL Server as the backend.
- Created SSIS Packages for data extraction and transformation from **Excel, OLE DB, and MS Access to SQL** Server databases.
- Perform **SCADA** system implementation, integration, operation, support and maintenance including data analysis, troubleshooting, screen development, database updates, point to point checkout and documentation.
- Perform **SCADA** database development of field input/ output points, alarming and other database configuration required for control center pipelines operation.
- Practiced **Test-Driven Development (TDD)** and **conducted thorough unit testing, employing debugging and error tracing tools** to ensure application reliability.
- Experienced in cloud-native development and deployment, utilizing **Azure DevOps** for continuous integration and continuous delivery (CI/CD), and managing containerized applications with **Docker and Kubernetes** on Microsoft Azure cloud platform.
- Built rich internet applications using **Silverlight on .NET Framework 4.0**, enhancing the browser-based user experience.
- Actively involved in providing technical support and **production software operation through troubleshooting** to resolve the issue.
- Contributed to **Agile/Scrum ceremonies such as sprint planning, stand-ups, and retrospectives**, ensuring timely delivery of project milestones.
- I participated in **code reviews and peer programming to improve code quality** and share best practices.

Software Developer | Elonex InfoTech Pvt Ltd.

May 2018 –Jul 2021

Roles and Responsibilities:

- Strong programming experience and knowledge of using **C#, ADO.NET, ASP.NET, WCF, LINQ, Web API, IIS, SQL Server, ADO.NET Entity Framework, SSRS and Visual Studio**.
- Experience and good knowledge in all the phases of Software Development Life Cycle (**SDLC**). Development Methodologies such as Agile and Test-Driven Development (TDD). Experienced in developing and deploying web-based solutions on various architectures like n-Tier, Client/Server, **MVC (Model View Controller)** using Microsoft tools and technologies.
- Built dynamic web view applications using **ANGULAR JS, jQuery, JavaScript, HTML, CSS, JSON with ASP.NET Web Forms MVC 4.0/5.0**, Razor View Engine. Worked on Http get, posts call and pass data using Http Post in Angular JS.
- Code the application in **C#** using **ASP.NET** including textboxes, combo boxes, data grids, buttons, validation controls and image buttons. Worked on client side and server-side validations in ASP.NET.
- Implemented **CRUD** functionally with Entity Framework in **ASP.NETMVC** and implemented sorting, filtering, and paging with Entity Framework in MVC. Responsible for writing the Actions in the Controllers which implement the Business Rules, and which act as a mediator between UI (View) and Database (Model).
- Created layout views and incorporated them into the ASP.NET MVC application. Used View Bag/View Data to pass data from Controller into the view. Created models and used them on multiple views. Used Razor Engine Html helper methods for creating controls on the views.
- Created custom routes and added them to ASP.NET MVC routes collection. Used MVC Is Required, Max Length etc. attributes on the Model properties for validation purposes. Used jQuery/JavaScript for creating user rich UI's and used Razor engine for creating multiple views.
- Developed Microservices by implementing Mass Transit and RabbitMQ. Maintained the State management of the **Microservices** via SAGAS implemented using Mass Transit and RabbitMQ.
- Containerize components using Dockers and Kubernetes. Manage Azure CI/CD, deploy code base, release code.
- Extensive working experience in database design and development, for creating complex database queries, writing Indexes, Views,

Triggers, Functions and Stored Procedures using T-SQL and PL/SQL in **SQL Server**.

- Hands on experience in reports development using SQL Server Reporting Service (**SSRS**). Used **LINQ to SQL** and **LINQ to Objects** for retrieving the data efficiently.
- Involved in daily and weekly scrum meetings to discuss various aspects of the code related to individual modules. Used JIRA for requirements gathering and testing. Working on AZURE for sprint planning.
- Strong experience writing, preparation and execution of test cases and validating them by implementing Unit testing, as well as performing unit and regression testing for bug-fixing in the application as well as User Acceptance Testing to check if all Business Objectives and requirements are met.
- Hands-on experience with SCADA software such as Ignition for monitoring and control system Integration.
- Usage of **GIT** tool for checking the code and maintaining the repository offline as well on distributed level operating multiple repositories remotely. Experience of source code version control using **GitHub**.
- Well-motivated and rapidly acquire new skills on the job, assertive and a committed team player. Knowledgeable in strong work ethic, taking ownership of all duties and responsibilities
