

Pavan Teja Jukanti

Fairborn, OH 45324 | +1 937-369-8281 | pavantejajukanti@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Engineer with experience developing scalable applications across finance, consulting, and product-based domains. Proficient in Java, Spring Boot, React, Angular, and SQL, with expertise in building secure web applications and APIs. Skilled in Agile/Scrum, driving projects from requirements to deployment while boosting system performance. Collaborative team player with cloud and DevOps knowledge, delivering innovative, business-focused solutions.

PROFESSIONAL EXPERIENCE

Fidelity Investments | *Software Engineer*

Jan 2024 - May 2025

- Designed, developed, and deployed scalable backend services in Java and Spring Boot to support Fidelity's trading and portfolio management platforms, improving transaction efficiency by 20%.
- Collaborated with cross-functional teams to implement secure REST APIs that integrate with internal systems and third-party financial data providers.
- Enhanced the performance of existing applications by optimizing database queries in SQL and Oracle, reducing the response time for key services by 30%.
- Automated CI/CD pipelines using Jenkins, Git, and Docker, ensuring faster and more reliable releases.
- Partnered with product managers to gather requirements and deliver user-focused solutions aligned with Fidelity's client-first strategy.
- Contributed to Agile ceremonies (sprint planning, reviews, retrospectives) and used Jira for task tracking, ensuring the timely delivery of business-critical features.

Ikspida India Pvt Ltd | *Software Developer*

May 2022 - Jun 2023

- Collaborated with the Application Development team in an Agile/Scrum environment to improve software coordination and project communication. Enhanced systems and reporting tools as a full-stack developer, optimizing code for scalability and performance.
- Developed front-end components using React, Angular, JavaScript ES6, HTML5, and CSS3, contributing to efficient and responsive user interfaces.
- Engineered single-page applications integrated with RESTful APIs, which resulted in enhanced application performance and overall user experience.
- Coordinated with cross-functional teams to gather and analyze application requirements, ensuring accurate project specifications and timely deliverables.
- Assisted in the development and testing of RESTful APIs using Kotlin, contributing to the functional robustness of the applications.

Kenexcel Software Pvt Ltd | *Software Development and Programming Intern*

Apr 2021 - Dec 2021

- Contributed to the development of an educational web platform using Java, Python, and C++, supporting both front-end and back-end modules.
- Built and enhanced UI components using HTML, CSS, and JavaScript to improve user experience and platform responsiveness.
- Identified and resolved bugs across application layers, improving functionality and reducing load times through code optimization.
- Participated in Agile-based sprint cycles, including requirement analysis, system design, development, and peer code reviews.
- Authored technical documentation for implemented features, supporting future maintenance and onboarding of new developers.
- Utilized Git for version control and deployed builds to internal testing environments, ensuring smooth integration and testing processes.

KPMG India | *Full Stack Developer Intern*

Jan 2020 - Jun 2020

- Built a task management dashboard using React.js, Spring Boot, and MySQL to support efficient task creation and tracking.
- Conducted testing and debugging within an Agile environment to deliver reliable and high-performing features.

EDUCATION

Wright State University, Fairborn, OH | *Master of Science, Computer Science* (3.2 GPA)

May 2025

TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript, Kotlin, C, Perl, C++, C#, TypeScript
- Web Development:** React.js, Angular.js, HTML5, CSS3, JavaScript ES6+, Spring Boot, Spring MVC, Hibernate, RESTful APIs, Microservices, Node.js, Express.js, Responsive UI/UX Design, JSP
- Database Technologies:** PostgreSQL, Oracle SQL, MySQL, Database Design
- Methodologies:** Agile/Scrum, SDLC, Waterfall
- Frameworks:** Django, Flask, PyTorch
- DevOps & Version Control:** Git, GitHub, AWS, Docker, Jenkins, Maven, Linux, Apache Kafka, JUnit, Integration Testing
- Tools:** Power BI, Tableau, Excel, Jupyter Notebook, Visual Studio

PROFESSIONAL CERTIFICATIONS

- Introduction to Front-End Development:** Meta via Coursera (Verification: B3HCM1M5RV7K)
- Java Full Stack Developer:** Board Infinity via Coursera (Verification: X17IPJAZHJ6C)

PROFESSIONAL PROJECTS

Interactive Card Game Application

- Designed and developed a browser-based multiplayer card game using HTML, CSS, and JavaScript.
- Implemented dynamic UI components, card deck logic, and interactive gameplay features such as swapping, discarding, and special powers.
- Focused on creating an intuitive layout with smooth user interactions, optimized event handling, and responsive design for an engaging player experience.

Enterprise Procurement Management System

- Developed a university-wide procurement management system using Java Servlets, JSP, and Oracle SQL, enabling streamlined inventory and requisition workflows.
- Led full-cycle development from requirements gathering to testing and deployment, while maintaining technical documentation for long-term scalability.

Medical AI Detection System - Deep Learning Application

- Implemented a deep learning model using ResNet152v2 to detect early signs of Alzheimer's from MRI scans, improving prediction performance by 31%.
- Applied image preprocessing, augmentation, and validation techniques to enhance accuracy and robustness for medical diagnostic applications.
