Professional Summary

Adaptable IT professional with experience in software engineering, AI/ML, and backend development. Skilled at quickly learning new technologies and applying them across diverse domains, from enterprise software (SAP BW) to AI-driven solutions and secure payment systems. Known for building scalable projects, improving efficiency, and combining technical depth with problem-solving skills.

Skills

- Programming & Frameworks: Java, Python, React.js, Spring Boot, SQL
- AI/ML & Data Science: Machine Learning (Random Forest, LSTMs), NLP, Data Preprocessing
- Cloud & Tools: Power BI, Linux, Postman, Git
- Enterprise Systems: SAP BW
- Other Areas: Cybersecurity fundamentals, E-commerce Payment Integration

Experience

Associate Software Engineer

Gyansys Infotech, Bangalore (Nov 2021 – Jan 2023)

- Developed and deployed a resume parser and internal launchpad platform, improving operational efficiency by 35%.
- Integrated enterprise business workflows with SAP BW, streamlining large-scale data pipelines for reporting and analytics.
- Collaborated with cross-functional teams to deliver secure, production-ready solutions.

Projects

E-Commerce Payment Simulation

- Designed a secure backend in Java+Spring Boot with PostgreSQL for transaction storage.
- Built REST APIs for payment requests, validated flows via Postman, and integrated mock gateways (Stripe-like).
- Simulated PCI-compliant workflows; system successfully processed test transactions end-to-end.

AI Chatbots for Customer Support

- Built chatbots in Python with NLP-based intent recognition and PostgreSQL storage.
- Exposed APIs to integrate the chatbot into web apps.
- Automated FAQs and customer data collection, reducing manual workload significantly.

Weather Prediction Model

- Preprocessed historical weather datasets and applied Random Forest & Logistic Regression.
- Achieved ~85% accuracy on test data.
- Delivered a Python tool for real-world forecasting use cases.

Stock Market Prediction

- Collected and engineered features from financial APIs.
- Trained Logistic Regression, Random Forest, and LSTM models for time-series forecasting.
- Achieved ~78% accuracy with Random Forest; built automated pipelines for live predictions.

Education

Long Island University, Brooklyn, NY

M.Sc. Computer Science (Jan 2021 – May 2025)
