

Peter Wainwright

California | (310) 923-8335 | peter@peterwainwright.info | [LinkedIn](#) | [GitHub](#)

Summary

Software Engineer with robust Python expertise and solid experience in API, database, and front-end development. Proven track record collaborating with cross-functional teams to design and implement solution architectures and prototypes. Committed to quality code through DevOps methodologies, including pull requests, code reviews, automated testing, and continuous deployment. Adept at translating technical requirements into effective, customer-focused solutions.

Skills

- **Languages:** C#, Python, Java, C++, C, Javascript, HTML, CSS, SQL, MIPS
- **Frameworks & APIs:** .NET, Scikit-learn, NumPy, ThreeJS, React, RestAPI, ExpressJS
- **Programs:** Unity, Unreal Engine, GitHub, Perforce, MySQL, PuTTY, Vim, Docker, QtSpim
- **Development Practices:** Software Testing, Agile Software Development

Experience

HealingHand Tech

Oct 2024 - Present

Game Developer

- Authored advanced code-related prompts across multiple languages, showcasing versatility in coding practices.
- Reviewed and refined AI responses to enhance proper coding techniques and ensure quality output.
- Evaluated and rated diverse responses to support continuous improvement in AI coding conversations.

DataAnnotation

Jan 2024 - Present

AI Trainer

- Developed advanced code-related prompts in various programming languages to guide effective AI training.
- Assessed and edited AI responses to promote optimal coding practices and technical accuracy.
- Reviewed and rated responses to facilitate nuanced understanding and enriched coding dialogues.

Vizmoo

Sep 2020 - Mar 2021

Software Engineer

- Engineered a cross-platform VR solution in C# for release on multiple platforms while adhering to quality coding standards.
- Optimized back-end systems by integrating streamlined processes, aligning with modern DevOps methodologies.
- Coordinated play tests and incorporated critical player feedback to refine system functionality.

DVNC Tech

Sep 2019 - Mar 2020

Software Development Engineer

Collaborated with product managers, developers, and artists to introduce new features and systems for MonoChrome RPG using Unity Engine.

- Conducted prototype development for player ability systems and game mechanics, demonstrating iterative design and testing.
- Developed production-ready iterations of core systems, including player movement and collision handling, ensuring robust performance.

MindEscape

Sep 2021 - Present

Game Master

- Managed game rooms by monitoring interactions, ensuring a consistently enjoyable experience for customers.
- Fostered relationships and community engagement by facilitating creative and collaborative game environments.
- Designed innovative training and collaboration programs to expedite the onboarding process and deepen puzzle-solving skills.

UPenn FRES

Sep 2018 - Mar 2019

Lean Processor

- Analyzed and processed overtime reports, ensuring zero unauthorized payments with meticulous attention to detail.
- Filed and reported over \$10,000 in charitable donations processed by FRES, maintaining transparency and accountability.
- Facilitated recruitment and evaluation for over 100 candidates by developing a unique assessment rubric to quantify their capabilities.

Drexel University, B.S. Computer Science, June 2023 | Game Development Concentration

Drexel University

Jun 2023

B.S., Computer Science

- **Achievements:** 2022-2023 Senior Project Showcase Winner, 1st Place Overall & Gaming, Drexel University Founder's Scholarship

Projects

Recursion Error

Jul 2022 - Jun 2023

Cyberduck Collective

- Developed enemy AI framework, implementing a custom behavior state machine and Unity Nav-Mesh integration.
- Developed the boiler-plate character movement system that serves as the foundation of the character controller codebase.
- Responsible for in-engine integration of assets from the art team and shader team.

Horde

Sep 2022 - Mar 2023

Group 1 Games

- Developed enemy and ally unit pathfinding systems and behavioral systems.
- Prototyped and researched various navigation tools / systems for rapid iteration and testing.
- Managed source control throughout development cycle using Perforce.

Awards and Honors

- : 2022-2023 Senior Project Showcase Winner, 1st Place Overall & Gaming > View >
- : Drexel University Founder's Scholarship

Extracurricular

Drexel University

2017 - 2023

Drexel Game Development Group

Drexel Squash Team

2020 - 2023
