## Professional Summary

---

- Innovative **Full-Stack Software Engineer** with **3+ years** of experience designing and deploying **scalable, cloud-native applications** across **AWS, Azure, and GCP**.
- Proficient in building robust systems using **React.js, Node.js, Django, and Spring Boot**, with a strong foundation in **Python, JavaScript, and SQL**.
- Skilled in integrating **RESTful APIs**, containerizing applications with **Docker**, and automating deployments using **CI/CD pipelines** to accelerate **development cycles** by up to **30%**.
- Experienced in developing **AI-enabled features**, implementing **ML workflows** with **PyTorch** and **Scikit-learn**, and **optimizing model performance** for real-time analytics.
- Committed to delivering **resilient, user-centric solutions** that enhance **UX**, reduce operational overhead, and support intelligent decision-making across diverse domains.

## Technical Skills

---

- **Languages** - Python (Pandas, PyTorch, NumPy, Sci-kit learn, etc.), Java, C/C++ , HTML, CSS, Javascript, SQL
- **Front-end Development** - HTML5, CSS3, SASS, React.js, Angular, Bootstrap
- **Back-end Development** - Node.js, Express.js, NestJS, Django, Flask, Spring Boot
- **Databases** - PostgreSQL, MySQL, SQLite, MongoDB, Firebase, DynamoDB
- **APIs & Web Services** - RESTful APIs, WebSockets, Socket.io
- **MLOps Tools** - MLflow, DVC, Kubeflow, Airflow
- **Cloud Platforms** - Azure, AWS, Google Cloud Platform (App Services, Functions, Key Vault, Databricks)
- **CI/CD & DevOps** - Github Actions, GitLab CI/CD, Azure DevOps, Docker, Kubernetes, Helm
- **SDLC Process** - Agile, Sprint Planning, Code Review, Branching Strategy, Issue Tracking
- **Monitoring & Security** - Application Insights, Prometheus, SonarQube, OAuth2, JWT

## Experience

---

**Full Stack Developer - AI + Cloud Integration**, *Medintu Health Solutions* Jun. 2024 - Current

- Designed and deployed a **React-based symptom-checker** interface that collects user responses on health conditions and dynamically guides them to appropriate care recommendations using **Django APIs** and **conditional logic workflows**.
- Designed and deployed **real-time React-based dashboards**, visualizing **key performance indicators (KPIs)** for chat systems, improving support team responsiveness by **20%**.
- Authored **reusable Python modules** to support dynamic input parsing and real-time transformations, accelerating backend processing by **35%**.
- Engineered and deployed **15+ RESTful APIs** and serverless functions using **Django** and **Node.js** to support chat analytics and customer service platforms used by **10K+ users/month**.
- Reduced feature delivery timelines by **30%** through **modularized workflows** and **reusable GitHub Actions** templates for code linting, testing, and deployment.
- Containerized **microservices** and deployed them on **Azure Kubernetes Service (AKS)**, improving scalability and reducing manual scaling overhead by **40%**.

**Software Engineer**, *ATN Global Networks* May 2021 - May 2023

- Developed and maintained **10+ web features** using **React.js (frontend)** and **Node.js and Django (backend)**, supporting **5K+ monthly active users** and enabling **15% faster UI load times**.
- Built and deployed **Python-based REST APIs** powering **ML-driven personalization engines**, increasing user engagement by **25%** and automating **60%** of analytics workflows.

- Automated **CI/CD pipelines** using **GitHub Actions** and **Azure DevOps**, reducing manual deployment time by **70%** and cutting release errors by **40%**.
- Monitored system health across **5 services** using **Prometheus** and **Azure Application Insights**, improving system uptime to **99.95%** and reducing issue triage time by **50%**.
- Enforced **secure API architecture** with **Azure Key Vault** and private endpoints, mitigating unauthorized access risks and enhancing compliance by **100%** with internal security policies.

## Education

|                                                                                                               |                      |
