Career Objective

I am a recent graduate with a master's degree in business analytics and a strong foundation in project planning, data analysis, and team collaboration. I am eager to launch a career in project management where I can leverage analytical thinking, communication skills, and a keen interest in delivering successful business solutions.

Education

Northwood University, Midland, Michigan [Aug-2024-July-2025]

Master of Science in Business Analytics

Capstone Project — MSBA Program

Northwood University | July–Aug 2025

Enhancing Urban Business Visibility & Safety through Tactical Urbanism – Ashman Circle, Midland MI

- Led community-focused analysis of a car-oriented commercial district to improve pedestrian safety, business visibility, and access to shared rear parking.
- Collected and transcribed survey & interview input from 10 key stakeholders (businesses, residents, city staff); converted qualitative feedback into analyzable dataset.
- Analyzed text responses to surface high-priority concerns (parking, signage, unsafe crossings) and quantify negative safety sentiment baseline.
- Built data-driven prioritization (Impact-vs-Effort) that advanced low-cost “quick win” pilots ahead of high-capital redesign items.
- Produced tactical pilot plan: temporary wayfinding to rear parking, high-visibility crosswalk repaints, movable planter traffic-calming, and QR code live feedback loop.
- Established outcome targets ($\geq 30\%$ reduction in safety complaints; increased rear-lot use; growth in observed foot traffic) and 12-month evaluation timeline coordinated with city partners.)

CORE SKILLS & TOOLS:

- **Data & Analytics:** Python, SQL, Advanced Excel
- **Visualization & BI:** Tableau, Power BI
- **Machine Learning Skills**
- **Supervised Learning:** Regression (Linear, Ridge), Classification (Logistic Regression, Decision Trees, Random Forest, XGBoost)
- **Unsupervised Learning:** Clustering (K-Means, Hierarchical), Dimensionality Reduction (PCA)
- **NLP & Text Processing:** Tokenization, stop-word Removal, TF-IDF, Sentiment Analysis, Hugging Face Transformers
- **Model Evaluation & Tuning:** Train/Test Split, Cross-Validation, Grid Search CV, Randomized SearchCV, Metrics (Accuracy, Precision, Recall, F1-Score, ROC-AUC, MAE, RMSE, R^2)
- **Feature Engineering & Preprocessing:** One-Hot & Label Encoding, Scaling (Standard Scaler, Min Max), Handling Missing Data, Feature Importance
- **Tools & Libraries:** Python, pandas, NumPy, scikit-learn, XGBoost, Matplotlib, Seaborn, NLTK
- **Workflow & Deployment:** ML flow, Git/GitHub, Model Serialization, Basic API Deployment
- **Project & BA Methods:** JIRA, Microsoft Planner
- **Business & People:** Stakeholder engagement, requirements gathering, urban placemaking analytics.

Mumbai University, Mumbai, Maharashtra [2013-2017]

Bachelor of Commerce, Management, Accounting, Business Operations

Diamond Pipe Supports Pvt. Ltd. [2018-2023]***Experience***

- Supported the Export Manager in planning and coordinating international logistics operations to ensure timely and cost-effective shipment of goods.
- Prepared and verified all necessary export documentation, including commercial invoices, packing list, and certificates of origin.
- Tracked international shipments and provided regular updates to clients and internal stakeholders on delivery timelines and status.
- Maintained accurate records of all export activities in logistics management systems and databases.
- Coordinated with warehouse and inventory teams to ensure accurate order fulfillment and timely dispatch.

Musafir.com [2014 – 2017]***Experience***
