

POOJA NIVRUTTI VERULKAR

929-570-1183 | poojaverulkar@gmail.com

EDUCATION

The University of Chicago MS in Computational Analysis and Public Policy Coursework: Machine Learning, Cloud Computing, Databases	Chicago, IL June 2025
University of Exeter MSc Policy Analytics Coursework: Data Visualization, Text as Data, Social Network Analysis Dissertation: News-based Economic Indicator deploying Natural Language Processing	United Kingdom September 2020
University of Pune, Vishwakarma Institute of Technology B.Tech Electronics and Telecommunication Engineering Coursework - Calculus, Linear Algebra, Data Structures and Algorithms	India June 2015

SKILLS

Python (including pandas, numpy, scikit-learn, flask, PyTorch, Tensorflow), AWS (EC2, S3, DynamoDB, Lambda, Step functions, SNS, SQS), SQL, HTML, CSS, JavaScript, Figma, R, Power BI (including DAX, Power Query), Tableau

RELEVANT EXPERIENCE

World Bank Group <i>Research Analyst</i> - Delivered data analytics support to the strategy and operations team through monthly reporting, enabling tracking of resource utilization and informed decision-making. - Automated monthly report generation process reducing update time by 80%. Migrated reporting infrastructure to Power BI. - Designed and implemented data models to optimize allocation, utilization, and demand forecasting of World Bank resources in refugee-hosting, fragile, and conflict-affected regions, ensuring full utilization of yearly allocated resources.	Chennai, India January 2021 - January 2023
Pratham Educational Foundation <i>Data Scientist</i> Developed an application for automated reading-level assessment of primary school children by custom-training open-source speech recognition systems using Pratham's multilingual audio datasets.	Delhi, India September 2020 - December 2020
SocialCops <i>Data Analyst</i> - Built data intelligence solution to automate data-driven village development planning, enabling local governments to improve targeting for social protection programs through beneficiary mapping. - Improved adoption of the data intelligence products by training government officials.	Delhi, India May 2017 - February 2018
Mu Sigma <i>Trainee Decision Scientist</i> - Led several business intelligence projects involving understanding the business context and stakeholders' requirements, designing backend data infrastructure in SQL Server Analysis Services (SSAS), and developing visually impactful dashboards leveraging Power BI for tracking KPIs. - Delivered monthly reports to businesses by deriving insights from dashboards. Then automated this system. - Monitored performance of the customer support team.	Bangalore, India September 2015 - April 2017

OTHER EXPERIENCE

The India Nutrition Initiative, Tata Trusts <i>National Nutrition Mission Fellow</i> Partnered with the local government on strategy and implementation of the National Nutrition Mission and improved nutrition outcomes in infants and mothers.	Chandrapur, India July 2018 - July 2019
J-PAL South Asia <i>Research Consultant</i> Ran behavioral psychology experiments designed to reveal participant's economic preferences through surveying and debriefing over 100 participants.	Goa, India April 2018 - July 2018

PROJECTS

Genomics Analysis Service End-to-end data pipeline of a cloud-based (AWS) app for genomics analysis in Python.
Travel Itinerary Planner A web app for generating travel itineraries with a shortest-path algorithm for finding optimal routes, in Python.
Instant Messaging App A Slack-clone using pure HTML, CSS, and Javascript.
Travel budget planning app UI design for a travel planning app for users traveling under a budget, developed using Figma.
