PROFESSIONAL SUMMARY

Business Analyst with 4 years of experience across IT services and food manufacturing, delivering data-driven insights to improve operations, supply chain efficiency, and decision-making. Proven expertise in requirements gathering, KPI design, process optimization, and analytics using Power BI, SQL, Excel, and Python. Experienced in translating operational and financial data into actionable recommendations that reduce costs, improve cycle times, and enhance business performance. Currently pursuing an MBA in Business Analytics in the USA.

WORK EXPERIENCE

Business Analyst

Sri Sai Raghavendra Industries

Hyderabad, India

Jan 2023 – Nov 2024

- Analyzed production, procurement, and inventory data to identify inefficiencies and support operations decisions.
- Designed and monitored operational and financial KPIs, improving reporting transparency and management visibility.
- Built demand forecasting models to reduce material shortages and overstock scenarios, stabilizing production planning.
- Partnered with procurement teams to optimize order cycles and vendor planning, contributing to material cost reduction.
- Developed Power BI dashboards tracking production output, costs, wastage, and efficiency metrics for leadership review.

Business Analyst

Tata Consultancy Services (TCS)

Hyderabad, India

Aug 2021 – Dec 2022

- Gathered and documented business requirements (BRDs, FRDs, user stories) for BFSI digital modernization initiatives, including loan processing, KYC automation, and compliance reporting.
- Analyzed operational and financial datasets using SQL and Excel, reducing cycle time by 17% through process redesign.
- Designed Power BI dashboards to track SLA adherence, turnaround time, fraud alerts, and customer drop-offs, cutting manual reporting by 45%.
- Supported Azure cloud migration by mapping data flows, validating migrated datasets, and ensuring business continuity.

PROJECTS

Operational Resiliency & Supply Chain Risk Analysis – Nissan Motor Co.

- Analyzed supply chain disruptions using Python-based modeling and scenario simulations, identifying bottlenecks and risk exposure reductions of up to 22%.
- Proposed mitigation strategies (multi-sourcing, inventory buffers, capacity reallocation) reducing projected downtime by 18–25%.

Enterprise Analytics Project Proposal – INFORMS CAP Framework

- Designed an end-to-end enterprise analytics solution using SQL, Python, and Power BI, improving projected reporting accuracy by 40% and cycle-time efficiency by 20%.
- Delivered an executive-level presentation with KPIs, ROI analysis, and deployment roadmap aligned to business objectives.

Quantitative & Financial Decision Analysis

- Built forecasting, regression, and optimization models in Python and Excel to support multi-scenario business decisions, improving prediction accuracy by up to 35%.

EDUCATION

Indiana Institute Of Technology

MBA, Business Analytics

Fort Wayne, IN

TECHNOLOGIES

Business Analysis: Requirements Gathering, KPI Tracking, Process Mapping, Root Cause Analysis, Cost Optimization, Forecasting

Operations & Supply Chain: Inventory Planning, Procurement Analysis, Production Efficiency, Vendor & Quality Management

Analytics & Tools: Power BI, SQL, Excel (Advanced), Python (Pandas), Statistical Analysis, Data Visualization

Systems & Methods: ERP Systems, Workflow Automation, Reporting & Documentation, Stakeholder Communication
