

AMMISSETTI POOJITHA

Data Analyst

Location: Marietta, GA | Mail: ammisettipoojitha7@gmail.com | Ph: +1 6789356441 | [LinkedIn](#)

PROFESSIONAL SUMMARY:

Results-driven Data Analyst with over 3 years of experience in banking and healthcare domains, specializing in data engineering, predictive modeling, and business intelligence. Proficient in designing ETL pipelines using Apache Spark, Talend, and SQL to streamline large-scale data processing. Adept at developing interactive dashboards in Power BI and Tableau to enable data-driven decision-making. Skilled in machine learning techniques using Scikit-learn, XGBoost, ARIMA, and Prophet for forecasting and risk analysis. Experienced in cloud platforms like AWS and GCP with strong knowledge of compliance standards including HIPAA, GDPR, and Basel III. Proven ability to automate workflows, enhance reporting efficiency, and support strategic initiatives.

TECHNICAL SKILLS:

Programming Languages:	Python, SQL, VBA, R
Data Processing & ETL:	Apache Spark (PySpark), Apache Airflow, Talend, SQL Server, Snowflake, Amazon Redshift, Google BigQuery, Stitch
Data Visualization:	Tableau, Power BI, Excel (Power Pivot, Power Query), Looker, Google Data Studio
Machine Learning & AI:	Scikit-learn, TensorFlow, Keras, XGBoost, PyCaret, Isolation Forest, ARIMA, Prophet, LightGBM, CatBoost
Big Data & Cloud:	Azure Synapse Analytics, AWS (Amazon Redshift), Google Cloud Platform (GCP), Azure Data Lake
Healthcare Data Standards:	FHIR, HL7, EHR, EMR (Epic, Cerner)
Compliance & Regulations:	HIPAA, GDPR, AML, KYC, Basel III, IFRS 9, HITECH Act, FDA 21 CFR Part 11
Data Analysis & Statistics:	SAS, EDA, Root Cause Analysis, A/B Testing, Cohort Analysis
Automation & Scripting:	Excel VBA, SQL Automation, Zapier, Google Apps Script
Version Control:	Git, GitHub, GitLab
Operating Systems:	Windows, Linux, Mac iOS
Other Skills:	Jupyter Notebook, Data Wrangling, Regression Analysis, Data Modeling, Data Cleaning, Data Transformation, CLTV Modeling, Recommendation Systems, Healthcare & Financial Analytics

PROFESSIONAL EXPERIENCE:

State Street – GA, USA | Data Analyst | August 2024 – Present

- Designed and deployed automated ETL pipelines using Apache Spark (PySpark) and Talend, enabling seamless data ingestion from core banking systems.
- Analyzed loan portfolio performance and NPA trends using SQL and EDA techniques, delivering actionable insights for risk mitigation.
- Developed Power BI dashboards to visualize KPIs related to credit risk, churn, and financial performance, improving executive decision-making.
- Implemented XGBoost models for credit default prediction and optimized model performance using Scikit-learn evaluation metrics.
- Consolidated structured and unstructured financial data from Snowflake into AWS Redshift, enabling centralized and scalable reporting.
- Applied ARIMA and Prophet for time series forecasting of interest rates and loan delinquencies, aiding treasury planning.
- Ensured compliance with Basel III and IFRS 9 by integrating risk-weighted asset (RWA) analysis into monthly reports using Python.
- Automated recurring financial analysis tasks using Excel VBA and SQL scripting, reducing manual effort by 45%.
- Conducted A/B Testing and cohort analysis to assess customer behavior and optimize financial product strategies.
- Built customer lifetime value (CLTV) models and recommendation systems to support cross-sell and upsell initiatives.

Deloitte – India | Data Analyst | June 2021 – July 2023

- Designed and implemented automated ETL pipelines using Talend and SQL Server to consolidate patient records from EHR systems, improving data accuracy and processing time.
- Developed interactive Tableau dashboards to track patient outcomes, treatment adherence, and hospital readmission rates for healthcare providers.
- Applied Scikit-learn and XGBoost models to predict patient readmissions and chronic disease risks, enhancing preventive care efforts.
- Leveraged Google Cloud Platform (GCP) and BigQuery to manage and query large-scale health data securely and efficiently.
- Ensured compliance with HIPAA and GDPR by anonymizing sensitive patient data and implementing strict data governance controls.
- Built forecasting models using Prophet and ARIMA to predict patient volume and optimize staffing in critical departments.
- Created custom automation scripts using Excel VBA and SQL to streamline reporting workflows and reduce manual data handling.
- Documented data processes using GitHub for version control and collaborative development with cross-functional analytics teams.
- Executed data wrangling and data cleaning operations using R and Jupyter Notebook to prepare datasets for predictive analytics.
- Monitored and validated data pipelines using Google Data Studio and GCP logs, ensuring data integrity and system performance.

EDUCATION:

Master's in Information Technology - Kennesaw State University, 480 Bartow Ave NW, Suite 5625, MD 4804, Kennesaw, GA 30144

Bachelors in Computer Science and Engineering- Vignan's Foundation for Science, Technology & Research, Vadlamudi, Andhra Pradesh 522213 ,India

CERTIFICATIONS:

- Certified by NPTEL(Programming in C++)
- Certified by NPTEL(Introduction to Internet of Things)
