EDUCATION

University of North Carolina at Charlotte <i>Master's in Computer Science (Data Science)</i>	Charlotte, NC <i>Expected May 2026</i>
CMR College of Engineering & Technology <i>Bachelor's in Computer Science</i>	Hyderabad, India <i>May 2024</i>

EXPERIENCE

Full Stack Developer Intern <i>RISESLABS</i>	June 2023 – Nov 2023 <i>Remote</i>
Developed a cross-platform movie application using Flutter and Node.js with secure Firebase integration. Reduced MongoDB query latency by 40% through schema optimization, indexing, and aggregation pipelines. Integrated RESTful APIs and enhanced system scalability for 10,000+ concurrent users. Implemented authentication, authorization, and secure data access with Firebase Auth and Firestore rules. Collaborated in Agile sprints with code reviews, pair programming, and CI/CD pipelines using GitHub Actions. Designed user analytics and logging modules to monitor application performance and user behavior.	
Software Engineer <i>Gemini Consulting & Services</i>	Dec 2023 – Dec 2024 <i>Hyderabad, India</i>
Developed enterprise web applications using React.js, Node.js, Express.js, and MongoDB for logistics and supply chain clients. Leveraged AWS (Lambda, EC2, S3) and Docker to containerize and deploy microservices with CI/CD pipelines via GitHub Actions. Enhanced database performance and reduced API latency by 30% through query optimization, caching, and indexing strategies. Collaborated with cross-functional Agile teams to deliver new customer-facing features, improving client satisfaction scores. Implemented authentication, authorization, and secure role-based access control to strengthen system security. Integrated third-party APIs to automate reporting and reduced manual tasks by 40%. Performed code reviews, mentored junior developers, and improved team velocity by 15%. Designed monitoring dashboards and logging solutions, increasing issue detection and recovery efficiency.	

PROJECTS

Cross-Platform Movie App <i>Flutter, Node.js, MongoDB, Firebase</i>	2023
Built full-stack movie discovery and booking application for web and mobile platforms. Implemented Firebase authentication and role-based access for admin, user, and content manager roles. Optimized database queries and real-time updates for efficient streaming of movie schedules and reviews.	
Supply Chain Management Dashboard <i>React.js, Node.js, AWS, MongoDB, Docker</i>	2024
Developed a dashboard for tracking shipments, inventory levels, and warehouse performance. Integrated AWS Lambda functions and API Gateway to automate analytics and notifications. Implemented dynamic charts and visualizations for real-time supply chain decision making.	

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C/C++, R, TypeScript
Frameworks/Tools: React.js, Node.js, Express.js, Flutter, Docker, REST APIs, Firebase, Tailwind CSS
Cloud: AWS (Lambda, EC2, S3, CloudFormation), GitHub Actions
Databases: MongoDB, MySQL, PostgreSQL, SQLite
ML/AI: Pandas, Scikit-learn, TensorFlow (Beginner), LLM APIs

CERTIFICATIONS

Java Developer – Infosys Springboard
Android Developer – EduSkills
AWS Academy: Data Analytics, Cloud Foundations, Salesforce (Admin)

PUBLICATIONS

“Dual-Purpose Hyper-Heuristic SVM” – NECICAIA-2K24-022, UGC Care: Industrial Engineering Journal
