

Poorna Senapathi

Software Engineer

KS | 469-759-3594 | Poornasenapathi28@gmail.com | [LinkedIn](#)

SUMMARY

Software Engineer with 3 years of experience, adept in SDLC methodologies like Agile and Waterfall, and skilled in a diverse tech stack including Java, Python, SQL, Docker, Kubernetes, and AWS. Proficient in developing and deploying applications using frameworks like Spring Boot, Microservices, and React across platforms such as Apache Tomcat and cloud environments like AWS, Azure, and GCP. Experienced in full-stack development, database management, and employing tools like Git, Maven, and Jenkins for effective version control and project management.

SKILLS

Methodology: SDLC, Agile, Waterfall
Languages: Core Java, Java8, SQL, Python, C++, PHP, GraphQL, REST APIs, JSON, Angular 11, HTML5, JavaScript, CSS, React, TypeScript, XML
Frameworks: Spring MVC, Spring Boot, Spring Security, Microservices, Docker, Kubernetes, Terraform, Node.js, JSF, Hibernate, JPA, Flutter, Express
IDEs: NetBeans, IntelliJ IDEA, Visual Studio Code
J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC
Web Technologies: HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML
Application Server: Apache Tomcat, Web Sphere
Cloud Technologies: AWS (IAM, EC2, RDS, EBS, Aurora, ElastiCache, CLI, Route 53, S3, ECS, ECR, Lambda), Azure, GCP
Databases: MySQL, PostgreSQL, NoSql
Build /Other tools: UML, MS Visio, Maven, Gradle, Jenkins, Junit
Version Control Tools: Git, GitHub
Operating Systems: Windows, Linux

EDUCATION

Master of Science in Computer Science Wichita State University, Wichita, KS	Aug 2022 - May 2024
Bachelor of Science in Electronics and Communication Technology Loyola Academy, Hyderabad, India	June 2019 – July 2022

EXPERIENCE

ServiceNow, KS | Nov 2023 - Current | Software Engineer

- Collaborating with cross-functional teams to deliver high-quality software through Agile methodologies bi-weekly, ensuring efficient and effective team synergy.
- Led the development and optimization of REST APIs using Core Java, Spring Boot, and Hibernate, which improved client application response times by 20%.
- Optimized web interfaces using Angular 11 and React, enhancing user experience and reducing page load times by 15%.
- Managed and optimized cloud infrastructure on Amazon Web Services (including EC2, S3, Lambda) to deploy scalable applications, achieving 99.9% uptime and reducing server costs by 10%.
- Designed and optimized SQL queries and stored procedures, significantly improving database performance and reducing query execution times by 25%.
- Automated containerized application deployment using Docker and orchestrated services with Kubernetes, boosting deployment efficiency by 30%.
- Developed and managed Java 2 Enterprise Edition (J2EE) components like Servlets and JSP, enhancing back-end operations and server response efficiency.

Orion Technolab, India | May 2020 - August 2022| Software Engineer

- Spearheaded Waterfall project management from concept to completion, consistently delivering within 10% of budget constraints.
- Developed and maintained Java8-based Microservices using Spring Security and Java Persistence API (JPA), reducing system downtime by 15% and improving system modularity.
- Designed and implemented full-stack applications using Python, Flask, and PostgreSQL, which streamlined data processing and reduced operational errors by 20%.
- Managed and automated cloud operations on Microsoft Azure, utilizing Terraform for server provisioning, reducing manual intervention by 50%.
- Developed mobile applications using Flutter, increasing user engagement by 25% and improving user interface performance by 15%.
- Led the successful migration of legacy applications to modern frameworks using Node.js and Express, enhancing application scalability and reducing server load by 30%.
- Created technical diagrams and workflows using Unified Modeling Language (UML) and Microsoft Visio, improving project clarity and collaboration.
- Implemented GraphQL APIs, optimizing data retrieval processes and reducing response payload size by 50%.
- Utilized Google Cloud Platform (GCP) to build highly available infrastructure and automated testing with JUnit, improving test coverage by 35%.

CERTIFICATION

AWS Solutions Architect Associate SAA- C03
