

Poornashree Ganapathi Subramanian

(256)-441-5722 | poornashree365@gmail.com | <https://www.linkedin.com/in/poornashree-gs/>

SKILLS

- **Programming Languages:** C, C++, Python, .NET, Java, C#, R, Javascript, Typescript
- **Visualization tools & Libraries:** MS Excel, Word, Google Analytics, Power BI, Tableau
- **Web & UI:** HTML, CSS, AJAX, JSON, Angular, React
- **Data & Database tools:** SQL, MongoDB, Pandas, NumPy, PySpark, Azure SQL, Hadoop
- **Cloud Services:** Azure Data Factory, OpenStack, Git, JIRA, Docker, Kubernetes
- **Certifications:** Microsoft Certified: Azure Fundamentals, Microsoft Certified: Azure Data Fundamentals, Google Data Analyst, Microsoft Power BI Data

EXPERIENCE

Python Programmer | University of Alabama in Huntsville | Aug 2023 – May 2024

- Project: Scalable Multi-Phone Targeted Data Extraction System (SM-TDES)
- Built a Python application using Open CV and face recognition libraries to enable real-time face detection and extraction from video files, optimizing performance through object-oriented design and concurrent frame processing.
- Improved accuracy and scalability by implementing dynamic margin logic for robust tracking, CLI-based user customization, and delivering high-performance video pre processing for downstream machine learning workflows.

Graduate Teaching Assistant | University of Alabama in Huntsville | Jan 2023 – May 2024

- Expertly guided 70+ students in C++ programming (OOPs, data structures).
- Designed cross-platform build solutions and auto-grader systems for assignments. Showcasing robust communication and planning skills.

Data Analyst Intern | Roots Multi Clean Inc Victory Sweepers, AL | Jul 2024- Oct 2024

- Performed data analysis on SAP Bill of Materials (BOM) to validate accuracy and consistency across multiple machine models.
- Extracted, cleaned, and reconciled BOM and inventory data, identifying discrepancies and updating records to reflect the latest production configurations.
- Maintained and organized large BOM datasets in Microsoft Excel using formulas, pivot tables, and lookups to improve data accuracy and accessibility.
- Supported engineering and operations teams by providing reliable data reporting and streamlined inventory tracking processes.

Application Developer | IBM Pvt. Ltd. | Aug 2022 - Aug 2023

- Developed and maintained scalable web applications using ASP.NET, Angular, JavaScript, and SQL Server, enhancing user experience and functionality.
- Improved performance and maintainability of enterprise systems by applying test-driven development (TDD) and modular design principles.
- Engineered custom client solutions by integrating APIs and business logic with robust front-end interfaces.
- Led unit testing efforts to ensure system reliability, reducing bugs and post-deployment issues.
- Collaborated with cross-functional teams in Agile planning and review meetings, contributing to sprint planning, retrospectives, and progress tracking.

Application Developer Intern | IBM Pvt. Ltd. | Jan 2022 – July 2022

- Contributed to the same team prior to full-time conversion, focusing on feature development, bug fixing, and code refactoring. Gained hands-on experience with .NET technologies, version control (Git), and Agile methodology.
- Supported senior developers by preparing test cases and documenting user stories and system behaviours.

EDUCATION

- University of Alabama, Huntsville - Master's in Computer Science | GPA: 3.45 | 2023-2025

PROJECT EXPERIENCE

- Robust Text and Image Forgery Detection – Built an integrity checker using metadata and content analysis to detect forged multimedia on social platforms.
- Fashion MNIST Classification – Trained a neural network using TensorFlow to classify fashion items from image data.
- Sentiment Analysis of Reviews – Developed an ML model to classify review sentiment from large-scale text datasets.
- UTI Detection Using Patient Data – Created a machine learning model to predict early signs of urinary tract infection from medical records.
