SUMMARY

Dedicated and experienced Software Engineer with around 4 years of hands-on experience, adept at developing scalable and reliable Java applications, with a focus on seamless deployment across diverse platforms. Proficient in leveraging AWS services for optimal software delivery. Demonstrated success in crafting robust and efficient code, following industry-standard best practices. Proven track record of collaborative teamwork for streamlined project execution. Committed to staying abreast of emerging technologies and continuously enhancing skills to drive innovation and exceed project expectations.

EDUCATION

Master's in science and engineering
Oklahoma Christian University, OK, OK
Bachelors in computer science
Bhaskar Engineering College (JNTU), India

SKILLS

- **Languages:** Java, SQL, JavaScript, Python, C, C++
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Technologies:** Gradle, Kubernetes, Docker, Gitlab CICD, Flutter
- **Methodology:** SDLC, Agile, Waterfall
- **Frameworks:** Spring MVC, Spring Boot
- **Cloud Technologies & DevOps:** AWS, Azure, Ant, Maven, Gradle, Jenkins, Bamboo Gulp, Grunt, Webpack, NPM, Bower, Docker, Kubernetes, Azure Cloud, GCP
- **IDEs:** NetBeans, IntelliJ IDEA J2EE
- **Web Technologies:** HTML5, CSS3(Sass and less), JavaScript, AJAX, JSON, Bootstrap, jQuery, Angular, React JS with Flux, Redux, .NET, Handlebar JS, Polymer.js, Backbone JS, NodeJS, Express JS, Hapi JS
- **Application Server:** Apache Tomcat, Oracle Web Logic, IBM Web Sphere, JBoss
- **Version Control Tools:** Git, GitHub
- **Operating Systems:** Windows, Linux

EXPERIENCE

CorTracker 360

Software Developer Engineer II

12/2023 – Present

- Developed RESTful APIs with Java Spring Boot to support the Riser Inspection App, enabling users to upload, delete, and view pictures, resulting in a 25% boost in operational efficiency.
- Created a web application for training computer vision models using Spring Boot, AWS Recognition, and AWS S3 for image storage, helping inspectors improve defect detection accuracy by 25%.
- Built a conversational AI application using Java Spring Boot and Amazon Bedrock Knowledge Bases, providing instant policy guidelines and reducing compliance-related errors by 20%.
- Collaborated with cross-functional teams to integrate APIs with complex data models, utilizing JUnit and Mockito for unit testing and Coral for end-to-end API testing, achieving 98% test coverage. Engineered a serverless data processing workflow using AWS Lambda, DynamoDB, and S3, automating data handling and reducing manual processes by 80%.
- Developed an AI-assisted inspection reporting system leveraging Java Spring Boot, OpenAI API, and S3, automating report generation and reducing reporting time by 50%.
- Designed and developed a Micro Services Architecture enterprise application, contributing to a 40% improvement in overall system scalability.
- Managed and automated the entire CI/CD pipeline using Jenkins and Spinnaker for microservices, reducing deployment times by 50% and ensuring seamless integration across multiple environments.
- Responsible for infrastructure management, ensuring high availability through capacity planning and resource optimization across AWS (EC2, RDS, EKS), improving uptime by 99.9%.
- Spearheaded Kubernetes-based container orchestration, leading to the migration of legacy applications to a cloud- native infrastructure, reducing operational overhead and improving fault tolerance.
- Collaborated with the DevOps team on infrastructure provisioning, utilizing Terraform for Infrastructure as Code (IaC), and optimized resource allocation across environments.
- Mentored junior developers by providing code reviews, technical guidance, and best practices, fostering their growth and improving overall team productivity.

- Engaged in all stages of the Software Development Life Cycle (SDLC) for the SDGE Contractor Scheduler web app, achieving a 20% faster delivery of critical features by leveraging Agile Methodology framework.
- Developed the sliding menu component for displaying and navigating work queues using HTML5, CSS3, and Angular 8 router, significantly improving the user interface and navigation experience.
- Utilized Angular 8 to create dynamic user interfaces and validations for Notes and Details screens, reducing user errors by 20% and enhancing data accuracy for scheduling.
- Leveraged Java 8 features include lambda expressions, streams, and filters to optimize scheduling processes, achieving a 15% improvement in application performance.
- Ensured PCI-DSS compliance for cloud-hosted applications by enforcing role-based access control (RBAC), applying AES-256 encryption for data security, and conducting routine vulnerability scans to identify and mitigate risks.
- Applied JUnit and other automated testing frameworks to create and maintain unit tests for scheduling workflows, achieving a 98% test coverage and ensuring code quality and reliability.
- Designed and implemented data transformation processes to adapt data from multiple sources for scheduling operations, reducing data inconsistencies by 30%.
- Worked with GCP services like Pub/Sub, BigQuery, and Cloud Run to build data pipelines, enable event-driven processing, and deploy lightweight serverless applications for faster, scalable performance.
- Implemented Kafka Connect to seamlessly integrate scheduling data between the application and diverse data sinks, improving data synchronization speed by 25%.
- Proactively detected and addressed software risks by adding new approval steps to pipelines, ensuring healthy pipeline maintenance and minimizing failures.
- Developed API alarms and monitoring mechanisms to enhance system health and customer service, reducing incident escalation by 35% within a month.

SETTLE METAL

- Demonstrated a keen eye for detail during thorough debugging and troubleshooting sessions, resulting in a remarkable 32% reduction in critical system defects.
- Leveraged agile methodologies to enhance project efficiency, actively participating in sprint retrospectives and continuous improvement initiatives.
- Collaborated effectively with cross-functional teams, fostering a culture of open communication and knowledge sharing to enhance project outcomes.
- Proactively identified performance bottlenecks and implemented optimization strategies, resulting in significant enhancements to application speed and responsiveness.
- Displayed a commitment to ongoing professional growth by staying informed about the latest industry trends and incorporating relevant advancements into projects.
- Demonstrated exceptional adaptability by swiftly acquiring proficiency in new tools and technologies, effectively expanding the team's skillset.
- Played a pivotal role in creating comprehensive technical documentation, ensuring efficient knowledge transfer and contributing to project sustainability.
- Provided prompt resolution of bugs, minimizing downtime and improving overall system stability.
- Implemented CI/CD pipelines to automate the build, testing, and deployment processes, reducing manual errors and speeding up releases.
