PROFESSIONAL EXPERIENCE

VARTECH SYSTEMS - Software Developer

Jan 2024 - Present

- Developed **scalable RESTful microservices** using **Django, Python**, and **Node.js**, ensuring efficient **backend performance**.
- Deployed **serverless APIs** with **AWS Lambda** and **API Gateway**, reducing infrastructure overhead by **30%**.
- Automated **infrastructure provisioning** with **Terraform** and **Ansible**, boosting **deployment efficiency**.
- Built and maintained **CI/CD pipelines** using **Jenkins**, ensuring **reliable integration** and **rapid delivery**.
- Collaborated with frontend teams on **React.js** integrations, enhancing **UI responsiveness** and application quality.

WIPRO TECHNOLOGIES - Software Engineer

May 2020 - Feb 2021

- Developed and deployed **backend services** and APIs using **Python** and **MVC architecture**, ensuring robust performance.
- Designed **business logic** for **data flows** and performed **SQL Server** operations.
- Built **responsive UIs** using **HTML, CSS**, and **JavaScript**.
- Conducted **unit testing** and supported releases through standard **SDLC** methodologies.

COGNIZANT TECHNOLOGY SOLUTIONS - Data Analyst

Oct 2017 - Apr 2020

- Analyzed **structured and semi-structured data** using **SQL**, providing insights via **QlikView dashboards** and **Excel reports**.
- Built **scalable data pipelines** using **AWS S3** and **Redshift**, enabling seamless **data flow** and **analytics**.
- Executed **ETL processes** with **Talend** and **Informatica**, improving **data quality** and availability.
- Automated reporting and optimized **data workflows** across **JSON, CSV**, and **Excel** formats.

PROJECTS

SERVERLESS MICROSERVICES PLATFORM

(Python, Django, Node.js, AWS Lambda, API Gateway, Terraform, Ansible)

- Designed and deployed **scalable microservices** using **Django** and **Node.js**, enhancing **system performance**.
- Built **serverless APIs** with **AWS Lambda** and **API Gateway**, reducing overhead by **30%** and improving **scalability**.
- Automated **IaC (Infrastructure as Code)** with **Terraform** and **Ansible**, ensuring repeatable **deployments** and consistency.

DATA INSIGHTS DASHBOARD

(AWS S3, Redshift, QlikView, Talend, SQL)

- Created backend APIs using **Python** and **MVC patterns**, supporting **critical healthcare operations**.
- Developed **data-driven business logic** and built **responsive interfaces** using **JavaScript, HTML**, and **CSS**.
- Ensured application quality with **unit testing** and adherence to **SDLC standards**.

HEALTHCARE ANALYTICS ENGINE

(Python, SQL Server, MVC Architecture, JavaScript, HTML/CSS)

- Built **end-to-end ETL pipelines** with **Talend**, loading multi-format data (JSON, CSV, Excel) into **AWS S3** and **Redshift**.
- Designed **interactive dashboards** using **QlikView**, reducing manual analysis by **60%**.
- Partnered with stakeholders to enhance **data accuracy, pipeline speed**, and **reporting automation**.

EDUCATION

Master's In Computer Info & Systems

Dec 2023

University of Central Missouri - GPA: 3.2/4

SKILLS

- **Programming Languages:** Python, JavaScript, HTML, CSS
- **Frameworks & Libraries:** Django, Node.js, React.js
- **Cloud & DevOps Tools:** AWS Lambda, API Gateway, Terraform, Ansible, Jenkins, AWS S3
- **Databases:** SQL Server, MySQL, MongoDB, DynamoDB, SQLAlchemy, AWS Redshift
- **Business Intelligence & Data Integration:** Advanced Excel, QlikView, Talend, Informatica
- **Testing & Automation:** Cypress, Behave
- **Data Formats:** JSON, CSV
