## PROFESSIONAL SUMMARY

Software Engineer with around 5 years of hands-on experience in building and maintaining robust web applications across diverse domains. **Skilled in both frontend and backend development**, with a solid understanding of **System design, API development, and database interactions**. Proven ability to work in **Agile** teams, adapt to new technologies quickly, and deliver clean, maintainable code that meets business needs. Passionate about solving real-world problems through technology and continuously improving development practices.

## EDUCATION

### Master of Science Computer Science

Florida Atlantic University, Florida, USA

May 2025

GPA: 3.8/4.00

## SKILLS

**Programming Languages & Databases:** Java (8–17), Python, C, C++, JavaScript, TypeScript, SQL, NoSQL, MySQL, PostgreSQL, MongoDB, Oracle, SQL Server, DynamoDB

**Frameworks & Libraries:** Spring Boot, Spring MVC, Spring REST, Spring Batch, Spring Security, Spring Data JPA, Hibernate, Node.js, React.js, Redux, Bootstrap, jQuery, Ajax, JSON, XML

**Cloud & DevOps:** AWS (EC2, S3, Lambda, SQS, SNS, API Gateway, EKS, ELK Stack, CloudFormation), Azure (AKS, Azure DevOps, Azure Functions, Logic Apps), Docker, Kubernetes, Jenkins, GitHub Actions, GitLab CI, Terraform

**Testing & Tools:** JUnit, Mockito, Postman, SoapUI, IntelliJ IDEA

**Project & Collaboration Tools:** Agile, Scrum, TDD, Jira, Confluence, Git, GitHub, Bitbucket, MS Teams, Slack, Figma

**APIs & Messaging:** RESTful API, GraphQL, Kafka

## WORK EXPERIENCE

### Principal Financial, USA | Software Engineer

September 2024 – Present

- Developed secure, finance-focused user interfaces with **React.js** for digital procurement and invoicing portals, streamlining workflows for finance teams and reducing average page load time by **40%** through **code splitting** and **lazy loading**.
- Enhanced purchase order processing and supplier ledger reconciliation services using **Spring MVC** and **Spring Data JPA**, delivering an **18%** improvement in **database query performance** during peak transaction windows.
- Refactored** finance microservices for budget approvals, supplier onboarding, and expense reporting using **Spring Boot** with asynchronous messaging, improving transaction throughput and ensuring compliance with financial regulatory standards.
- Implemented role-based access control (**RBAC**) with **JWT** authentication and integrated **ELK** stack for financial **audit logging**, ensuring SOX and internal compliance readiness.
- Automated **CI/CD** pipelines with **GitHub Actions** and **GitLab CI** for financial application deployments, reducing release cycle times by 25% and improving deployment accuracy for transaction-sensitive modules.
- Designed and optimized **AWS ECS**-based infrastructure for financial applications with Application **Load Balancer**, **CloudWatch**, and **CloudTrail**, achieving **99.99%** uptime and reducing cloud operational costs by 20%.

### NCR Corporation, India | Software Developer

April 2021 – August 2023

- Created reusable custom React hooks to streamline enterprise software UI logic, improving maintainability and reducing front-end code duplication by 30% across product lifecycle management applications.
- Engineered scalable modules using **Java 8**, **Spring Boot**, and **RESTful APIs** for a Product Lifecycle Management (PLM) platform, enabling efficient component tracking, product versioning, and release governance.
- Designed and deployed microservices architecture with Spring Data JPA and **Hibernate** integrated into **MySQL** and **Oracle** databases, improving structured product data retrieval speeds by **30%** and cutting service latency by 25%.
- Engineered real-time, fault-tolerant data pipelines using **Apache Kafka**, enhancing system responsiveness and ensuring reliable message delivery across distributed services.
- Implemented machine learning and **NLP** solutions (text classification, entity extraction) to deliver intelligent automation features, boosting user engagement and reducing manual intervention in workflows.
- Partnered with QA and DevOps teams** to deliver reliable updates for mission-critical enterprise systems, using **Agile** methodologies, **Jenkins CI/CD pipelines**, **Git**, and **Tomcat** to ensure seamless deployment and minimal downtime.

### Rlogical Techsoft, India | Jr. Software Developer

January 2020 – March 2021

- Established dynamic, component-driven front-end interfaces using Angular and TypeScript, enabling faster feature implementation, improving UI maintainability, and enhancing cross-module consistency across enterprise applications.
- Built and optimized **Spring MVC-based backend modules** to handle complex business workflows, **improving API response times by 25%** and ensuring scalability for high-volume enterprise transactions.
- Designed and implemented **GraphQL** APIs to streamline data retrieval for client applications, reducing over-fetching/under-fetching issues and cutting average data query size by 40%.
- Developed and maintained secure backend services with **Spring Boot** and **Spring REST**, **integrating PostgreSQL and MongoDB** to power a scalable customer analytics platform serving **10,000+ monthly active users**.
- Integrated **REST APIs** with Azure-hosted services and external payment gateways, using Postman for validation and debugging, streamlining partner onboarding, and reducing integration time by **20%**.
