## PROFESSIONAL SUMMARY

Detail-oriented IT Project Coordinator & Database Administrator with 5+ years of experience in managing project milestones, optimizing workflows, and ensuring seamless communication across teams. Skilled in hybrid project management methodologies, database administration, and enterprise system integration. Demonstrated ability to manage Jira-based ticket workflows, implement process improvements, and maintain secure systems while continuously learning and adapting to new technical requirements.

---

## PROFESSIONAL EXPERIENCE

### IT Project Coordinator & Database Administrator

Bureau Veritas - North America | October 2020 - Present

- Utilized Atlassian Jira to manage and track tickets from submission to resolution, ensuring timely responses and issue closure.
- Led the transition to a hybrid project management approach (Agile + Traditional), increasing team productivity by 30% and reducing project overruns by 20%.
- Coordinated successful ERP system rollout across three regional offices, improving cross-departmental efficiency by 15%.
- Communicated risks and timeline changes promptly and transparently to clients and management.
- Collaborated with cross-functional teams to test and refine internal monitoring systems and Builder

tool enhancements.

- Spearheaded the integration of IoT sensors into monitoring systems, enhancing real-time data accuracy and proactive decision-making.
- Contributed to departmental process improvements, streamlining workflows and reducing inefficiencies.
- Administered and optimized company databases, ensuring high availability, security, and performance.
- Followed established data security and risk management procedures.
- Participated actively in departmental training sessions and best practice discussions to enhance professional growth.
- Designed and implemented backup & recovery solutions, minimizing downtime and ensuring data integrity.
- Assisted in database migration & upgrades, enhancing system performance and reliability.

#### Data Entry Administrator

Bureau Veritas - Hoffman Estates, IL | August 2018 - October 2020

- Maintained accurate and up-to-date customer records within enterprise systems.
- Conducted data validation and quality checks, identifying and resolving discrepancies.
- Supported sample receiving operations to ensure smooth workflow and compliance.

---
