EDUCATION

San Jose State University

Master of Science in Computer Engineering

San Jose, CA

Aug. 2023 – Dec. 2025

Coursework: Web UI Design, Operating Systems, Computer Architecture, Data Mining, Software Quality Assurance, Algorithms and Data Structures, System Software, Software Security Techniques.

EXPERIENCE

Software Engineer

Tata Consultancy Services (TCS)

Aug. 2019 – Jun. 2023

Bengaluru, India

- Developed a full-stack e-commerce platform using **React.js** and **Spring Boot**, driving a **30% increase** in online sales through enhanced virtual shopping experience.
- Engineered high-performance backend using **Java**, **Spring MVC**, and **MySQL**, resulting in **30% faster** database operations and improved data management efficiency.
- Implemented test-driven development (TDD) with comprehensive **RESTful API** architecture, achieving **95% test coverage** and reducing production bugs by **90%**.
- Built responsive frontend using **React.js**, **Redux**, and Material UI, enhancing user engagement and reducing bounce rates.
- Led development of healthcare scheduling platform using **Java**, **Angular**, and **Spring Boot**, resulting in a **25% improvement** in appointment efficiency and enhanced user experience.
- Architected secure healthcare application using **Spring Cloud Dataflow**, **Java**, and **MySQL**, implementing **HIPAA-compliant** encryption protocols for patient data protection.
- Designed and optimized **SQL database schema**, improving query performance by **40%** while maintaining strict data security standards.
- Managed cross-functional collaboration between development, QA, and product teams, delivering all milestones on time with **zero critical defects**.

PROJECTS

Ticketing System Design | C++, Data Structures

Jan. 2024 – May 2024

- Engineered a high-performance ticketing system in C++ with efficient data structures and algorithms to handle high transaction volumes.

Traffic Accident Prediction System | Python, LLM, Data Mining

Aug. 2024 – Dec. 2025

- Applied ML models to analyze urban collision patterns, achieving an AUC-ROC of **0.9939** and accuracy of **96.83%**.

Android Malware Detection | Python, LLM, Cybersecurity

Aug. 2024 – Dec. 2025

- Built a machine learning-based malware detection system with **81% accuracy** using behavioral analysis and Random Forests.

TECHNICAL SKILLS

Languages: Java, C++, C, Python, JavaScript, HTML/CSS, Shell Scripting, Type Scripting, SQL

Front-End Frameworks / Technologies: Angular.js, Angular, Bootstrap, jQuery, AJAX, React.js, Node.js, JSON

Back-End Frameworks: Flask, Fast API, Django, Spring Boot, Spring MVC, Ruby on Rails

Databases: AWS DynamoDB, MySQL, MongoDB (NoSQL), Google Big Query, PostgreSQL, Redis (caching)

Developer Tools: Git, Visual Studio, PyCharm, IntelliJ, Eclipse, Docker, Kubernetes, Jenkins, Ubuntu, Linux

Libraries: pandas, NumPy, Matplotlib

ACHIEVEMENTS

- Received the **"Innovation Excellence Award"** for developing a solution that reduced processing time by **30%**, recognized by senior leadership.
- Awarded the **"Best Performance Award"** for exceeding performance targets by **150%** over two consecutive quarters.
- Recognized with the **"Outstanding Achievement in Automation"** award for designing a system that improved efficiency by **40%**.
