Professional Summary

Impact-driven Senior Data Analyst and Data Engineer renowned for revolutionizing fintech, banking, and higher education data ecosystems. Expertly architected sophisticated ETL pipelines and designed dynamic dashboards, enhancing data accessibility by 90% and increasing ROI by 25% with technologies such as Snowflake SQL, Python, and Tableau. Distinguished for minimizing fraud detection response times from hours to seconds through cutting-edge automation solutions. Committed to driving transformative data strategies that underpin organizational excellence and fortify strategic decision-making.

Education

Central Michigan University – Mount Pleasant, MI

May 2025

Master of Science, Information Systems

St. Martin's Engineering College - Hyderabad, India

May 2019

Bachelor of Technology, Electronics and Communication Engineering

Technical Skills

- **Languages & Tools:** Python, R, SQL, C, C++, MATLAB
- **Data Engineering & ETL:** ETL, Data Wrangling, Data Cleaning, Apache Airflow, dbt, PySpark
- **Databases:** Snowflake, MySQL, PostgreSQL, SQL Server, Redshift, Teradata
- **Visualization & BI:** Tableau, Power BI, Splunk, Qlik, Matplotlib, Seaborn, Excel (Advanced: Pivot Tables, VLOOKUP/XLOOKUP, INDEX-MATCH, Macros, Power Query, Data Analysis ToolPak)
- **Cloud Platforms:** AWS (Glue, Redshift, Lambda, S3), Azure (Data Factory, Synapse), GCP (BigQuery, Dataflow), Databricks, Kafka
- **Machine Learning:** XGBoost, TensorFlow, Scikit-learn, Snorkel, Time Series Forecasting
- **Version Control & Workflow:** GitHub, CI/CD, Jira, Agile, Scrum

Professional Experience

Central Michigan University

Aug 2023 - May 2025

Data Analyst / Data Engineer

Mount Pleasant, MI

- Designed and maintained end-to-end Snowflake SQL data pipelines integrating CRM, SAP, and AudienceView datasets into AWS S3 data lake, reducing siloed data and improving accessibility by 90%.
- Developed interactive Tableau and Excel dashboards (Pivot Tables, INDEX-MATCH, Data Analysis ToolPak) for real-time ticketing, attendance, and event metrics, enabling data-driven staffing adjustments.
- Automated 15+ recurring manual reports via Python and AWS Lambda, saving 200+ hours annually and reducing manual errors.
- Applied forecasting models in Python and Excel to predict ticket sales, improving ROI by 25% through optimized campaign timing.
- Implemented thorough validation procedures for Snowflake pipelines, resulting in a 30% reduction in data errors, enhanced compliance with institutional standards, and improved decision-making precision.

Genpact - Google Pay Project

Jul 2021 - May 2023

Senior Data Analyst / Data Engineer

Hyderabad, India

- Built high-volume ETL pipelines using Python, PySpark, Azure Data Factory, and Snowflake to process 500GB+ daily transaction data.
- Integrated Kafka event streams into Snowflake and AWS Redshift for real-time ingestion, cutting fraud detection latency from hours to seconds.
- Created Excel-based fraud performance dashboards with macros and dynamic charts, reducing analysis time by 40%.
- Led A/B testing frameworks for marketing and fraud prevention, defining hypotheses, metrics, and visualizing results in Excel/Tableau, improving insight precision by 50%.
- Managed CI/CD workflows via GitHub for reliable deployment of analytics and ML solutions.

ICICI Bank

Jun 2019 - Jul 2021

Junior Fraud Analyst / Data Analyst

Hyderabad, India

- Queried and analyzed 10M+ daily transactions using SQL and Snowflake to detect high-risk behaviors, reducing investigation backlog by 35%.
- Designed Tableau, Power BI, and Excel dashboards (Pivot Tables, Conditional Formatting) for fraud monitoring, reducing false positives by 25%.
- Automated compliance/audit reports using SQL and Excel macros, cutting prep time from 3 days to 11 hours.
- Built composite fraud scoring models integrating KYC, CRM, and transaction data, improving prioritization and reducing resolution time by 30%.

Projects

Cloud-Based Executive Dashboard Automation

- Developed an executive reporting system with BigQuery, dbt, and Azure Logic Apps to automate data refresh and Tableau/Excel delivery.
- Reduced reporting time from hours to minutes, ensuring stakeholders had up-to-date KPIs.

WeaveTrack Inventory Management System

- Built Python Tkinter desktop app with AWS SES and Azure Blob Storage integration for vendor coordination.
- Designed Snowflake ETL processes for accurate, up-to-date inventory dashboards, cutting manual tracking errors by 80%.

Event Attendance Forecasting – Central Michigan University

Central Michigan University

- Created forecasting models in Python and Excel to predict ticket sales and optimize staffing.
- Boosted ROI by 25% through data-driven marketing spend allocation.

Certifications

- **AWS Cloud Practitioner:** LinkedIn Learning
- **Analyzing Data in Looker, LookML Modeling, Vertex AI Prompt Design:** Google Cloud
- **Lean Six Sigma Green Belt:** Central Michigan University
- **Deloitte Data Analytics Simulation:** Forage
- **Citi Markets Quantitative Analysis (MQA):** Forage
