Professional Summary:

Full-Stack Java Developer with 6+ years of experience building scalable web applications using Java, Spring Boot, Angular, and Python. Proficient in cloud technologies (AWS, GCP), microservices, REST/GraphQL APIs, and CI/CD automation. Strong in backend optimization, database design, and Agile development.

Technical Skills:

- **Programming Languages:** Java (8, 11, 17), Kotlin, Python, PL/SQL, JavaScript, TypeScript, SQL
- **Frontend Technologies:** HTML5, CSS3, Bootstrap, jQuery, Angular (8–17), ReactJS (with Redux), EmberJS, RxJS, AJAX, JSON
- **Java & Backend Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring WebFlux, Hibernate, JPA, Servlets, JSP, JDBC, EJB
- **API & Web Services:** RESTful APIs, GraphQL, SOAP, JAX-RS, JAX-WS, OpenAPI (Swagger), Apache CXF
- **Databases:** PostgreSQL, MySQL, MongoDB, Oracle, MS SQL Server, Cassandra, Redis
- **Messaging & Streaming:** Apache Kafka, RabbitMQ, JMS, ActiveMQ, AMQP
- **Build, CI/CD & DevOps:** Maven, Gradle, Jenkins, GitLab CI/CD, GitHub Actions, Docker, Kubernetes, Helm, Terraform, Liquibase
- **Cloud Platforms:** AWS (EC2, S3, RDS, EKS, Lambda, SQS, EFS), GCP (Compute Engine, Cloud SQL, Bigtable, Dataflow, Pub/Sub)
- **Testing & Quality:** JUnit, Mockito, TestNG, Jasmine, Karma, Postman, REST Assured, SonarQube
- **Version Control & Collaboration:** Git, GitHub, GitLab, Bitbucket, SVN
- **Project & Agile Tools:** Jira, Confluence, Scrum, Agile, TDD, BDD
- **Servers & Middleware:** Apache Tomcat, Nginx, Oracle WebLogic, IBM WebSphere, JBoss
- **IDEs & Tools:** IntelliJ IDEA, Eclipse, Spring Tool Suite (STS), Visual Studio Code, Postman, WinSCP, PuTTY

Education Details:

- Master's in Computer and Information Technology Management from Campbellsville University, KY (Jul 2022 – Oct 2023).
- B.Tech in Computer Science from Sri Indu College of Engineering & Technology (Aug 2013 – Jun 2017).

Professional Experience

PAYPAL | Austin, TX
Senior Java Full-stack developer

Aug 2023 – Present

Responsibilities:

- Applied Java 21 features like Pattern Matching for switch (JEP 433) to simplify business logic and enhance code readability.
- Developed and maintained RESTful APIs using **Spring Boot** and **Java 17**, supporting scalable, secure, and maintainable backend services.
- Developed **scheduled background jobs** using Spring Scheduler for tasks like data syncing and batch processing.
- Created **custom Angular directives and pipes** to extend UI functionality and improve code reusability.
- Built interactive, responsive front-end components using **Angular 16/17**, including usage of **standalone components** and **SSR** for performance optimization.
- Used **Python (with Pandas, NumPy)** in ETL pipelines for transforming and preparing data for analytics dashboards.
- Implemented **Spring WebFlux** for non-blocking, reactive programming, boosting system responsiveness under load.
- Created **data processing scripts and utilities using Python**, primarily for log parsing, automation of deployment-related tasks, and REST API interaction.
- Integrated with **AWS services** (EC2, S3, Lambda, RDS) and automated cloud resource management using Terraform and Python-based scripts.
- Integrated **GraphQL** and REST APIs into the front-end to enable flexible and efficient client-server data communication.

- Implemented authentication and authorization using **OAuth 2.0** and **JWT**, ensuring secure access to APIs and microservices.
- Designed and optimized **PostgreSQL** database schemas, implemented complex queries, and improved query performance using indexing and normalization techniques.
- Built **MongoDB** queries with aggregation pipelines to handle semi-structured data and improve data access patterns in high-volume scenarios.
- Utilized **Redis** caching to optimize API response times and reduce load on primary data sources.
- Containerized services using **Docker** and maintained clean Dockerfiles for consistent builds across environments.
- Integrated **CI/CD pipelines** using **Jenkins** and **GitLab CI**, automating builds, tests, and deployments across dev and staging environments.
- Deployed and maintained services on **AWS** using **EC2**, **RDS**, **S3**, and **Lambda**, ensuring performance and availability under load.
- Implemented asynchronous communication between services using **Apache Kafka**, improving throughput and system decoupling.
- Wrote unit and integration tests using **JUnit**, **Mockito**, and **Postman**, contributing to a robust testing framework and maintaining high code coverage.
- Monitored and analyzed application performance using **CloudWatch** and **AppDynamics**, identifying and resolving bottlenecks and incidents.
- Worked closely with product managers, QA engineers, and DevOps teams in an **Agile/Scrum** environment to deliver high-impact features on time.

Environment:

Java 17/21, Spring Boot, Spring WebFlux, Angular 16/17, JavaScript, TypeScript, Python, PostgreSQL, MongoDB, Redis, AWS (EC2, S3, RDS, Lambda), GCP (Compute Engine, Cloud SQL), Docker, Jenkins, GitLab CI/CD, Kafka, RabbitMQ, OAuth 2.0, JWT, Liquibase, GraphQL, JUnit, Mockito, Postman, Agile/Scrum

Altice | New York Java Backend Developer

Aug 2021 – Aug 2023

Responsibilities:

- Developed and maintained scalable microservices using **Java 11/17**, **Spring Boot**, and **Spring MVC** to support telecom billing, subscription, and customer management systems.
- Engineered **billing and subscription services** handling millions of monthly transactions with fault tolerance.
- Designed and implemented secure RESTful APIs with **Spring Security**, **OAuth 2.0**, and **JWT** to enforce role-based access control and data privacy.
- Built event-driven solutions using **Apache Kafka** and **RabbitMQ** for asynchronous message processing and real-time telecom event streaming.
- Implemented **role hierarchy-based access control** with Spring Security ACL for complex user permissions.
- Optimized database schemas and queries for **PostgreSQL**, **Oracle**, and **MongoDB**, improving transaction throughput and read/write latency.
- Automated database change management and version control using **Liquibase**, ensuring smooth deployments across environments.
- Collaborated with front-end teams to define **API schemas using Swagger/OpenAPI**, ensuring seamless integration.
- Containerized applications with **Docker**, orchestrated deployments on **Kubernetes** clusters running on **AWS EKS** for high availability and scalability.
- Developed reactive, non-blocking backend services leveraging **Spring WebFlux** to efficiently handle concurrent telecom data streams.
- Implemented caching solutions using **Redis** to reduce database load and improve response times under high traffic conditions.
- Configured and maintained CI/CD pipelines using **Jenkins** and **GitLab CI** to automate builds, tests, and deployments, reducing release cycles.
- Collaborated with cross-functional Agile teams, participating in sprint planning, daily stand-ups, code reviews, and retrospectives to deliver high-quality software iteratively.
- Conducted performance tuning and root cause analysis of backend systems using profiling tools and logging frameworks.
- Integrated third-party telecom services and APIs to enhance platform capabilities and customer experience.
- Participated in peer code reviews and mentored junior developers to promote best coding practices and knowledge sharing.
- Worked closely with front-end teams to define API contracts and ensure seamless integration with Angular and React-based applications.
- Ensured compliance with security and data protection standards relevant to telecom industry regulations.

Environment:

Java 11/17, Spring Boot, Spring MVC, Spring Security, OAuth 2.0, JWT, Kafka, RabbitMQ, REST APIs, PostgreSQL, Oracle, MongoDB, Liquibase, Docker, Kubernetes, AWS EKS, Jenkins, GitLab CI, Spring WebFlux, Redis, Agile/Scrum

Java Full-stack

Developer

Responsibilities:

- Developed web applications using **Java 8**, **Spring Boot**, and **Hibernate** on the backend, and **Angular 8+** on the frontend for enterprise telecom and finance clients.
- Built and consumed **RESTful APIs** for client-server communication, ensuring proper request/response validation and error handling.
- Developed **reusable Angular modules** and lazy-loaded routes to improve frontend scalability and performance.
- Implemented authentication and authorization using Spring Security and integrated JWT tokens for secure API access.
- Refactored legacy code to **Spring Boot microservices**, reducing monolith size and simplifying deployments.
- Integrated third-party APIs (e.g., payment gateways, SMS/email services) into full-stack applications.
- Handled **session management**, **CORS configuration**, and **exception handling** across backend services.
- Migrated existing JSP-based modules to **Spring Boot + Angular**, improving performance and maintainability.
- Designed and managed relational database schemas in **MySQL** and **PostgreSQL**, writing optimized SQL queries and stored procedures.
- Created dynamic UI components with **Angular**, leveraging services, routing, forms, and RxJS for reactive data handling.
- Used **Git** for version control and collaborated via **Bitbucket/GitLab**, following Git flow branching strategy.
- Participated in **Agile/Scrum** ceremonies including daily stand-ups, sprint planning, and retrospectives with cross-functional teams.
- Wrote unit tests using **JUnit** and **Mockito** for backend and **Karma/Jasmine** for frontend, improving test coverage and reducing bugs.
- Used **Jenkins** for build automation and **Maven** for dependency management.
- Followed **responsive web design** principles using **HTML5**, **CSS3**, and **Bootstrap** to ensure compatibility across devices.
- Fixed production bugs, optimized queries, and improved page load times, contributing to better user experience and system stability.

Environment:

Java 8, Spring Boot, Hibernate, REST APIs, Angular 8+, RxJS, HTML5, CSS3, Bootstrap, JavaScript, TypeScript, MySQL, PostgreSQL, JUnit, Mockito, Jenkins, Git, Bitbucket, Agile/Scrum
