WORK EXPERIENCE

Multicoreware | Software Engineer Intern

Illinois, Feb 2025 – Oct 2025

- Developed and maintained backend compiler infrastructure focusing on AArch64, ARM and x86 instructions raising to LLVM IR using C++
- Build architecture-aware test flows using CMake and Ninja for CI/CD deployment across Linux systems
- Gained extensive experience in Linux user-space development, including low-level system bring-up operations

University at Buffalo | IT Desk Support

New York, Jan 2024 – May 2024

- Provided essential technical support by diagnosing and resolving software and **system issues**, ensuring a seamless user experience and minimal downtime for customers
- Streamlined workflows by optimizing **ticket management** and resolution processes using the **ServiceNow** ticketing system
- Managed real-time tracking and support systems to ensure accurate inventory and **resource management**, supporting efficient operations
- Assisted in troubleshooting and resolving issues related to **inventory systems** and cloud-based administration tools, contributing to troubleshooting of inventory systems with **cloud admin centers** for maximum reliability and efficiency

Amazon | Data Analyst

India, Feb 2021 – July 2022

- Furthered a thorough analysis of **500+ products daily**, using internal **CRM and reporting tools** to monitor and track product issues
- Cleaned and rendered large datasets extracted from **Amazon's internal tools**, using **Python, SQL, and Excel** for data integrity checks
- Created **Power BI dashboards** to visualize key performance indicators (KPIs) such as customer satisfaction and sales performance
- Conducted **data integrity checks, data quality audits and reporting health checks**, resolving discrepancies and escalating blockers when needed
- Communicated across teams to implement automation processes and enhance ticket resolution workflows using **SharePoint and AWS**
- Delivered training sessions and documentation for peer analysts and internal teams on reporting tools and procedure
- Implemented process improvements that enhanced operational reporting accuracy and reduced manual entry time by 25%
- Provided structured/semi-structured datasets to support customer-level analytic models and decision-making

Board Ex | Research Analyst

India, Dec 2019 – Jan 2021

- Enhanced customer data accuracy and stakeholder updates, using **data lake-style** ingestion and **ETL processes** to ensure high-quality business intelligence
- Used **Python and SQL** to clean, manage, and validate structured and semi-structured data from internal and external sources
- Provided internal **support to customer service teams** by resolving data errors and user-reported cases, tracked via a CRM system
- Created and maintained **data documentation, business logic rules**, and escalation protocols in collaboration with the product team
- Interpreted client needs and developed proactive solutions through process audits and quality control frameworks
- Played a key role in user profile integrity, data reviews, and **error resolution before system snapshots or data refreshes**
- Managed high-volume ETL workflows and data lake integrations to ensure accuracy and consistency

Crampete Solutions | Data Scientist | Intern

India, Aug 2019 – Oct 2019

- Enhanced **customer data accuracy and stakeholder updates**, using structured ETL processes to ensure high-quality business intelligence
- Used **Python and SQL** to clean, manage, and validate structured and semi-structured data from internal and external sources
- Provided internal **support to customer service teams** by resolving data errors and user-reported cases, tracked via a CRM system
- Created and maintained **data documentation, business logic rules**, and escalation protocols in collaboration with the product team
- Interpreted client needs and developed proactive solutions through process audits and quality control frameworks
- Played a key role in user profile integrity, data reviews, and **error resolution before system snapshots or data refreshes**

PROJECTS

WISEdata support and Reporting Optimization Initiative:

- Led a simulated project supporting Wisconsin school districts with **WISEdata** submissions, acting as the primary contact for data reporting issues
- Used a ticketing system to track, monitor, and resolve data submission errors and incidents
- Guided districts through WISEdata and WISEDash interfaces to complete data reviews and ensure reporting accuracy
- Delivered virtual training sessions on data correction workflows and documentation practices
- Collaborated on identifying process improvements and explored API integration for streamlined district-level reporting.

Data Analysis of Pandemics of the World:

- Collected and analyzed global pandemic data from WHO and CDC and assessed interventions like vaccines and public health measured using **Python, Excel and Power BI**
- Extracted insights for mitigating future threats, emphasizing early detection, rapid response, and international cooperation through dynamic visualizations and statistical analysis

IOT Sensor Data Analysis:

- Utilized **Python** to analyze IoT sensor data, monitoring HVAC systems in office environments by leveraging liquid level sensors for real-time data collection and predictive modeling
- Generated actionable insights on energy efficiency, reduced maintenance costs, and enhanced sustainability, applicable to broader automation systems for improved performance and cost-effectiveness

SKILLS

- **Programming Language:** Python, R, C++
- **Data Analysis & Visualization:** SQL, Power BI, Tableau
- **Application Software:** Arduino, Android Studio, Dave IDE, MATLAB, Simulink, SolidWorks, AWS, Azure Data lake
- **Business Intelligence & Analytics:** Key Performance Indicators (KPIs), SAP, Azure, SharePoint, Maximo, Pilgrim, Confluence
- **Libraries:** Pandas, NumPy, TensorFlow, Matplotlib, Keras

EDUCATION

- **University at Buffalo, The State University of New York**

Master of Science in Internet of Things (IOT)

Relevant Course Work: Probability and Stochastic, Intro to Machine Learning, Big Data Analysis, Introduction to Artificial Intelligence (AI)
