

PROFESSIONAL SUMMARY

Analytics Professional with 5 years of experience transforming complex datasets into actionable insights. Proficient in designing and implementing data pipelines, leveraging advanced analytical & visualization tools to drive data-driven decision-making.

EDUCATION

The University of Texas at Dallas| Master's in Information Technology Management| Dallas (GPA: 3.97)
KIIT University (Orissa)| Bachelors in Information Technology| India (GPA:3.8)

Jan 2024-Dec 2025
Jul 2014-Apr 2018

SKILLS

Programming Languages & Tools	Python (Panda, NumPy, Scikit, Matplotlib), R, SQL(MySQL), Tableau, Power BI, Machine Learning
Data Analytics Competencies	Exploratory Data Analysis, Descriptive & Inferential statistics, A/B Testing, ETL
Cloud Technologies	Amazon Web Services (AWS)
Other Competencies	Agile, JIRA, Jenkins, GitHub, Kubernetes, Product development

PROFESSIONAL EXPERIENCES

- Power BI Development Intern, Everchem Specialty Chemicals, Philadelphia

Jul 2025-Present

 - Automated data pipelines and ETL processes to extract data from Microsoft Access to SQL Server, reducing manual processing time by 30% using Python
 - Built interactive inventory dashboards and collaborated with stakeholders to deliver actionable insights, improving decision-making processes by 25%
 - Implemented SQL & Python-based data validation & monitoring systems, achieving accuracy while reducing reporting performance issues by 40%
- Data Analyst, Ericsson Global Pvt Ltd, India

Jul 2019-Jun 2022

 - Performed data profiling on telecom logs & analyzed patterns of unauthorized access attempts & user behavior to identify potential security threats
 - Built Tableau dashboards to track quality & reliability KPIs for 100+ teams to drive actions, reducing monthly service-related complaints by 20%.
 - Automated 300+ reports using MySQL & Python, saving 20 hours per week by eliminating manual processes, ensuring error-free reports & insights.
 - Restructured legacy database & implemented access control rules using SQL, improving data accuracy by 22% & boosting query performance by 30%
 - Designed A/B tests for network outage alerts & self-service feature, leading to a 15% increase in customer engagement & drop in customer churn rate
- DevOps Engineer, Ericsson Global Pvt Ltd, India

Jun 2018-Jun 2019

 - Configured container deployment using Docker to create environment-specific images to streamline workflow across four development stages
 - Built Jenkins-based CI/CD pipeline for testing and deployment of telecom applications that reduced deployment time & production issues by 40%
 - Automated EC2 provisioning by Terraform for consistent configurations & scalable resources to handle higher traffic during seasonal surges
 - Redesigned a monolithic application into 10+ microservices using Kubernetes to optimize load distribution, which improved resource utilization by 35%

RELEVANT PROJECTS

- Small Business Administration (SBA) Loan Approval (Machine Learning)

 - Explored & cleaned SBA loan dataset using Python & built heat map charts to analyze the feature correlation for loan approval outcomes
 - Created classification models (random forest, logistic regression, gradient boost) on the SBA loan dataset to predict loan approval outcomes for startups
 - Validated models using precision, recall, & f-1 score metric, and selected the gradient boost model for its 94% accuracy in loan approval prediction
- Breast Cancer Diagnostic (Machine Learning)

 - Built a logistic regression model on the breast cancer dataset to predict benign & malignant breast cancer cases, aiding in clinical decision-making
 - Used classification report & AUC-ROC metric to evaluate model performance, determining logistic regression as most effective for early diagnosis tasks
- Uber Trip Analysis (Power BI)

 - Analyzed Uber trip dataset of New York using Power BI, built data models with DAX measures, and identified key booking trends and payment patterns
 - Developed an interactive multi-tab dashboard with dynamic KPIs & drill-through features that help stakeholders to make better data-driven decisions
 - Examined location & vehicle data to discover demand patterns, provided strategic recommendations for promotions & resource planning to boost revenue

CERTIFICATION

- AWS Solution Architect-Associate (SAA-C03) | Dec 2024 - Dec 2027
