SUMMARY

Recent Master’s graduate (**May 2025**) with 3+ years of experience, including 2 years at Citibank, in data analytics and business intelligence. Proficient in SQL, Python, Tableau, and Alteryx, with working knowledge of Snowflake and AWS for scalable data analytics. Skilled in data governance, quality control, and cross-functional collaboration to align analytics solutions with business goals. Adept at communicating complex data findings to technical and non-technical stakeholders to drive strategic decisions.

EDUCATION

New York UniversitySeptember 2023 - May 2025
Master’s of Science, Management of TechnologyGPA: 3.9/4
Relevant Coursework: Data Visualization for Business Intelligence, Business Analytics, Project Management, Machine Learning for Applications, Economics & Strategy, Global Innovation, Operations Management and Consulting

College of Engineering, PuneAugust 2017 - June 2021
Bachelor's of Technology, Electronics and Telecommunications Engineering

PROFESSIONAL EXPERIENCE

NYU Stern School of BusinessNew York, USA
Business AnalystOctober 2024 - May 2025

- Spearhead data anonymization for Senior Experience Survey dataset (2018-2025) by creating a Tableau Prep flow with 8 cleaning stages hiding student information, maintaining 100% data privacy in the Tableau Data Extract output.
- Design and integrate a line and area chart in the Career Dashboard to evaluate post-graduation outcomes across six years, incorporating data from ~400 responses per graduation cycle.
- Streamlined analysis of course feedback for 200+ faculty across 150+ courses by leveraging pivot tables for statistical summaries and vlookup to resolve 95 %+ of course type discrepancies, producing standardized reports used by academic leadership to inform instructional planning.
- Led statistical analysis on 3,000+ student experience responses, integrating confidence interval checks and top 3% agreement scores, driving 15% improvement in satisfaction ratings over four years through targeted program enhancements.

NYU School of Professional StudiesNew York, USA
Research and Data AnalystJune 2024 - August 2024

- Built 10+ interactive Tableau dashboards, enhancing data visibility for key stakeholders by incorporating user-friendly filters and calculated fields, leading to a 60% increase in actionable insights for course evaluations.
- Conducted exploratory data analysis on over 10,000 applications across 3 academic years, identifying a decrease in admit rates from 45% to 34% for graduate students, influencing a strategic focus on more competitive graduate programs.
- Created 12 Tableau dashboards, visualizing enrollment trends and application processing times, which resulted in a 30% reduction in bottlenecks within the application pipeline through the implementation of automated reminders.

CitibankPune, India
Technology AnalystJuly 2021 - June 2023

- Optimized business solutions by migrating 8 .NET APIs to microservices architecture, modernizing Outlook Integration CRM add-ins used by over 5,000 employees, streamlining client interaction logging across multiple business units.
- Implemented Jenkins pipelines by leading the migration of 10 microservices to a new OpenShift cluster using containerization and Elastic Container Service (ECS) tools, ensuring zero downtime across dev, test, and production/cob environments.
- Administered and maintained systems by performing security assessments using BlackDuck, identifying and resolving over 300 vulnerabilities across microservices and monolithic projects by implementing upgrades and refactoring to ensure compliance.
- Leveraged Jira for project management, creating over 30 tickets with clear requirements, acceptance criteria, and attachments tagged to correct epic, boosting project delivery efficiency by 20%.
- Coordinated with cross-functional teams to troubleshoot and resolve 50+ technical issues reported via ServiceNow, proficiently managing change requests through change management tools, enhancing system reliability by 70%.

SKILLS

Tools: Atlassian Confluence, Atlassian Jira, Tableau, Kubernetes, CI/CD Pipelines, Docker, Jenkins, Jupyter, MySQL, OpenShift, ServiceNow, Microsoft Excel, Microsoft Outlook, Microsoft PowerPoint, Microsoft Word, Google Docs, Google Sheets, Git, Alteryx, Snowflake, AI tools

Technologies: Agile, Scrum, HTML/CSS, Java, Python, Data Reporting, Software Development Life Cycle (SDLC), Machine Learning, Natural Language Processing (NLP), R, SQL, TensorFlow

PROJECTS

Dubai Real Estate 2023 Market Analysis:

- Enhanced decision-making for buyers and investors by highlighting key investment trends from 81,601 transactions worth 235.4B AED by developing an interactive Tableau story with 10+ advanced visualizations.
