

Prakash Saini

San Jose, CA | +1 (737) 296-8315 | prakashsainimail4@gmail.com

LinkedIn: <https://www.linkedin.com/in/sainiprakash525> | GitHub: <https://github.com/Prakash-sa>

Software Engineer with 3+ years of experience designing distributed systems and backend microservices in Go, Python, and Java. Skilled in Kubernetes, Docker, Kafka, gRPC, GraphQL, and cloud platforms (AWS/GCP), with a track record of improving system performance, reliability, and scalability.

Education

University of Texas at Austin | *MS in Information Science (Software Engineering)* Austin, USA | Aug 2022 – May 2024

National Institute of Technology Surat | *BE in ECE* Surat, India | Aug 2017 – May 2021

Technical Skills

Languages: Go, Python, Java, JavaScript/TypeScript, C/C++, SQL

Distributed Systems: Kafka, gRPC, GraphQL, REST APIs, microservices,DDD

Cloud & Infra: AWS (S3, EC2, IAM, VPC, EKS, Lambda, RDS), GCP (Storage, Engine, IAM, VPC, GKE, Functions, SQL), Azure, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions

Data Systems: PostgreSQL, MySQL, MongoDB, Redis

Big Data/Observability: Hadoop, Spark, Feather, Pinot, Samza, Prometheus, Grafana, OpenTelemetry

Testing/Quality: TDD, pytest, Jest, Cypress, Gherkin, Cucumber, SonarQube

Other: Agile/Scrum, Jira, Confluence, VS Code, Code Reviews, AI-assisted coding (Claude, GitHub Copilot)

Work Experience

Hewlett Packard Enterprise | *Software Developer*

Fort Collins, CO | Jul 2024 – May 2025

- Designed and implemented scalable, high-availability HPE storage microservices with Go, Python, and Reacton AWS/Kubernetes, handling 50k+ daily API calls with 99.9% uptime, following Agile methodologies.
- Optimized backend APIs with Locust, reducing p99 latency from 800ms to 500ms under 5,000+ concurrent sessions.
- Strengthened infrastructure with FIPS-compliant OAuth2/JWT security, remediating 100+ SonarQube vulnerabilities and ensuring audit readiness.
- Integrated Kafka-based audit logging within one week, improving traceability for distributed systems.
- Mentored a team of 4 developers, led Agile sprints, and reviewed 30+ PRs monthly, ensuring high code quality.

Hewlett Packard Enterprise | *Software Engineer Intern*

Fort Collins, CO | May 2023 – Aug 2023

- Collaborated in developing the internationalization (I18N) and localization (L10N) feature for other services using React, Go, AWS, and GitHub, ensuring seamless integration into the entire codebase **within 7 days**.
- Built CI/CD pipelines using GitHub Actions to automate tests and deployment, reducing manual overhead **by 80%**.

Nokia Solutions and Networks | *Software Engineer*

Bangalore, India | Jul 2021 – Jun 2022

- Built Python- and Bash-based monitoring tools that reduced distributed network setup time from 6–7 days to 5 minutes.
- Improved UI/API performance by 40% in AngularJS/Node.js dashboards via query optimization and caching.
- Participated in 24x7 on-call support rotation, authored technical documentation (design docs, runbooks, integration guides), resulting in resolving incidents related to microservice crashes.
- Created monitoring dashboards in Prometheus and Grafana, decreasing incident detection time **by 90%**.

Projects

- Persistent Logging for Microservices:** Developed reusable logging in Go, adopted across 20+ services, reducing MTTR **by 25%**, resulted in winning the **Global Innovation Days at HPE**.
- DiskSpace Android App:** Developed a decentralized media storage Android app using Java, Gradle, Flask, Encryption, Moibit API, and Agora API for secure data access. Resulted in **winning 3 hackathons**. [GitHub](#)

Awards & Recognitions

Relentless Curious Award by the Vice President at HPE · Runner-up in Global HPE Innovation Days · Winner of 4 National Level Hackathons
