

PRAKASH SAISESH M

708-476-9796 | prakashsaisheshm@gmail.com

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with a Master's in Data Science and 3 years of experience developing scalable, user-focused applications. Skilled in JavaScript (TypeScript), React, React Native, and Node.js, with a strong track record of building products end-to-end that improve user engagement and system performance. Adept at designing RESTful APIs, optimizing databases, and implementing CI/CD practices. Passionate about building intuitive travel and data-driven applications that enhance user experience.

TECHNICAL SKILLS

Languages: JavaScript (ES6/TypeScript), Java, Python, SQL, Kotlin, C++

Frontend: React.js, React Native, Angular, Bootstrap, HTML5, CSS3

Backend: Node.js, Express.js, Spring Boot, Hibernate

Databases: PostgreSQL, MySQL, Oracle, MongoDB

Tools/Platforms: GitHub, Bitbucket, Docker, Kubernetes, AWS, GCP, Jenkins, Terraform, Redis, Elasticsearch

Testing/Automation: Jest, Selenium, Postman, JUnit, SOAP UI

Methodologies: Agile/Scrum, Product-Driven Development

WORK HISTORY

Lewis University | Student Employee

Jun 2024 – May 2025

Built interactive student portals with React.js frontend and Spring Boot/Node.js backends, improving data load times by 40%.

Designed APIs and integrated chatbots with Node.js and React, increasing student engagement by 25%.

Automated student record processing with Java batch jobs and Oracle PL/SQL, reducing manual errors by 35%.

Refactored legacy code to TypeScript-based services, improving maintainability and reducing bugs.

Collaborated with stakeholders on product features, designing intuitive UIs in Figma and rapidly deploying updates.

Accenture | Associate Software Engineer

Jul 2021 – Jul 2023

Developed full-stack applications with React.js, Angular, and Java/Spring Boot microservices.

Designed and deployed data pipelines with Kafka and Node.js for real-time data processing (35% increase in throughput).

Built RESTful APIs and authentication systems (OKTA, JWT), ensuring robust and secure integrations.

Enhanced system scalability by deploying on AWS with Docker/Kubernetes and implementing CI/CD pipelines.

Conducted code reviews and implemented automated testing (Jest, Selenium), reducing defects by 50%.

Optum | Intern

May 2020 – Jun 2021

Developed secure APIs and implemented JWT authentication, reducing unauthorized access attempts by 90%.

Optimized SQL queries in Oracle/PostgreSQL, cutting execution times by 30%.

Collaborated with UX designers to build responsive, user-friendly web applications.

Authored backend components in Java and integrated AWS services, reducing technical debt by 40%.

EDUCATION

Lewis University, IL — Master of Science, Data Science (May 2025)

CVR College of Engineering, Hyderabad, India — Bachelor of Technology, Computer Science (Jul 2021)
