

Prakhya Busireddy

Java Full Stack Developer

Location: Aubrey, TX || **Mail:** prakhyabusireddy23@gmail.com || **Ph. No.:** (201)977-0028 || [linkedin.com/in/prakhyabusireddy](https://www.linkedin.com/in/prakhyabusireddy)

Professional Summary:

- Full Stack Developer with 4 years of experience in crafting robust and scalable web applications with extensive experience in implementing microservices architecture, CI/CD pipelines and cloud platforms (AWS) to optimize development and deployment processes.
- Proficient in both frontend and backend development, adept at leveraging React, Angular, Spring Boot and Node.js to build dynamic and user-centric solutions. Proven ability to deliver high-performance applications with a focus on security, scalability, and user experience.
- Possessing a strong foundation in Java, JavaScript, and database technologies (PostgreSQL, MySQL), I excel in designing efficient data structures and algorithms. Demonstrated success in collaborating with cross-functional teams to achieve project goals and exceed client expectations.

Technical Skills:

Front-End Frameworks:	HTML, CSS, Bootstrap, UI Material, SASS, JavaScript, Typescript, ES6, React JS, Redux, React Hooks, Angular.
Back-End Frameworks:	REST API, RESTful API, Webservice, Microservices, Java, Spring Boot, Spring MCV, Spring Data JPA, Hibernate ORM, Node JS, Express JS.
IDEs:	NetBeans, IntelliJ IDEA, Eclipse.
Web Services:	RESTful, SOAP.
Databases:	SQL, MongoDB (NoSQL), PostgreSQL, MySQL.
CI/CD & Tools:	Jenkins, Code Ship.
Testing tools:	JUnit, Mockito, React Testing Library, Jest.
Cloud & Deployment:	AWS, Docker.
Web Server:	Apache Tomcat.
Other Skills:	Agile, Jira, Git, Scrum, GitHub, Bitbucket, Swagger Open API.
Operating Systems:	Windows, UNIX, LINUX, Mac OS.

Education:

Master of Information Technology - University of Cincinnati, Cincinnati, OH, USA.

Bachelor of Civil Engineering – Jawaharlal Nehru Technological University, Hyderabad, India.

Professional Experience:

Cardinal Health – OH | Java Full Stack Developer | Aug 2023 - Current

- Implemented responsive UI components using React JS, reducing load time by 25% through efficient state management and DOM manipulation. Collaborated with the QA team to define test cases, ensuring comprehensive test coverage and reducing defect leakage by 30%.
- Developed and integrated RESTful services using Spring Boot, ensuring seamless data exchange between frontend and backend systems.
- Effectively leveraged a range of AWS services, including EC2 for computing power, RDS for managed database solutions, and S3 for scalable storage, to deploy and scale healthcare applications.
- Collaborated with cross-functional teams in an Agile environment to prioritize and resolve JIRA tickets, leading to a 20% increase in sprint efficiency. Implemented authentication and authorization mechanisms using OAuth2, enhancing application security and user trust.
- Optimized the development workflow by utilizing Git for version control, which facilitated efficient collaboration among team members.
- Implemented rigorous unit testing protocols using JUnit for Java-based applications and Jest for JavaScript components, achieving an exceptional 95% code coverage. Designed and optimized PostgreSQL database schemas, resulting in a 30% enhancement in query performance.
- Developed and automated robust Continuous Integration/Continuous Deployment (CI/CD) pipelines with Jenkins, which streamlined the deployment process and reduced deployment time by 40%.
- Participated in Scrum ceremonies, contributing to sprint planning, retrospectives, and daily stand-ups to maintain project alignment and momentum. Developed a dynamic dashboard for real-time data visualization, improving data accessibility for healthcare providers.

Brane Enterprises – Hyderabad, India | Java Full Stack Developer | May 2019 – Jul 2022

- Enhanced transaction processing speed by 40% through the implementation of a microservices architecture, enabling parallel processing and reducing system latency.
- Increased user engagement by 35% by integrating real-time notifications using WebSockets, ensuring users receive instant updates on critical financial activities.
- Reduced deployment time by 50% by implementing CI/CD pipeline using Docker/Jenkins, resulting in faster & more reliable software releases.
- Implemented advanced security protocols (e.g., SSL/TLS encryption, OAuth 2.0 authentication) to safeguard sensitive financial data, ensuring compliance with industry standards like PCI-DSS.
- Integrated third-party APIs for payment processing (e.g., Stripe, PayPal) and fraud detection (e.g., FraudLabs Pro, MaxMind), improving transaction security and customer trust.
- Collaborated with cross-functional stakeholders (e.g., product managers and business analysts) to define and refine application requirements and specifications, ensuring alignment with evolving business objectives and regulatory requirements.
- Designed and managed relational databases using MySQL, optimizing complex queries and indexing strategies to support high-performance transaction processing and data integrity.
- Developed and secured RESTful APIs to facilitate seamless and secure data exchange between front-end (Angular) and back-end systems (e.g., Spring Boot, Node.js), ensuring scalability and reliability.
- Worked on User Acceptance Testing (UAT), gathering detailed feedback from end-users and iteratively improving the financial application's performance and usability, achieving a 20% increase in customer satisfaction scores.
