

PRAMILA PANDEY

Recent MS graduate seeking data analyst, business intelligence, and data science roles

📍 SF Bay Area, California 📞 707-438-5581 ✉ pramilapandey436@gmail.com

EDUCATION

Master of Science in Information Technology

Mar 2023 - Mar 2025

University of West Florida

Core Coursework:

- Data Visualization
- Trends in Data Analytics
- Cloud Computing Architecture
- Programming for IT
- Data Mining
- Database Systems
- Network Performance Monitoring
- Operating Systems

PROJECTS

Social Media Data Analytics Platform (Capstone Project)

Developed end-to-end cloud-native analytics platform processing 100K+ social media posts daily from Twitter, Facebook, and Instagram APIs. Implemented real-time sentiment analysis using NLP techniques, automated ETL pipelines, and interactive dashboards. Achieved 94% sentiment classification accuracy and reduced data processing time by 60% through serverless architecture.

AWS EC2 S3 Kinesis Lambda Tableau Python NLP Pandas

Intelligent Calorie Tracker & Recipe Recommendation System

Built machine learning-powered nutrition app integrating multiple APIs for personalized meal recommendations. Developed predictive models for calorie estimation with 92% accuracy, created dynamic visualizations for nutrient tracking, and implemented recommendation algorithms based on dietary preferences and health goals.

Python OpenAI API Gemini API R Tableau

Comprehensive Bike Share Data Analysis

Analyzed 2M+ bike-sharing records to identify usage patterns, customer segmentation, and revenue optimization opportunities. Performed statistical analysis revealing 35% increase in weekend usage, built predictive models for demand forecasting, and created executive dashboards resulting in data-driven expansion strategy for high-traffic locations.

SQL TimescaleDB PostgreSQL Python R ggplot2 Tableau Excel
Statistical Analysis

WORK EXPERIENCE

Support Engineer

May 2018 - June 2020

Build Change Nepal

Provided technical support for software applications and database systems while assisting teams with data management, system maintenance, and digital documentation processes.

TECHNICAL SKILLS

Programming

Python R SQL Java JavaScript
HTML Git C# Software QA & Testing
Automated Testing (Selenium)
Software Development Lifecycle Agile

Databases

PostgreSQL MySQL T-SQL SQLite
NoSQL Redis DynamoDB MongoDB

Data Analytics

Data Mining Statistical Analysis NLP
Sentiment Analysis Predictive Modeling
Regression Classification
Sampling (Statistics) Data Cleansing
Data Visualization Data Validation
Data Literacy

Tools & Libraries

Pandas NumPy Matplotlib Seaborn
ggplot2

Cloud & Platforms

AWS (most projects) Azure (SQL Server)
GCP (Big Query) Kinesis Lambda S3
EC2 CloudWatch IAM

Visualization

Tableau Power BI Excel Google Analytics
Jupyter Informatica R Matplotlib

CERTIFICATIONS

🔗 Google Data Analytics Professional Certificate

Comprehensive training in data analysis, visualization, and statistical methods using industry-standard tools

🔗 AWS Certified Cloud Practitioner

Foundational understanding of AWS cloud services, architecture, and best practices for data solutions
