

Pramodh AVG

Computer Science Engineer Specialized in Cyber Physical Systems

✉ hipramodhavg@gmail.com

☎ 8778224830

🌐 [LinkedIn](#)

🧠 PROFILE

Driven and detail-oriented individual with a passion for turning ideas into practical technology solutions. Thrive in learning new tools quickly, solving problems creatively, and contributing to meaningful, high-impact projects.

⚙️ SKILLS

Python

C

C++

HTML

SQL

Linux

🏆 CERTIFICATES

AI Using Google Tensor Flow

Deep Learning: Neural Networks & AI

Spoken Tutorial Project: Python/C
IIT Bombay

Microsoft Certified: Azure Fundamentals (AZ - 900)

Red Hat Certified System Administrator (EX200)

🎓 EDUCATION

B TECH Computer Science With Specialization In Cyber Physical Systems,
VIT Chennai, Chennai, India
2025

Computer Science (Informatics Practices)
PS Senior Secondary School, Chennai, India
2021

🌐 AREA OF INTEREST

Artificial Intelligence

Cloud

Internet of Things

☰ INTERSHIPS

FLSMIDTH

Intern at Digital And Operations Development

Nov 2021 - Dec 2021

- Optimized mechanical systems in cement and mining equipment, enhancing efficiency and reliability through data-driven analysis and collaboration with senior engineers.

- Led an energy reduction initiative by analyzing operational data, identifying inefficiencies, and implementing solutions, achieving significant energy savings.

🏆 PROJECTS

Dynamic Stall Occupancy Management System

Developed an AI-powered occupancy management system using YOLO, IoT (ESP32 with ultrasonic, PIR, and camera modules), and automated sensor placement via spatial analysis. Enabled real-time web dashboard visualization with plug-and-play WiFi/LoRa connectivity.

AI For Real Time Emotion Recognition

Built a real-time emotion recognition system using CNN-ResNet for facial and speech analysis, with MFCC for audio processing. Trained on CREMA-D, RAVDESS, TESS, and SAVEE datasets for improved accuracy.

Smart Door Lock Using ESP8266

Developed an IoT-based smart door lock using ESP8266 with Wi-Fi connectivity for remote control. Enabled secure and convenient access via a web interface on the same network.

Face Recognition Attendance System

Developed a real-time face recognition attendance system using Python, OpenCV, and Firebase. Implemented facial encoding for accurate identification and automated attendance tracking.

🏆 Extra Curricular Activities

VITC INTRA MUN'22 - Vellore Institute Of Technology

Committee Member - Logistics and Hospitality

- Managed board members venues & delegate hospitality. Ensured seamless events with attention to detail.

Sports Club - Vellore Institute Of Technology

Student Coordinator - Vibrance '23

- Student Coordinator for Run Against Drug Abuse Marathon
- Marketing and Event Mangement Committee Member
