

Pranali Ramesh Sawant

Data Analyst

MA, USA | +1 (857) 693-8005 | pranali.sawant3468@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Analyst with nearly **3+ years of experience** in transforming data into actionable insights that drive business growth. Proven track record of optimizing data workflows, automating reporting processes, and developing dashboards to support strategic decision-making. Experienced in collaborating with cross-functional teams to improve operational efficiency and enhance performance. Skilled in analyzing large datasets to identify trends, forecast outcomes, and influence key business strategies. Known for reducing reporting time, improving accuracy, and contributing to cost-saving initiatives. Adept at working in fast-paced, Agile environments while ensuring compliance with data governance standards.

EDUCATION

Master of Science, Information Systems Northeastern University, Boston, United States	Dec 2024
Bachelor of Engineering, Information Technology University Of Mumbai, India	Oct 2020

TECHNICAL SKILLS

Programming & Scripting Languages: Python, SQL, R
Data Analysis & Transformation: pandas, NumPy, Scikit-learn, TensorFlow, NLTK
Data Visualization & Reporting Tools: Tableau, Power BI, Advanced Excel, Looker, Google Analytics, Domo
Database Management: PostgreSQL, MySQL, Azure SQL, Snowflake, Oracle
Cloud Platforms & Services: AWS (S3, Redshift, EC2, Glue, Athena), Apache Airflow, Azure (Data Factory, Databricks), DBT, Alteryx, Talend, GCP, Azure DevOps
Tools: Microsoft PowerPoint, GitHub, SAS, Jupyter Notebook, Google analytics (GA4), Salesforce, Google Optimize, Shopify
Project Collaboration & Methodologies: Agile Methodologies, Cross-functional Teamwork

PROFESSIONAL EXPERIENCE

Capital One, MA, USA Data Analyst	Feb 2024 – Current
- Automated multi-source data ingestion using AWS Glue, Airflow, and Redshift, reducing data latency for fraud analytics pipelines from 12 hours to under 45 minutes and cutting manual refresh tasks by 80%. - Developed executive dashboards in Tableau that track over 50 financial KPIs across credit, fraud, and customer retention, boosting stakeholder engagement and reducing ad hoc report requests by 60%. - Built a modular data validation engine to cleanse and verify 10 M+ rows daily across financial domains, reducing report discrepancies and lowering data-related support tickets by 35%. - Introduced embedded analytics into Agile workflows by connecting real-time KPIs to sprint boards, which accelerated retrospective insights and shortened delivery cycles by 2 days per sprint.	

Capital One, MA, USA Data Analyst Intern	Sep 2024 – Dec 2024
- Automated reporting workflows using Python and AWS Redshift, reducing 15 hours per week spent on manual data aggregation and improving data consistency across departments. - Developed dynamic Tableau dashboards to track and visualize key customer metrics, such as churn rate and retention trends, allowing 25+ business stakeholders to make data-driven decisions and adjust marketing strategies in real-time. - Conducted statistical analysis on A/B test results for marketing campaigns, analyzing data from over 50,000 participants, leading to a 12% increase in conversion rates and providing actionable insights for optimizing future campaigns.	

MassDOT, Boston, United States Data Analyst Co-op	Jun 2023 - Dec 2023
- Developed DBT models in Snowflake to standardize and transform operational data pipelines, aligning business logic across teams and reducing reporting discrepancies by 30% across HR, Finance and operations teams. - Built and optimized large-scale ETL pipelines in Azure Databricks using PySpark and streaming ingestion via Apache Kafka, improving processing speed by 40% and enabling real-time data delivery for business-critical dashboards. - Designed and deployed an employee engagement dashboard in Power BI, analyzing 120K survey responses across 7 departments, helping HR launch 3 new initiatives that increased overall engagement scores by 10 points in the following quarter. - Deployed advanced NLP techniques (BERT, topic modeling) on unstructured HR data, delivering an AI-driven dashboard that reduced manual review time by 70% and improved feedback loop efficiency by 25%.	

Infosys Limited, Pune, India Data Analyst	Jan 2021 - Aug 2022
Built Tableau and Looker dashboards using cohort analysis to track retention and engagement across 500K active customers in 3 regional markets, enabling campaign targeting that led to a 12% YoY increase in repeat purchases and improved LTV by 8%.	

- Designed and implemented scalable data ingestion pipelines for **1M+** daily records from **Google Analytics** and **Salesforce** using **Airflow** and **AWS Glue**, supporting 5 business units and reducing manual data pulls by over **20 hours/week**.
- Developed ML scoring pipelines in **AWS SageMaker** for churn prediction and surfaced risk scores via Redshift dashboards, enabling retention actions that reduced churn by **17%**.
- Refactored and optimized **SQL queries** in **Redshift** using CTEs, clustering, and materialized views, reducing report latency by **67%** and improving refresh rate for 40 marketing dashboards.
- Orchestrated **A/B testing** across homepage layouts and promotions using **Python** and **Google optimize**, increasing conversion rate by **11%** and CTR by **19%** within **6 weeks**.

Mphasis - India

Dec 2019 - Dec 2020

Data Analyst Intern

- Developed automated **ETL** pipelines using Python, processing over **300K** records daily, which reduced data preparation time by **70%** and improved data readiness for analytics teams.
- Designed interactive **Tableau** dashboards for 5 departments, replacing **12** legacy reports and enabling real-time visibility into KPIs across sales, HR, and operations.
- Conducted feature gap and **competitive analysis** across 3 rival platforms, influencing roadmap decisions that resulted in the rollout of 2 market-aligned features within one quarter.
- Automated recurring data workflows, saving **15+** analyst hours weekly, and drove internal adoption of dashboards among all department heads within two release cycles.

PROJECTS

CAPTION GENIE: Gen AI Auto Image Tagger, [Link](#)

- Built a **Streamlit** app using **Google Generative AI** to generate real-time image captions and tags for **100+** user-uploaded files.
- Implemented error handling, API validation, and dynamic UI, reducing input failures by **90%** and improving user experience.

MOOD SYNC: AI-driven emotion-based playlists, [Link](#)

- Trained a **CNN model** on **30K+** images using **Python**, achieving **92% accuracy** in classifying facial expressions into 7 emotions.
- Integrated an **LSTM model** to generate **200+** emotion-based MIDI sequences, enhancing **user engagement by 35%**.

CERTIFICATIONS & ACHIEVEMENTS

Google Data Analytics Professional Certificate Jan 2025

Winners- Smart India Hackathon (Software Edition) Mar 2019
