SUMMARY

Results-driven Data Engineer with 4+ years of experience in data pipelines, ETL processes, and cloud-based solutions. Skilled in big data technologies, cloud platforms (AWS, Azure), and data warehousing. Strong expertise in Apache Spark and ETL tools to build scalable, high-performance data systems. Passionate about solving complex data challenges and enabling data-driven decision-making.

TECHNICAL SKILLS

Big Data & Data Processing: Hadoop (HDFS, Hive, YARN), Apache Spark (Spark SQL, PySpark), Apache Kafka, Hadoop MapReduce

ETL & Data Pipelines: Talend, Apache NiFi, AWS Glue, Apache Airflow, Apache Kafka, AWS Kinesis

Data Warehousing: Amazon Redshift, Google BigQuery, Snowflake, Teradata

Cloud Platforms: AWS (S3, RDS, Lambda, Kinesis, Glue), Azure (SQL Database, Data Factory), GCP (BigQuery, Cloud Storage)

Databases: NoSQL (MongoDB, Cassandra), Relational (MySQL, PostgreSQL, SQL Server, Teradata)

Programming & Scripting: Python (Pandas, NumPy, PySpark), SQL, Bash (Shell Scripting)

Data Governance & Security: Apache Atlas (Metadata Management, Data Lineage)

Machine Learning (Basic Exposure): Linear/Logistic Regression, Decision Trees, Random Forest, Spark MLlib

Business Intelligence & Visualization: Power BI, Tableau

CI/CD & DevOps: Jenkins, GitLab CI

Version Control & Collaboration: Git, GitHub, Jira, Confluence

EXPERIENCE:

Data Engineer, Verizon Wireless Systems

Aug 2024 to Present

- Built and optimized 20+ scalable ETL pipelines using Apache Airflow, Databricks, and Azure Data Factory, reducing data processing time by 30%.
- Architected and managed terabyte-scale data lakes and warehouses on Google BigQuery and Azure Synapse Analytics, improving query performance by 25%.
- Developed real-time data streaming solutions handling 500K+ events per second using Apache Kafka and AWS Kinesis, enhancing data availability.
- Processed 5TB+ of data daily using Apache Spark (PySpark, Spark SQL), reducing batch processing time by 40%.
- Implemented data security and governance using Azure Purview, improving compliance and reducing security risks.
- Automated 50+ CI/CD workflows with Azure DevOps and Terraform, accelerating data pipeline deployment.
- Designed and maintained 15+ dashboards in Power BI and Google Data Studio, improving data visualization and decision-making.

Data Engineer, Coforge

Jan 2019 to Jul 2022

- Developed and optimized 15+ ETL pipelines using Apache NiFi, Talend, and AWS Glue, improving data integration efficiency by 30%.
- Designed and maintained data warehouses on Amazon Redshift and Snowflake, supporting 100+ TB of analytical data for scalable insights.
- Processed 5TB+ of data daily using Apache Spark (PySpark, Spark SQL) and Hadoop (HDFS, Hive, YARN), reducing data transformation time by 40%.
- Implemented data governance and tracked lineage for 100K+ data assets using Apache Atlas, ensuring compliance with industry regulations.
- Deployed and monitored 50+ CI/CD pipelines with Jenkins and GitLab CI, automating data workflows and reducing deployment time by 35%.
- Created and maintained 20+ interactive dashboards using Tableau and Looker, enhancing business intelligence insights.

EDUCATION:

- **Master of Science:** Management Information Systems (MIS) University of Colorado Denver – Denver, CO
- **Bachelor of Engineering:** Mechanical Engineering CVR College of Engineering – Hyderabad, India

CERTIFICATIONS:

- Full-Stack Automation Engineer in AI & Data Analytics
