Profile Summary

Highly motivated M.S. in Information Technology graduate proficient in designing and implementing ETL/ELT pipelines using Azure Data Factory and dbt for comprehensive data integration and transformation. Expertise in Snowflake, SQL Server, ANSI SQL, and Python, coupled with a strong foundation in data warehousing principles, including Star/Snowflake schema modeling. Adept at leveraging Power BI and Tableau for insightful data visualization and possesses strong analytical skills, incorporating statistical concepts to drive data-driven decisions. Skilled in software validation, REST API integration, and Agile workflows, delivering scalable business intelligence solutions. Committed to maintaining data accuracy and data consistency throughout the data lifecycle. Excellent communication skills, adept at collaborating with stakeholders to gather data requirements. Seeking a Junior Data Engineer role to contribute to data-driven innovation and support enterprise success. Authorized to work in the U.S.

Skills

- **Programming Languages:** Python, SQL (ANSI SQL, T-SQL), C, C# (Basic)
- **Cloud Technologies:** Azure Data Factory, Snowflake, AWS
- **Databases:** SQL Server, DBMS, Relational Databases, Oracle, MongoDB
- **ETL/ELT Tools:** Azure Data Factory, dbt, SSIS (Familiar)
- **Business Intelligence:** Power BI, Tableau
- **Tools:** JIRA, Azure DevOps, MS Office, REST API, Microsoft Excel
- **AWS Services :** S3, RDS, AWS Redshift.
- **Platforms:** Windows, Linux
- **Methodologies:** Agile Scrum, Software Development Lifecycle, Data Integration
- **Concepts:** ETL/ELT Pipelines, Data Warehousing, Star/Snowflake Schemas, Data Modeling, Statistical concepts, Data Quality, Data Accuracy, Data Consistency.

Education

Master of Science, Information Technology

May 2025

University of Cincinnati, Cincinnati, OH

GPA: 3.9/4.0

Relevant Coursework: Statistical Data Analysis, System Administration

Bachelor's in Electrical and Electronic Engineering

June 2022

Geethanjali College of Engineering and Technology, Telangana, India

GPA: 8.18/10

Experience

Data Analyst, Collaboration for Employment and Education Synergy

University of Cincinnati | IDD Education Center, Cincinnati, OH

April 2024 - Present

- Developed ETL pipelines using Azure Data Factory and SQL Server, integrating student performance data for 20+ users, enhancing reporting efficiency by 25%. Utilized Microsoft Excel to analyze data and present findings. Demonstrated analytical skills in identifying key performance indicators.
- Designed Power BI dashboards to visualize performance metrics, applying Star schema modeling to optimize data retrieval and stakeholder insights.
- Supported software validation by creating test cases and documenting processes in Azure DevOps, ensuring reproducibility in Agile sprints. Focused on maintaining data accuracy throughout the validation process.
- Analyzed user requirements, integrating REST API data feeds to streamline reporting for USGS projects, improving comprehension by 20%. Employed critical thinking skills to identify and resolve data integration challenges.

Programmer Analyst

February 2022 - December 2023

Cognizant Technology Solutions India Private Limited, Hyderabad, Telangana

- Built ELT workflows using Python and ANSI SQL for the "Tech Upgrade 2008 to 2019" project, validating data across eight applications with 80% data accuracy.
- Developed Power BI reports to visualize system performance, leveraging Snowflake schemas to enhance data warehousing scalability by 15%.
- Automated data transformation with Python scripts and SQL Server queries, reducing testing time by 30% and ensuring data consistency.
- Documented 500+ test cases and debugging steps in JIRA, supporting software development lifecycle and Agile scrum processes. Improved communication skills by providing clear and concise documentation to stakeholders.

Projects

Exploring Temporal Patterns and Their Impacts on Traffic Accidents

University of Cincinnati, Cincinnati, OH

January 2025 - May 2025

- Engineered ETL pipelines using Python, SQL Server, and Azure Data Factory to process traffic accident data, applying Snowflake schema for efficient data modeling.
- Integrated REST API data sources, enhancing data orchestration for scalable analytics.

Tech Upgrade Windows 2008 to 2019

June 2022- December 2023

Cognizant, Hyderabad, Telangana

- Validated data migration for eight applications using T-SQL and Python, achieving zero defects through automated ELT processes. Maintained a focus on data accuracy throughout the migration.
- Developed Power BI dashboards to monitor performance metrics, optimizing data warehousing with Snowflake schema designs.
- Authored 500+ test cases for data transformation, ensuring compliance with data engineering standards and Agile methodologies.

Accident Detection System using GPS and GSM

October 2021- April 2022

Geethanjali College of Engineering and Technology, Hyderabad, Telangana

- Programmed Python scripts for real-time IoT data processing, integrating with SQL Server for efficient data storage and retrieval.
- Optimized ETL workflows, reducing data latency by 40% for scalable data engineering applications.

Certifications

- Data Analytics Essentials (Cisco Networking Academy)
- SQL and Relational Database (IBM Developer Skill Network)
- Python for Data Science (Cognizant Learning)
