

Pranathi V
Java Full Stack Developer
Email: pranathivim23@gmail.com
Phone: 402-656-8690

PROFESSIONAL SUMMARY:

- I have around **8 years** of experience in **Java Full Stack Development, Software Development Life Cycle (SDLC) and Object Oriented Programming (OOPS)**, developing, and testing of Client/Server, Enterprise and Web Applications.
- Proven expertise in delivering enterprise solutions in **Financial, Investment Banking and Healthcare** domains.
- Well-versed in **Object Oriented Analysis & Design (OOAD)** using different design methodologies/process frameworks like SDLC and tools like **UML, Rational Rose**.
- Hands on experience in coding using **Java 17/11/8/7** to develop features of the applications from end to end.
- Extensive experience in using various **Design Patterns** such as MVC (Model –View-Controller), Singleton, Session Façade, Factory, DAO, Front Controller, and Business Delegate in the development of Multi-Tier distributed Enterprise Applications.
- Strong exposure to multiple **Application Servers** like Apache Tomcat, WebSphere, WebLogic and JBoss.
- Good experience in using **J2EE technologies** like JSP, Servlets, EJB, JDBC, Java Beans, JMS, RMI JNDI, XML and **Web Services** (RESTful and SOAP).
- Extensive experience using **Spring Framework** and ORM mapping tools like **Hibernate and iBatis**, which implements **Java Persistence API (JPA)**.
- Experience in developing enterprise applications using **Spring MVC, Spring Boot, Spring Cloud, Spring Batch, Spring Security and Spring Data**.
- Hands on experience in implementing **Microservices** based on **RESTful API** utilizing **Spring Boot with Spring MVC**.
- Experience working on **design and deployment of back-end integration system** using **AWS Services** like EC2, S3, Lambda, EBS, ECS, SQS, SNS, IAM, VPC, Route53, CloudWatch, CloudTrail and CloudFormation.
- Expertise in **designing and developing Web Applications** using JSP, JavaScript, HTML5, CSS3, JQUERY, AJAX, JSON, DOJO, XML, Node.JS, React.JS, Angular 5/7/9/11/13, Bootstrap and **Single Page Applications (SPA)** by using JavaScript MVC framework, AngularJS and ReactJS.
- Strong experience working on projects, implementing **Restful Services** (JAX-RS, Spring Boot), **SOAP** (JAX-WS, Apache CXF, WSDL, Apache Axis2) and configured using **Swagger** and WADL.
- Experience in Messaging Queue Services like **Apache Kafka, RabbitMQ, ActiveMQ and IBM MQ**.
- Good in using Continuous Delivery/Continuous Integration (CD/CI) tools like **Jenkins** to deploy the applications to AWS.
- Proficient with CI/CD pipelines to integrate **Java code** to align with **DevOps practices** using **Docker/Kubernetes**.
- Experience on Build Tools **Ant, Maven** for building and deploying applications to different environments.
- Hands on experience with Version Control Tools like **GIT, GitHub and SVN**.
- Experience in developing PL/SQL, Stored Procedures, Functions, Triggers and experience working with Databases like **SQL Server, Oracle, MySQL PostgreSQL and MongoDB**.
- Good experience in using **Log4J** for extensible logging, debugging and error tracing.
- Experience in using **JUnit, Mockito** for unit/integration testing of application components also involved in developing Test plans, Test Cases (Manual/Automated) and Test Procedures.
- Hands on experience in using bug tracking tools like **Jira and Confluence**.

TECHNICAL SKILLS:

Languages	Java 17/11/8/7, JavaScript, XML, Shell Scripting
J2EE Technologies	JSP, Servlets, EJB, JDBC, Java Beans, JMS, JNDI, XML
Web Technologies	JSP, JavaScript, HTML5, CSS3, JQUERY, AJAX, JSON, DOJO, XML, Node.JS, React.JS, Angular 5/7/9/11/13, Bootstrap
Frameworks	Spring, Hibernate, JPA, iBatis
Cloud Technologies	Amazon Web Services (AWS) - EC2, S3, Lambda, EBS, ECS, SQS, SNS, IAM, VPC, Route53, CloudWatch, CloudTrail and CloudFormation
Web Services	RESTful and SOAP
Application Servers	Apache Tomcat, WebSphere, WebLogic, JBoss
Messaging Queue Systems	Apache Kafka, RabbitMQ, ActiveMQ, IBM MQ
Containerization/Orchestration	Docker, Kubernetes
CI-CD/Build Tools	Jenkins, Maven, Ant
Version Control Tools	GIT, GitHub, SVN
Testing Frameworks	JUnit, Mockito
Bug Tracking/Logging	Jira, Confluence, Log4j
SQL/NoSQL Databases	SQL Server, Oracle, MySQL PostgreSQL, MongoDB
Operating Systems	Windows, Linux, MacOS

EDUCATION:

Bachelors in Computer Science and Engineering – JNTUH, India

PROFESSIONAL EXPERIENCE:

First Horizon Bank, Memphis, TN

Apr 2024 to till date

Java Full Stack Developer

Responsibilities:

- Deployed and developed the project using **AWS EC2, S3 Buckets, and Data pipeline, Elastic Bean Stalk, Lambda and Amazon Messaging Services (SQS)**.
- Utilized **AWS Lambda** platform to upload data into **AWS S3 buckets** and to trigger other Lambda functions developed drag and drop document editing using **ReactJS**.
- Deployed **Spring Boot** based Microservices, **Docker container** using **Amazon EC2 container services** and using **AWS Admin Console**.
- Created detailed **AWS Security groups** which behaved as virtual firewalls that controlled the traffic and allowed reaching one or more AWS EC2 instances.
- Performed **event orchestration** between the microservices using query-based polling and **AWS Lambda**.
- Responsible for developing the UI pages using **HTML5, CSS3, JavaScript, Bootstrap, JSON, jQuery, ReactJS, NodeJS and AJAX**.
- Developed various screens for the front end using **ReactJS** and used various predefined components from **NPM (Node Package Manager)**.
- Used **Amazon CloudWatch** to monitor AWS services and Amazon CloudWatch logs to monitor application.
- Secured API's by implementing OAuth-based authentication/authorization scheme using **Spring Security**.
- Provided **Hibernate** configuration file and mapping files, also involved in integration of Spring with Hibernate libraries.
- Developed **Swagger** based UI to communicate with different stakeholders involved in the system.
- Implemented **Kubernetes** manifests, helm charts for deployment of microservices into K8s clusters
- Worked on **MongoDB** and wrote code for loading JSON data from the server-side to find, update, save, and insert data.
- Maintained log delivery system by creating producer, consumer, and broker architecture using **Apache Kafka**. Used **Apache Maven tool** for the build and deployment of the application.
- Worked on CI/CD Continuous integration and Continuous deployment with **Jenkins**.
- Used **Git** for version controlling and regularly pushed the code to **GitHub**.
- Designed unit tests using **JUnit framework** in a test-driven development (TDD) approach and implemented unit and integration test suites.

Environment: Java 17/11, Amazon Web Services (AWS) – (EC2, S3, Lambda, EBS, SQS, CloudWatch), Spring Cloud, Spring Boot, Spring MVC, Spring Security, Hibernate, HTML5, CSS3, JavaScript, Bootstrap, JSON, jQuery, ReactJS, NodeJS, Node Package Manager (NPM), AJAX, Restful Web Services, Apache Tomcat, Docker, Kubernetes, Swagger, Apache Kafka, MongoDB, Maven, Jenkins, Git, GitHub, Windows, Junit, Jira

GreatAmerica Financial Services, Cedar Rapids, IA

Jan 2022 to Mar 2024

Java Full Stack Developer

Responsibilities:

- Designed and developed Microservices business components using **Spring Boot**.
- Deployed Dockerized Spring Boot application to **AWS** using **Elastic Bean Stalk (EBS)**.
- Developed and maintained applications written for **Amazon S3, Amazon EC2, Amazon SQS, Amazon SNS and AWS CloudFormation**.
- Designed and developed the framework to consume the web services hosted in **Amazon EC2 instances**.
- Responsible for creating efficient design and developing User Interaction screens using **HTML5, CSS3, Bootstrap, JavaScript, Typescript, Angular 9/11 and NodeJS**.
- Enhanced application performance by **Angular 11** Component based development in view of future Angular framework transitions.
- Implemented **Single Sign-On (SSO)** and enhanced authentication and authorization of users' identity with **OAuth 2.0** and **Spring Security**.
- Developed Object-Relational (O/R) mapping and Data Access Object (DAO) persistence layer using **Hibernate**.
- Worked on **Java Collections API** for handling the data objects between the business layers and the frontend.
- Used **Spring MVC (Model View Controller)** to handle/intercept the user requests and used various controllers to delegate the request flow to the Backend tier of the application.
- Designed and deployed XML files for Dispatcher Servlets, Application Context and Controllers to implement the **Inversion of Control (IOC)** module in Spring.
- Utilized **Spring AOP** to implement the cross concerns that includes Logging, Exception Handling and Transaction Management.
- Developed Web services to allow communication between application through **RESTful** web services.
- Used **GIT** for version control and **Jenkins** for continuous Integration and continuous deployment (CI/CD).
- Used various queuing systems like **Apache Kafka** etc., SFTP solutions using Spring Integrations.
- Ported the application's native application and database servers from **WebSphere/Oracle to Tomcat/PostgreSQL**.
- Used **Junit** framework for performing unit & integration testing by writing test cases.
- Tracked day to day tasks and progress of the user stories, bugs, improvements, enhancements in **JIRA**.

Environment: Java 11, Amazon Web Services (AWS), Spring MVC, Spring Boot, Spring Security, Spring Batch, Spring AOP, Spring IOC, Hibernate, HTML5, CSS3, Bootstrap, JavaScript, Typescript, Angular 9/11/13, NodeJS, GIT, Jenkins, WebSphere, Tomcat, Oracle, PostgreSQL, Apache Kafka, Windows, Junit, Jira

Augmedix, San Francisco, CA

Sep 2019 to Dec 2021

Java Developer

Responsibilities:

- Involved in the complete **Software Development Life Cycle (SDLC)** including Requirement Analysis, Design, Implementation, Testing and Maintenance.
- Implemented **Java 8** concepts like collections, multithreading, object-oriented programming, exception handling to develop an application module using test driven methodology.
- Implemented the **Microservices** to base on **REST API** utilizing **Spring Boot** with **Spring MVC**.
- Used **Spring Security** for Authentication and Authorization of the application.
- Executed **Design Patterns** like singleton factory, abstract factory, decorative and business delegate design patterns.
- Designed use case diagrams, class diagrams, and sequence diagrams as a part of Design Phase using **Rational Rose**.
- Designed and integrated the full-scale **Spring/Hibernate** persistence solution with the application architecture.
- Used **Spring** for **Dependency Injection** for plugging in the **Hibernate DAO objects** for the business layer.
- Used **Spring Batch** to build the POJO-based development approach of the Spring Framework.
- Used **HTML5, CSS3, JavaScript, JSP, JQuery, Angular 5 and Bootstrap** in front end.
- Implemented Service Oriented Architecture (SOA) using **JMS** for sending and receiving messages while creating web services.
- Built, configured and deployed Web components on **WebLogic Application Server**.
- Developed **Web Services** for data transfer from client to server and vice versa using **Apache Axis, SOAP and UDDI**.
- Wrote complex **SQL queries** and programmed stored procedures, and control files for loading large amounts of data using **Oracle**.
- Used **JUnit Framework** for the unit testing of all the java classes.
- Used **JIRA** for defect management and to keep track of bugs and issues.
- Fixed software bugs for existing application suite and optimized code for better performance.

Environment: Java 8, J2EE, Spring Boot, Spring Security, Spring Batch, Hibernate, HTML5, CSS3, Bootstrap, JavaScript, Angular 5, Typescript, NodeJS, Rational Rose, Apache Axis, Oracle, WebLogic, Windows, Junit, Jira

ConsenSys Software Inc., Fort Worth, TX

Nov 2017 to Aug 2019

Java/J2EE Developer

Responsibilities:

- Participated in analysis, specification, design, and implementation and testing phases of **Software Development Life Cycle (SDLC)** and used **Agile Methodology (SCRUM)** for developing application.
- Developed the application using **Spring MVC Framework** that helps in separating the business logic, presentation logic and navigation logic.
- Used **Hibernate ORM** to integrate with business application with Oracle Database where Hibernate template is used to implement business logic.
- Developed Hibernate mapping files for the Object Relational Mapping while configuring Hibernate.
- Used **Servlets** standard validations as the controllers for business logic and using **JDBC, XML** parsing techniques using **MVC**.
- Developed **JavaScript** for all client-side validations and developed GUI using **HTML, CSS, JSTL, and XSL**.
- Wrote technical design document with the class, sequence, activity diagrams in each use case.
- Developed web-based applications using **Web Services, both SOAP/WSDL and REST**.
- Used **Web services (SOAP)** for transmission of large blocks of XML data over HTTP.
- Developed **RESTful Web services** client to consume **JSON** messages.
- Wrote **SQL queries** and Stored Procedures for interacting with the Oracle database.
- Implemented the coding standards, review the code and fixing all the code.
- Developed **JUnit** test cases for the developed application.
- Used **Eclipse** Integrated Development Environment to code, debug and test application modules.
- Worked on **Log4J** to validate functionalities.
- Used **JIRA** tool for tracking new requirements, enhancements, and bugs.

Environment: Java 8/7, J2EE, Agile, Spring MVC, Hibernate, Servlets, JDBC, XML, JSON, Restful, SOAP, Eclipse, SQL, Oracle, Log4j, Junit, Jira
