EDUCATION

Purdue University - Bachelor of Science in Data Science with Management Minor

Aug 2025

- Courses: Python Programming, Statistics Programming in R, Object-Oriented Programming, Discrete Math, Data Structures and Algorithms, Mathematical Probability, Linear Algebra, Organizational Computing
- Organizations: Society of Women Engineers, CS Women's Network, Women in Analytics, GenHERation

SKILLS

Languages: Python, SQL, R, SAS, PySpark, Java, Statistical Modeling, Predictive Modeling, Advanced Excel, Data Analysis, CSS, HTML

Technologies/Framework: Databricks, Tableau, PowerBI, PyTorch, ReactJS, Git, Unix, Node.js, Google BigQuery, R Shiny

WORK EXPERIENCE

John Deere – Data Science and Analytics Intern

June 2025 – August 2025

Assisted the eCommerce team in applying data science and analytics towards optimizing product sales on shop.deere.com

- Drove an estimated 2% revenue increase by initiating "Frequently Bought Together" panel on the add-to-cart page to generate product recommendations, enhancing user experience using FP-Growth model alongside predictive modeling and data mining techniques
- Analyzed sales data using cloud-based analytics platforms, PySpark, and SQL to automate monthly reports on top departmental maintenance essential items, generating actionable customer insights and regional demand patterns

Indy Autonomous Challenge – Data Analyst and Machine Learning Researcher

August 2024 – December 2024

Partnered with fully autonomous Indy race cars to perfect multi-agent depth estimation using their multi-modal sensor data

- Pioneered advanced analytics solutions, implementing machine learning algorithms to understand complex depth estimation challenges using multi-modal sensor data
- Built robust data foundations by processing structured and unstructured datasets with SQL and Python, enabling real-time decision-making capabilities for multi-agent scenarios

SWARMS Simulation – Data Analyst and Machine Learning Drone Researcher

December 2023 - May 2024

Worked with the Camera Team to maximize object detection for the versatile robotics simulation platform

- Deployed PyTorch-based computer vision models to sharpen object detection and classification, ensuring realistic adaptability within dynamic simulated environments, improving detection by approximately 15% and building reputable analytics solutions
- Optimized object detection by labeling images with Roboflow and training a custom YOLOv5 model

Clever Education Solutions - Software Engineer Intern

March 2024 – August 2024

Collaborated on front-end refinement of Cordelia, a cutting-edge cloud-based student-management platform

- Developed and tested across the project lifecycle using JavaScript, ReactJS, Node.js, HTML, CSS while managing over 260+ scripts
- Spearheaded interactive functionalities on the front end of cloud-based platform, such as document access buttons and a student report creation tool, catering to over 800 students, with seamless data integration using PostgreSQL, all through Docker
- Collaborated across business, product, and tech teams to build customer-focused solutions, implementing interactive dashboards and automated report generation tools

PROJECTS

FlexiPrice - Python

May 2025

A dynamic pricing platform that adjusts product prices based on seasonal demand to optimize revenue

- Engineered predictive modeling solution using Random Forest regression model and time series analysis with 94% accuracy to predict optimal price points, processing over 740,000 historical pricing records across multiple markets and regions
- Facilitated data mining techniques and statistical modeling to achieve 5% revenue growth during peak seasons while reducing markdown losses by 6% through optimized pricing strategies

LEADERSHIP EXPERIENCE

Alpha Kappa Psi - Alumni Relations Committee Head

May 2024 – May 2025

- Organized data-driven networking strategy for corporate and alumni events with over 100+ participants, while acting as a primary liaison and point of contact for various external companies and partners
- Designed and maintained an alumni database, applying strategic problem-solving to facilitate targeted outreach and relationship management, and secured 23 corporate partnerships, utilizing Excel for record organization
