"A Data professional with experience in diverse industries & co-founding a startup, I bring expertise in product management, marketing, predictive, & financial analytics, driving business growth using R, Python, PowerBI, Tableau, SQL & Oracle."

SKILLS

Languages	: R, Python, SQL, C, HTML
Databases	: MySQL, SQL Server, Oracle
Analytics & BI	: Tableau, Power BI, Power Apps, Looker, Retool, MS Excel, Salesforce, Google Analytics, Visio, Lucid Charts, Figma
ML Libraries	: Pandas, NumPy, Matplotlib, Seaborn, Sklearn, XG Boost, Regression, Random Forest, Decision Trees, K-means
Soft Skills	: Risk, Budget, Quality Management, Demand Planning, Technical Analysis, P&L valuations
Certificate	: Business Intelligence (Udemy) , SQL , Bloomberg Market Concepts , Rice University – Project management , Lean

EXPERIENCE

Vorto, USA – Operations Manager	Aug 2024 – Present
• Planned logistics operations in CPG across East North America, leading a team of 12 achieving weekly cost savings of \$200K. • Improved fleet utilization by automating driver start times based on historical load count & readiness, resulting in a 100% increase in turn rate and a \$450 per shift uptick in gross driver earnings. • Developed automated ETA notifications using OpenAI API, enhancing customer visibility and reducing manual intervention. • Analyzed performance metrics using SQL, Tableau, and Python, and revamped the driver facing app with automated workflows and adding features to minimize driver support tickets from 1000 per day to 200 per day. • Automated inventory forecasting based on inbounds/outbounds, trailer depletion rates, warehouse capacity, enabling demand-driven ordering in SAP to optimize delivery schedules achieving an OTP of 94%. • Led stakeholder engagement with internal & external partners, gathering feedback to inform feature enhancements and streamline product deployment resolving routing issues, customer production shutdowns and over pooling.	
Vertex Pharmaceuticals, USA – Data Associate	Jul 2022 – Dec 2022
• Workforce Planning: Visualized HRIS data in PowerBI, revealing 8% gap in high potential employee retention rate facilitating talent pipeline analysis. • Financial Analysis: Identified a 21% non-participation rate on analyzing Leadership Development Trainings (LDTs) in Python & PowerBI leading to strategic process improvements translating to \$85,000 in savings. • Organizational Impact: Led cross - functional team to develop an automated nomination system using Power App, Power Automate & SQL Server for LDTs benefiting 4000+ employees. • Stakeholder Management: Managed Harvard's Learning Management System (LMS) handled change requests and built reports through Business Intelligence Reporting Tool (BIRT).	
Sai Shipping & Logistics, India – Business Data Analyst	Dec 2019 – Jun 2021
• Supply Chain Optimization: Developed lead time prediction model in Python, analyzed in Tableau with freight solutions to expedite Proof of Deliveries (PODs) and negotiate contracts with vendors, yielding a \$20,000 revenue increase. • Project Management: Led A/B testing with SAP HANA & Python to optimize order fulfillment strategies (zone vs batch picking), realizing a 20% reduction in fulfillment errors & 8% savings per order with zone picking. • Sales & Operation Planning (S&OP): Built dashboards in SAP BI to track inventory turnover, purchase orders, stockout rates & carrying cost for 100k+ shipments, enabling efficient cycle count planning.	
SalonTree - Co-Founder/Chief Executive Officer (CEO)	May 2019 – June 2020
• Innovation & Growth: Revolutionized grooming industry targeting latent revenue potential of up to \$2.5 billion for men. • Product Strategy: Developed a Salon Management platform as a part of New Product Launch (NPL), for customers & staff, optimizing bookings, check-ins, retail, & inventory management thereby onboarding 50+ salon chains across India. • Implemented targeted marketing campaigns, resulting in 60% more online bookings and boosted business growth by 30%.	

PROJECTS

Salary Estimator – Negotiation Tool (Python, Sklearn, streamlit)	Nov 2023 – Dec 2023
• Scraped 4000+ rows of data from Glassdoor API using Selenium then developed and optimized a Machine Learning (ML) prediction model to estimate salaries for jobs for informed negotiations with an accuracy of 92.34%. • Developed and deployed the model on streamlit based on Linear, Lasso Regression & Random Forest optimized using XGBoost.	
360 Huntington Fund - Financial Modeling (Advanced Excel)	May 2023 - Aug 2023
• Developed Discounted Cash Flow (DCF) & Dividend Discount Model (DDM) and analyzed financial statements, revenue, competition, and growth for Walmart (WMT) stock to advise a \$35k buy and W.P. Carey (WPC) to divest a \$27k position. • Conducted a comprehensive risk assessment of the existing stocks held by the fund and created quarterly earnings reports.	
Analysis of Major League Baseball (R, Flourish, Data Wrapper, Google Sites)	Jan 2023 - May 2023
• Performed data mining & Exploratory Data Analysis (EDA) on 110,000+ rows to identify key trends for an in-depth analysis. • Analyzed statistical factors and player metrics, to gain insights into the top-performing teams, and their success contributors.	

EDUCATION

Northeastern University, Boston, USA	MS in Engineering Management	August 2023 (GPA: 3.6)
Guru Gobind Singh Indraprastha University, India	B. Tech in Mechanical Engineering	June 2021 (GPA: 3.6)
