Work Experience

Lead Software Engineer – Easley Dunn Productions, Inc.

July 2025 – Present

- Integrated REST APIs, telemetry logs, and SQL-based validation, which led to a 30% reduction in integration failures and ensured production-ready builds for release.
- Managed the Unity integration pipeline for 5 FMG subsystems, achieving 95% schema and runtime validation coverage across test builds.

Software Engineer – Verasys Technologies Ltd.

Mar 2021 – Apr 2023

- Led the end-to-end development of certificate management modules using Java and Spring Boot, leading to a 28% increase in reliability of enterprise digital certificate issuance.
- Built responsive web interfaces with JSP, HTML, CSS, and jQuery to streamline multi-step verification, resulting in a 32% reduction in user onboarding time.
- Created and integrated REST APIs for identity verification and digital signing, which improved inter-service communication by 37%.
- Traced API logs and optimized service logic to resolve production bottlenecks, leading to a 26% enhancement in system stability during high-volume usage.
- Designed SQL databases, stored procedures, and scheduled jobs to optimize certificate and signing workflows, which accelerated request processing speed by 30%.

Support Engineer – Mphasis Ltd.

Jan 2020 – Mar 2021

- Resolved Tier 2 and Tier 3 support escalations for Stearns Lending during critical patch cycles, which resulted in improved production stability.
- Designed and implemented ServiceNow workflow automations in coordination with operations teams, leading to a 40% reduction in incident resolution.
- Collaborated with cross-functional teams to analyze recurring production issues, achieving permanent fixes that enhanced system reliability.

Education

California State University, Fullerton

May 2025

Master of Science, Computer Science

GPA: 3.9

Coursework: Advance Algorithms, Advance Database, Web-Backend Engineering, Software Architecture, (Kotlin) Android Development.

Technical Skills

- **Programming & Backend:** Java, Python, JavaScript, TypeScript, Node.js, Spring Boot, REST APIs, Microservices, OAuth2, JWT
- **Frontend:** React, JSP, HTML5, CSS3, jQuery, Bootstrap, Responsive Web Design
- **Databases & Storage:** MySQL, PostgreSQL, MongoDB, DynamoDB, Amazon RDS
- **Cloud & DevOps:** AWS (EC2, Lambda, S3, API Gateway, SQS, SNS, EventBridge, CloudWatch), Git, Maven, Jenkins, Docker, CI/CD
- **Testing & Data:** JUnit, Postman, PySpark, scikit-learn, ETL Pipelines, Feature Engineering

Projects

Airline Delay Prediction | Stack: PySpark, HDFS, PostgreSQL, scikit-learn, GridSearchCV

- Achieved 35% improvement in delay prediction accuracy by implementing Ridge regression with GridSearchCV and feature-engineered model pipelines.
- Processed millions of airline records efficiently through a distributed PySpark ETL pipeline on HDFS.

WeatherWise | Stack: React, Node.js, MongoDB, OpenWeather API

- Delivered a real-time weather application that eliminated ad clutter and provided accurate forecasts, helping users access location-based weather updates 35% faster than public web portals.
- Engineered JWT-secured sessions and automated data cleanup with node-cron, which reduced expired data accumulation and prevented query slowdowns in MongoDB collections.

AI Content Control | Stack: React, Node.js, PostgreSQL, OpenAI API

- Increased content relevance for social feeds by 40% by developing an AI-driven filtering tool using regex pipelines and OpenAI API for text evaluation.
- Secured user data and outputs by implementing JWT authentication, schema validation with Zod, and PDF-safe export mechanisms.

Certifications

- **AWS Certified Developer Associate DVA-CO2** - Amazon Web Services
- **Career Essentials in Generative AI** - Microsoft and LinkedIn
- **Java: Advanced Concepts for High-Performance Development** - LinkedIn
