

Pranav Kumar Katikithala | Data Analyst II

☎ (305) 450 7753 | ✉ pranavdataanalyst9@gmail.com | www.linkedin.com/in/pranav-kumar-k

SUMMARY:

- Data Analyst with around 5 years of experience specializing in big data analysis, statistical inference, A/B testing, machine learning, ETL pipeline development, and data visualization.
- Proficient in SQL and NoSQL databases including PostgreSQL, SQL Server, MySQL, Oracle, and MongoDB, with expertise in writing complex queries, stored procedures, triggers, and window functions for advanced reporting and analytics. Skilled in designing and optimizing data pipelines using Apache Airflow and AWS Glue, with hands-on experience in data warehousing solutions such as Snowflake.
- Strong in creating interactive dashboards and reports using Tableau (Desktop, Server, Reader) and Power BI to deliver actionable business insights.
- Well-versed in requirements gathering and documentation (BRDs, FRDs, SRS) and familiar with Traceability Matrices to track requirement changes.
- Adept at data integration, ETL processes, and performance tuning for large-scale data systems, complemented by advanced Excel skills including PivotTables, VLOOKUP, and Power Query.

TECHNICAL SKILLS:

- **Programming Languages:** Python (Pandas, NumPy, SciPy, Matplotlib, Scikit-Learn, TensorFlow), R, SQL
- **Databases & Data Warehousing:** SQL Server, PostgreSQL, MySQL, Oracle, MongoDB, Snowflake
- **Cloud Platforms & Infrastructure:** AWS (S3, Redshift, Glue, Lambda, EMR, EC2, Route53), Infrastructure as Code (IaC), Terraform, GCP (BigQuery), Azure (Data Factory, Databricks, Blob Storage, Synapse Analytics, Data Lake)
- **Big Data Technologies:** Apache Spark (PySpark, Spark SQL), Apache Kafka, Apache Airflow, Apache Hive, Apache NiFi, Apache Flink, Hadoop (HDFS, YARN, MapReduce)
- **ETL / ELT & Data Pipelines:** Glue, Talend, Informatica, APIs, SFTP
- **Data Visualization & Analytics:** Tableau, Power BI, Amazon QuickSight, Business Intelligence (BI), Visio
- **Methodologies:** SDLC, Agile, Scrum, Kanban, Waterfall

PROFESSIONAL EXPERIENCE:

Molina Healthcare (FL, USA)

Dec 2023 to Till Date

Data Analyst II

Responsibilities:

- Built regression and classification models in Python (SciPy, Scikit-learn) and R on AWS SageMaker to analyze healthcare datasets exceeding 500M+ records, uncovering clinical and operational insights that supported evidence-based decision-making.
- Optimized SQL queries in Snowflake and Amazon Redshift, reducing runtimes by 40% and improving ETL by 30% across a 15 TB healthcare data warehouse containing patient, claims, and clinical records. Designed Star and Snowflake schemas to ensure scalability and compliance with healthcare reporting needs.
- Enhanced healthcare data workflows through indexing, partitioning, and parallel processing techniques, enabling faster and more reliable data cleansing and standardization while maintaining HIPAA-compliant practices.
- Automated PySpark ETL pipelines on AWS EMR orchestrated with Apache Airflow, and implemented real-time and batch processing pipelines using Spark, Kafka, Hadoop, and AWS Kinesis to support critical patient monitoring and claims processing use cases.
- Developed predictive models (Logistic Regression, Decision Trees, Random Forest, XGBoost) in Python to improve patient churn/readmission prediction by 18%, enabling more effective retention and care management strategies.
- Automated data extraction and integration from EHR systems, claims databases, APIs, and cloud sources (S3, RDS), reducing manual intervention by 30% and improving data pipeline efficiency.
- Designed and deployed interactive dashboards in Looker, Power BI, and AWS QuickSight to provide real-time visibility into clinical KPIs, patient outcomes, and operational performance for executives and clinicians.
- Applied advanced analytics, patient segmentation, and statistical programming to optimize workflows, streamline reporting, and generate actionable insights that improved healthcare delivery.

- Collaborated with clinical, product, engineering, and business teams to ensure alignment of data solutions with organizational goals, regulatory requirements, and healthcare industry best practices.

Environment: Python (SciPy, Scikit-learn, PySpark), R, SQL, AWS SageMaker, AWS EMR, AWS S3, AWS RDS, AWS Kinesis, Amazon Redshift, Snowflake, Hadoop, Apache Spark, Apache Kafka, Apache Airflow, Looker, Power BI, AWS QuickSight, EHR systems.

Costco (FL, USA)

Feb 2023 to Nov 2023

Data Analyst

Responsibilities:

- Leveraged Python scripts and AWS Lambda functions to automate repetitive retail workflows, improving operational efficiency and reducing manual effort across sales, inventory, and marketing data pipelines.
- Performed advanced analysis and transformation on large retail datasets (10,000+ rows) using Python (Pandas, NumPy) and SQL, applying data wrangling, cleaning, joining, and aggregation techniques to uncover sales trends, customer behavior patterns, and actionable insights.
- Ensured data accuracy and consistency across product, customer, and transaction datasets by implementing robust validation frameworks in Python and SQL, maintaining over 95% data reliability.
- Optimized cloud storage strategies using Amazon S3, implementing cost-efficient data retention, lifecycle policies, and partitioning to accelerate access to sales and inventory data.
- Led migration of analytics workflows to cloud-based solutions, deploying AWS CloudWatch for real-time monitoring and automated alerts, and leveraging Amazon S3 for scalable, secure storage of retail data.
- Designed and maintained interactive Power BI dashboards using DAX, Power Query, and advanced visualizations to track sales performance, inventory levels, and marketing KPIs, enabling data-driven decision-making for retail managers.
- Collaborated with senior analysts and business teams to develop advanced Excel-based reports, leveraging pivot tables, VLOOKUP, Power Query, and macros to streamline retail reporting and improve insights into customer engagement.
- Built reusable Python modules and automated ETL scripts to process sales, promotions, and inventory data efficiently, ensuring repeatable and accurate analytics workflows.
- Partnered with cross-functional teams, including merchandising, marketing, and operations, to translate retail business requirements into technical solutions and actionable insights.
- Applied best practices in data governance and security to protect sensitive customer, sales, and transaction information while supporting analytics and reporting initiatives.

Environment: Python (Pandas, NumPy, PySpark, AWS Lambda), SQL, AWS SageMaker, AWS CloudWatch, Amazon S3, Snowflake, Power BI (DAX, Power Query), Excel (Pivot Tables, VLOOKUP, Macros), Apache Airflow, ETL Pipelines

ValueLabs (Hyderabad, IND)

Aug 2019 to Jun 2021

Junior Data Analyst

Responsibilities:

- Automated data extraction and integration workflows, reducing manual effort by 30% and improving pipeline efficiency.
- Applied data wrangling and transformation techniques to restructure complex datasets for statistical modeling and visualizations.
- Built predictive and statistical models using Python (SciPy, Scikit-Learn) and R, including regression and classification, to guide business decisions.
- Developed actionable dashboards and visualizations to convey insights to non-technical stakeholders.
- Designed and executed ETL pipelines using Apache Airflow and AWS Glue for accurate and timely data movement.
- Optimized database performance through indexing, normalization, and query tuning.
- Maintained data quality and integrity through rigorous validation procedures.

Environment: Python (SciPy, Scikit-Learn, Pandas, NumPy, R), SQL, Apache Airflow, AWS Glue, Data Warehouses, PowerPoint, JIRA, Confluence, ETL Pipelines, Data Visualization Tools

EDUCATION:

- Bachelors in Computer Science from Vardhaman college of Engineering - Nov 2018
- Masters in Information Technology Atlantis University - Dec 2022
