

Pranav Dhameliya

Wake Forest, NC | (201) 423-5667 | Pranav.dhameliya95@gmail.com

Professional Summary

Results-driven Data Management & Governance Advisor with expertise in Data Analysis, Business Intelligence (BI),

Cloud Computing, and Data Engineering. Skilled in implementing robust data governance strategies, SQL optimization, AWS cloud

solutions, and Databricks workflows. Passionate about enhancing data quality, streamlining ETL processes, and leveraging analytics

to drive business decisions.

Technical Skills

- Databases & Querying: SQL, T-SQL, PostgreSQL, Snowflake, Redshift
- Cloud Technologies: AWS (S3, Glue, Redshift, Lambda, EC2, SNS, SQS), Databricks
- ETL & Data Pipelines: Apache Spark, Delta Lake, Airflow, Informatica
- BI & Visualization: Power BI, Tableau, Looker, AWS QuickSight
- Programming & Scripting: Python (Pandas, NumPy, PySpark), SAS, R
- Data Governance & Quality: Collibra, Data Cataloging, MDM, GDPR Compliance
- Project Management Tools: JIRA, Confluence, GitHub, Bitbucket, Lucidchart

Professional Experience

Evernorth Health Services

Data Management Strategy & Governance Advisor (Feb 2022 - Present)

- Spearheaded the implementation of data quality measures using Databricks, SQL, and Python, reducing data anomalies by 30%.
- Designed and optimized ETL pipelines on AWS Glue and Databricks, improving data processing efficiency by 40%.
- Collaborated with stakeholders to establish data governance frameworks in Collibra, enhancing data integrity and compliance.
- Developed BI dashboards in Power BI and Tableau, enabling leadership to make data-driven decisions with improved visibility.

- Automated data validation processes using Python scripts and AWS Lambda, reducing manual effort by 50%.
- Provided insights using advanced SQL analytics on large datasets, optimizing query performance for faster execution.

Signify Health

Business Data Analyst (Aug 2020 - Feb 2022)

- Managed end-to-end ETL development using AWS Glue and Redshift, improving data accessibility for business units.
- Created interactive dashboards in Power BI to track key performance metrics for executive reporting.
- Led research, testing, and implementation of new data platforms, ensuring seamless system integration.
- Developed Python-based data pipelines to extract and transform data from multiple sources.
- Enhanced data governance policies, ensuring compliance with industry regulations and best practices.

Education

- Bachelor's Degree in Computer Science / Data Science

Projects & Additional Experience

- Developed a Databricks-based data lakehouse architecture for structured and unstructured data processing.
- Optimized AWS Redshift queries, reducing execution time from 30 minutes to under 5 minutes.
- Built automated ETL workflows using Apache Airflow, ensuring real-time data availability.
