PROFESSIONAL EXPERIENCE

Lumina Datamatics • Chennai, India (Remote)

February 2024 - August 2024

Machine Learning Engineer

- Developed solution for layout detection and extraction using object detection frameworks like YOLO, RCNN etc. leading to 20% improvement in accuracy metric compared to existing methods.
- Deployed a microservice for the detection and extraction of complex mathematical and chemical equations from documents.
- Developed a document-based virtual question answering system for legal text documents, enabling efficient extraction of relevant information and answering queries through advanced natural language processing techniques.

HCL Technologies • Noida, India

July 2023 - September 2023

Machine Learning Intern

- Enhanced data-driven insights by implementing advanced machine learning algorithms and conducting exploratory data analysis on employee productivity records, leading to the identification of new KPIs and increased overall productivity.
- Executed clustering and regression tasks on TP data, optimizing data analysis and providing insights.

Ernst & Young • Gurgaon, India (Hybrid)

May 2023 - July 2023

Summer Intern

- Created dynamic and visually engaging analytics dashboards for Sales and HR projects using PowerBI and Alteryx. Highlighted crucial metrics such as revenue growth, retention rates, and performance analytics, enabling informed decision-making.
- Collaborated with cross-functional teams to gather and analyse data, ensuring alignment with project objectives and integration.

EDUCATION

MS, Data Science • George Washington University

August 2024 – Present

GPA: 3.83 /4.0 (Present)

BTech, Computer Science and Engineering • Manipal University Jaipur

November 2020 – July 2024

GPA: 8.51/10.0

TECHNICAL SKILLS & CERTIFICATIONS

Programming: Python, R, C/C++, SQL

Technologies & Tools: Hugging Face LLMs, MLflow, AWS, PowerBI, SAS, Git, GitHub, Docker, Excel

Competencies: Data Analysis, Statistical Modeling, Natural Language Processing, Deep Learning, MLOps

Certifications: AWS (July 2024), ML A-Z by Udemy (July 2023), PCAP & CCNAv7 by Cisco (November 2022), SQL by Oracle Academy (April 2022), RH124-7 & RH134-7 (April 2022)

RESEARCH PROJECT EXPERIENCE

PDF-table-OCR using Hugging Face | Python

June 2024

This project is a solution for table detection and extraction from documents. It converts document pages into images, uses pretrained models to detect tables and their structures, crops and extracts the detected tables, performs OCR on table cells, and saves the extracted data as CSV files.

AutoReel using Reddit API, Microsoft TTS and FFMPEG | Python

March 2024 - May 2024

This project automates the creation of shorts from Reddit posts by scraping posts from a subreddit, converting the text to speech using a TTS model, and combining the generated speech with a background video. It also transcribes the audio to generate subtitles and overlays these subtitles on the video.
