SUMMARY

Software Engineer with 4+ years of experience designing, developing, testing, and deploying scalable, high-performance applications. Skilled in Core Java, OOP principles, design patterns, and the Spring ecosystem (Spring Boot, MVC, Data) with strong expertise in RESTful API design and SQL databases including MySQL, PostgreSQL, and Oracle. Proficient in Git, Maven, and Gradle, with hands-on experience maintaining and enhancing applications for performance, scalability, and reliability. Familiar with microservices, Docker, Kubernetes, and cloud platforms (AWS, Azure), as well as front-end frameworks like Angular and React. Adept at writing clean, well-documented code, mentoring peers, collaborating across business and QA teams, and applying CI/CD and DevOps practices to deliver secure, reliable, and business-aligned solutions.

TECHNICAL SKILLS

Languages:	Java, Python, C, C++, C#, Golang, JavaScript, TypeScript, SQL, Design Patterns, OOP.
Frontend:	HTML5, CSS3 (Tailwind, Bootstrap), Angular, NGRX, PHP, React.js, Vue.js, Next.js, JSON, XML, AJAX, Redux
Backend & Frameworks:	Spring Boot, Spring MVC, Hibernate, Node.js, Django, GraphQL, J2EE (Servlets, JSP, JavaBeans, JDBC)
Databases:	MySQL, Oracle, MS SQL Server, PostgreSQL, MongoDB, DynamoDB, NoSQL
J2EE Technologies:	Servlets, JSP, JSTL, JavaBeans, JDBC
Cloud & Infrastructure:	AWS (EC2, S3, Lambda), Azure, GCP, Terraform, Docker, Kubernetes, OpenShift, Redis.
IDEs:	IntelliJ IDEA, Visual Studio Code, PyCharm
Messaging & Streaming:	Kafka, RabbitMQ, IBM MQ, ActiveMQ
DevOps & CI/CD:	Git, GitHub, GitLab, Jenkins, Azure DevOps, Maven, Gradle
Methodologies:	SDLC, Agile (Scrum, TTD), Waterfall
Testing & Performance:	JUnit, Mockito, PyTest, JMeter, Dynatrace, Jasmine, Cypress, Cucumber, Selenium.
Logging & Monitoring:	Splunk, ELK Stack, Grafana, Datadog, Databricks, ELK, Snowflake, Postman.
System Design:	Distributed Systems, SaaS, Microservices, RESTful APIs, Web Applications
Operating Systems:	Windows, macOS, Linux, Unix
Soft Skills:	Analytical, Communication, Debugging, Leadership, Motivated, Problem Solving, Trouble Shooting.

PROFESSIONAL EXPERIENCE

Allstate Insurance, USA	Jan 2024 – Present
Software Engineer:	
- Led end-to-end development of an AI-powered claims automation platform using Java 11, Spring Boot, and Node.js, deployed on AWS, cutting claims handling time by 40% while following Agile and full SDLC practices. - Designed and secured RESTful APIs with JWT and Spring Security, ensuring HIPAA/PII compliance and passing audits through close collaboration with analysts, compliance, and offshore teams. - Improved UI speed and responsiveness with modern front-end frameworks (ReactJS, TypeScript, HTML), reducing support tickets by 25% and boosting agent productivity. - Optimized PostgreSQL and MongoDB with indexing, schema refinement, and Spring Data JPA, achieving 60% faster queries and high availability for critical insurance data. - Architected and deployed a microservices-based distributed system with AWS API Gateway, enabling seamless third-party integrations and improving scalability, reliability, and fault tolerance. - Mentored junior developers in cloud-native development, automating AWS EC2 provisioning with Terraform and deploying Dockerized microservices, cutting release cycles by 70%. - Streamlined CI/CD pipelines with Jenkins and Git, integrating Selenium-based automated testing, AI-assisted code analysis, and SonarQube into the Agile workflow, improving release quality and reducing regressions by 30%. - Maintained production stability with proactive Datadog monitoring and robust unit/integration testing using JUnit, Mockito, Selenium, and Python, cutting incidents by 50% and ensuring continuous delivery across the SDLC.	
Mphasis, India	Dec 2021 – Dec 2022
Full Stack Developer:	
- Modernized a legacy banking platform into a cloud-native solution on Azure with Java, and Python, enabling secure real-time loan processing and digital transactions. - Architected event-driven microservices on Azure Kubernetes Service (AKS) with Service Bus and Event Hubs, cutting payment processing time by 35% and ensuring reliable high-volume transactions. - Built customer-facing applications with ReactJS and HTML, CSS on Azure App Services, collaborating with UX and business teams to streamline teller workflows and enhance customer experience. - Strengthened platform security with Spring Security, OAuth2, and Azure Active Directory, achieving PCI-DSS and ISO 27001 compliance to safeguard sensitive financial data.	

- Accelerated software delivery by 60% through CI/CD pipelines in Azure DevOps with Docker and Kubernetes, improving release quality and team productivity.
- Increased system throughput by optimizing PostgreSQL, MongoDB, and Azure Cosmos DB with load testing, profiling, and caching strategies, ensuring stability during peak financial operations.
- Championed TDD and automated testing with JUnit, Mockito, and Cypress in Azure DevOps, improving code reliability and reducing production defects.
- Mentored junior developers on secure coding, cloud practices, and DevOps principles, raising engineering standards and strengthening Agile team delivery.

Intex Technologies, India
Java Developer:

Oct 2019 – Nov 2021

- Built and adopted unit test suites for a Spring Boot retail app with OAuth2 security, strengthening compliance and protecting customer data; achieved 40% team adoption in the first month.
- Developed scalable RESTful APIs and web services in Java, integrating MySQL with Hibernate to process JSON product and order data, boosting processing efficiency by 30% and cutting latency by 25% during peak sales.
- Designed and deployed microservices architecture on AWS with Apache Kafka for real-time order and inventory streaming, improving system throughput by 35% and sustaining 99.9% uptime during seasonal retail peaks.
- Delivered high-performing single-page applications with React.js and Node.js to support customer-facing and internal retail portals, powering 15+ live apps and scaling effectively with user growth.
- Optimized retail transaction databases using PL/SQL procedures, reducing query execution time by 40% and lowering database-related issues by 25%, enhancing checkout, returns, and inventory operations.
- Automated CI/CD pipelines with Jenkins on AWS, accelerating deployments by 40% and cutting manual errors by 30%, improving delivery speed and developer productivity.

PROJECTS

Smart Cane for Blind People:

- Developed an AI-powered Smart Cane using C++ and Python for obstacle detection with ultrasonic sensors, providing real-time feedback through haptic and audio responses.
- Implemented IoT and GPS tracking with Node.js for emergency alerts and remote monitoring, improving safety and user experience.
- Engineered a microcontroller system using Arduino and Raspberry Pi, leveraging C and Python for efficient data processing and real-time responsiveness.
- Optimized power consumption and user interaction by refining the design using JavaScript and HTML5 for intuitive user interface development and real-time data visualization.

Book Your Show:

- Designed and developed a user-friendly platform using React.js and Node.js, enabling seamless ticket booking, real-time availability, and payment integration.
- Built a robust backend API with Java and Spring Boot, optimizing for high concurrency and ensuring reliable booking experiences under heavy traffic.
- Integrated third-party services like Stripe for payment processing and Google Maps API for location-based theater search, enhancing the user experience.
- Implemented SQL and NoSQL databases (e.g., MySQL, MongoDB) to manage user data, booking history, and theater details, ensuring scalability and fast retrieval of data.

EDUCATION

University of Missouri-Kansas City. MO
Master’s in computer science

May 2024

Madanapalle Institute of Technology and Sciences, India.
Bachelor of Technology in Computer Science and Engineer

July 2021

CERTIFICATION

AWS Certified Developer – Associate
