

Pranav Joshi

pranavjoshi2390@gmail.com

971-708-2534

Aspiring software engineer with expertise in software development, pursued a Computer Science degree. Skilled in Java, Spring Boot, and Angular, with significant experience enhancing application performance and user engagement.

WORK EXPERIENCE

Build Exito - Summer Researcher

Jun 2024 - Aug 2024

Portland, OR

- Facilitated 20 qualitative interviews with community members, identifying key barriers to healthcare access for a campus-wide health initiative.
- Led collaboration with faculty and students on a health equity research project, resulting in a poster presented to 200+ attendees at the BUILD EXITO symposium.

WebAppCloudc - Software Developer

Jan 2024 - Mar 2025

- Led collaborative sessions to gather and clarify business and system requirements, resulting in improved project alignment and stakeholder satisfaction.
- Leveraged Java 8 features, including Lambda Expressions and Stream API, to enhance application performance and streamline data processing in key projects, resulting in increased efficiency and cleaner code.
- Engineered a robust server-side application using Spring Boot and Hibernate, enhancing data processing efficiency by 30% and supporting over 1,000 concurrent users.
- Engineered a real-time tracking system for class schedules using Node.js and Express.js, improving user accessibility and engagement for over 500 students.
- Leveraged Angular 6 to develop a dynamic single-page application, enhancing user experience and increasing engagement by 20% through intuitive navigation and responsive design.
- Engineered a robust microservices-based API using Spring Boot and Spring Data, enhancing data retrieval efficiency by 30% and enabling seamless integration for client applications.
- Teamed up with a colleague to develop high-performance micro-services software that reduced bug rates by 20% and enhanced user satisfaction through streamlined functionality.
- Integrated a variety of systems leading to a 20% improvement in system performance and significantly enhanced user experience by swiftly resolving critical bugs.
- Streamlined bug resolution using JIRA, collaborating with QA teams to enhance software quality and reduce resolution time by 20%.

Computer Action Team - IT Support Specialist

Jan 2023 - Dec 2023

Portland State University

- Oversaw a team of 5 in managing remote session servers, improving uptime by 20% through proactive maintenance.
- Delivered technical support to 200+ students and staff, enhancing their learning experience and improving system efficiency.

PROJECTS

Nepali Dataset Annotation - Data Annotator

May 2023 - June 2023

- Annotated 672 Nepalese language texts & translated them into English.
- Corresponded if the sentences were in idiomatic or literal sense & labeled.

Alarm clock - DIY Arduino

- Designed and built a custom alarm clock using an Arduino microcontroller, wiring, and basic electronics.
- Programmed functionality for timekeeping, alarms, and user input using C++ and Arduino.
- Wired components including display, buttons, and buzzer, demonstrating practical knowledge of circuits and prototyping.

EDUCATION

Portland State University - Bachelor of Science, Computer Science

Sep 2021 - June 2025, GPA: 3.85

Portland, OR

Awards

- Magna Cum Laude

Relevant courses

Intro to Problem Solving; Software Engineering; Data Structures; Robotics; Operating Systems; Databases; Java programming; Calculus I; Calculus II; Calculus III; Data Structures; Software Development Methodologies; Software Design & Architecture; Cloud Computing; DevOps; Data Analysis.

SKILLS

- **Languages** - Java 8/11, Python, C/C++.
- **Java/J2EE Technologies** - Core Java, JSP, Servlets JDBC, JNDI, JMS, JSTL, Java Beans, Java Multithreading.
- **Web Technologies** - Angular JS/6/8/10, HTML5, XML, DOM, CSS3, JavaScript, Bootstrap, Typescript.
- **Frameworks** - Spring (IOC, Boot, AOP, DOA, Security), Hibernate.
- **Tools** - Eclipse, IBM RAD/WSAD, NetBeans.
- **Databases/Tools** - Oracle 11g/10g /9i, SQL Server, DB2, MySQL, Cassandra.
