

PRANAV KUMAR JAIN R

+1(415)202-3299 pranavkumarjainr@gmail.com LinkedIn GitHub

Data Analyst skilled in SQL, Python, and Tableau, with expertise across the full data lifecycle, from data preparation and exploratory analysis to predictive modeling, reporting, and clearly communicating insights to drive strategic decisions.

Experience

Data Analyst Intern

San Francisco, CA

tuScientific

October 2024 – June 2025

- Automated ingestion and storage of 1.3+ TB of business data using Python and AWS, reducing 10 hours of weekly manual processing to support the analytics team.
- Constructed a feature extraction pipeline using Python to analyze unstructured data, contributing to a 7% lift in key performance indicators (KPIs) and a 4% increase in user engagement.
- Utilized SQL and Python to conduct data analysis on customer frequency to optimize exposure, improving return on investment (ROI) across 20+ marketing initiatives.
- Enhanced analytics reliability by developing a testing framework with Pytest, contributing to the continuous improvement of data quality and reducing data-related bugs by 60%.

Data Analyst

Viluppuram, India

Asian Beverages

June 2023 – May 2024

- Clustered 10,000+ customer profiles using K-means in Python to identify segments for targeted promotions, resulting in \$15,000 in added revenue and a 10% lift in response rates.
- Developed a gradient boosting model on 3 years of historical sales and weather data, improving the accuracy of seasonal demand predictions and reducing inventory holding costs by 6%.
- Created Tableau dashboards to track and report forecasted vs. actual sales, partnering with leadership to influence strategic business decision-making and reduce excess stock by 12%.

Data Analyst Intern

Coimbatore, India

SBNA Technologies

July 2021 – December 2021

- Gathered, cleaned, and prepared 2M+ patient records using Python (Pandas) to reduce inconsistencies by 60%, ensuring data accuracy and consistency for analysis.
- Built interactive Tableau dashboards to deliver insights on patient trends to internal teams, supporting data-driven reporting and business planning.

Projects

Climate Indicators ETL Pipeline and Forecasting - GitHub

- Designed a cloud-based ETL pipeline using Airflow and PySpark to automate the ingestion and cleaning of climate datasets, reducing manual data preparation by 70%.

Accidents Severity Prediction - GitHub

- Engineered features from weather and location data for 1.5M+ records and developed classification models (SVM, Random Forest) to forecast accident severity for risk assessment.
- Evaluated model performance using accuracy and F1-score to provide sound recommendations on the most effective predictive models for the given business problem.

COVID-19 Analysis - GitHub

- Assembled interactive Tableau dashboards to track and report key public health metrics across 10+ countries, enabling demographic comparisons to support data-driven reporting.

Technical Skills

Programming & Data Handling: Python (Pandas, NumPy), SQL (PostgreSQL), Bash/Shell Scripting

ML & Statistics: Machine Learning, Statistical Modeling, Hypothesis Testing

Tools & Visualization: Tableau, Excel, Git, Linux, Matplotlib, Seaborn, Pytest

Big Data & Cloud: Apache Airflow, AWS, PySpark

Education

University of San Francisco

San Francisco, CA

M.S. in Data Science

July 2024 - June 2025

Sri Ramachandra Institute of Higher Education and Research

Chennai, India

B.Tech. in Computer Science Engineering (AI and Machine Learning)

July 2019 - June 2023
