WORK EXPERIENCE

Full Stack Software Developer – Sayaam For All

August 2025 – Present

- Built and optimized full-stack features for the Saayam web and mobile apps using React and Java ensuring smooth cross-platform performance.
- Designed and deployed microservices for Volunteer, Organization, Request, and AI analytics modules using Spring Boot 3, JDK 17, and Kafka on AWS EKS (Kubernetes).
- Integrated AWS services such as Cognito, API Gateway, Lambda, MSK, CloudWatch, and RDS while managing data models in PostgreSQL and Aurora.
- Delivered production-ready code with thorough unit testing, automated test coverage, and feature documentation to support continuous deployment and maintainability.

Software Engineer – Tata Consultancy Services

December 2021 – July 2023

- Contributed to all phases of SDLC in Agile teams, reducing development cycle time by 25% through efficient sprint planning and iterative delivery.
- Engineered and deployed microservices using Spring Boot, Spring MVC, and J2EE, leveraging Java Streams API and Functional Interfaces to enhance data processing by 35%.
- Configured AWS IAM policies and roles to enforce least-privilege access, integrated Spring Data JPA + Hibernate for optimized persistence, and built RESTful APIs to ensure seamless interoperability and reliable data exchange across distributed systems.
- Implemented event-driven architecture with Apache Kafka and AWS S3, optimizing real-time data ingestion and reducing latency by 40%.

PROJECTS

ECHO AI (View Project)

December 2024

- Developed a full-stack AI-powered chat application integrating Clerk authentication, Google Generative AI API, and ImageKit for media handling, ensuring secure and scalable user interactions.
- Engineered a dynamic React frontend with TanStack Query for efficient data fetching and state management, while leveraging Express and Mongoose to build a robust backend API for seamless communication.
- Implemented Vercel-based serverless deployment with CORS-enabled Express routes, optimizing application performance.

Chat Application (View Project)

- Engineered a feature-rich chat application using React and Firebase, leveraging Firebase Firestore for real-time messaging and Firebase Authentication for secure user access.
- Optimized application performance with Zustand for lightweight state management, ensuring a smooth and scalable user experience.
- Integrated Vite for optimized build performance and fast hot reloading, improving developer workflow and reducing application load times.

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems

May 2025

Master of Science (MS), Computer Science | GPA: 3.95

University of Mumbai

June 2021

Bachelor of Engineering

SKILLS

Programming Languages: Java, JavaScript, Python, TypeScript

Web Development: Angular, CSS, Express, HTML, Jest, Node.js, React Redux, React.js, RESTful APIs, SCSS, WebSocket

Database Management: Big Data, GraphQL, MongoDB, MySQL, Oracle Database, PostgreSQL, Redis, SQL

Methodology & Collaboration: Agile, Git, GitHub, Jira, Postman, Scrum, Software Development Lifecycle (SDLC), Unit Testing

DevOps & Cloud: AWS (EC2, S3, IAM), CI/CD, Docker, GCP, Jenkins, Kubernetes, Linux, Unix
