EDUCATION

Georgetown University	August 2023 – May 2025
Master of Science in Data Science and Analytics	Washington, D.C., USA
○ Recipient of the Returning Students Scholarship Award for my data visualization project ○ Teaching Assistant - Led instruction and grading for Big Data, Statistical Learning, Machine Learning, & Summer Bootcamp	
University of Mumbai	August 2019 – May 2023
Bachelor of Engineering in Computer Engineering	Mumbai, India
○ Served as a judge for the National Level Project Competition PROJECTATHON 2.0	

TECHNICAL SUMMARY

Computer [Programming Languages]: Python, R, SQL(PostgreSQL, MySQL), HTML, CSS, C++
Libraries:Pandas, NumPy, Scikit-learn, SciPy, PySpark, PyTorch,NLTK, Matplotlib, Seaborn, plotly, Bokeh, Streamlit, TensorFlow
Machine Learning models: Regression, Classification, Clustering, Naïve Bayes, KNN, Decision Trees, SVM, Random Forest, K-Means, XGBoost, LoRA, LLMs (GPT-4, BERT, DistilRoBERTa)
Technologies : AWS (S3, SageMaker, EC2), Jupyter, GitHub (CI/CD, Actions), Quarto, Tableau, Power BI, Snowflake, MS Office

WORK EXPERIENCE

Georgetown University Graduate School of Arts and Sciences	May 2024 – May 2025
Data Administrative Assistant - Graduate Financial Aid Office	Washington, D.C., USA
○ Investigated and reconciled 10K+ student records in Banner with 99%+ accuracy, ensuring compliance and audit readiness ○ Created FERPA-compliant Power BI dashboards & Excel reports to summarize student aid trends & anomalies for leaders ○ Streamlined workflows for data cleaning, and reconciliation, reducing manual workflow by 30% and improving efficiency	
MBA Career Center at the Georgetown University McDonough School of Business	May 2024 – August 2024
Graduate Student Assistant - Data Analytics and Business Intelligence	Washington, D.C., USA
○ Developed dynamic Tableau dashboards to visualize trends in job placement and recruiting metrics. ○ Automated data pipelines using SQL and scraping tools; reduced manual reporting effort by 40%, saving 10+ hours/month ○ Improved data integrity by enhancing data cleansing and normalization processes, increasing reporting accuracy by 15%	
Techq Konnect Technologies Ltd.	June 2022 – August 2022
Data Science Intern - Credit Risk Analytics	Mumbai, India
○ Built credit risk scoring models (Logistic Regression, Random Forest, XGBoost) with 92% accuracy to support loan approval ○ Processed financial data & performed feature engineering, collaborating with product teams for production-ready testing	
Agarwal Packers and Movers Limited	September 2021 – October 2021
Data Science Intern - Operational Analytics	Mumbai, India
○ Designed an automated reporting system using Python, SQL, and Google Sheets, reducing manual processing time by 60% and saving an estimated 15+ hours per week in operational effort. ○ Extracted, cleaned, and structured social media data (160+ channels) via APIs to improve analytics quality and delivered key social media insights to inform marketing and operational strategies.	

PROJECT EXPERIENCE

DataMorph: Automating Format Detection & Transformation with GenAI [link]	January 2025 – May 2025
○ Built a Streamlit app with Retrieval-Augmented Generation (RAG) and GPT-4 to automate schema detection and ETL transformations across CSV, JSON, XML, and Parquet files; achieving 76% workflow automation across 50+ test cases, cutting ETL setup time by 60% using a multi-agent LangGraph architecture and ChromaDB with 2.3s average agent latency	
Streamlining Product Categorization for E-commerce Using LoRA [link]	September 2024 – December 2024
○ Fine-tuned transformer-based LLMs (GPT-2, BERT, DistilRoBERTa) using LoRA on the Amazon Reviews dataset, improving minority class AUC scores by up to 16% and reducing training compute by over 50% ○ Applied advanced NLP workflows (tokenization, stratified sampling, PEFT) and model evaluation techniques to achieve state-of-the-art accuracy in scalable product categorization across 10+ e-commerce categories	
Analyzing Investor Sentiment and Market Impact Across Financial Subreddits [link]	September 2024 – December 2024
○ Analyzed 3M+ Reddit posts using PySpark & AWS to extract investor behavior insights via EDA and topic modeling ○ Applied NLP techniques to study how user engagement correlates with market fluctuations and product sentiments	
Chatting with Dataframes - Conversational Data Analytics with Polars and DuckDB [link]	January 2024 – April 2024
○ Built a Python package and Streamlit web app enabling natural language queries over Polars/DuckDB datasets, reducing manual SQL writing by 80% for non-technical users with sub-second response times in >90% of queries
